## Closing of US-12 Gap Planned for This Year

Closing of the five-mile gap on US-12 past Chelsea was termed the No. 1 state highway department project in Washtenaw county this year by Commissioner Murray D. Van Wagoner.

The commissioner stated his position in reply to a request from a Dexter delegation for the improvement of M-182 to Ann Arbor. He suggested that the delegation, led by Otto Wagner, postmaster, withhold its request until the gap is closed.

Early completion of right-of-way negotiations in the Chelsea area was predicted by the commissioner. US-12 is now a three-lane pavement all the way from Jackson to Ann Arbor with the exception of the Chelsea gap where right-of-way negotiations have delayed construction. Paving of the gap is on the current construction program, the commissioner stated.

Although residents of Chelsea and many of the farmers along the proposed new right-of-way have vigorously opposed relocation of this highway it is apparent that Mr. Van Wagoner has definitely decided to relocate the road, which will be about two miles south of the village.

According to a statement made in Lansing on Saturday by Commissioner Van Wagoner, the department will resort to condemnation proceedings in order to secure some of the right-of-way for the new highway unless more favorable terms can be obtained. In the opinion of the state officials prices asked by some of the farmers are prohibitive—far in excess of its value. If condemnation is resorted to that proceeding will require four weeks—two weeks to advertise the proceeding and another two weeks for the commissioners to make their determination.

## O. D. Schneider New Pres. of School Board

At the organization meeting of the Board of Education, School District No. 3, F., Sylvan and Lima, held last Thursday evening, officers were named for the coming year, as follows:

President—O. D. Schneider.  
Secretary—G. W. Walworth.  
Treasurer—J. N. Stricker.  
Trustees—J. V. Burg and M. J. Dunkel.

**GOTTLIEB F. KOCH.**  
Gottlieb F. Koch, 58, for many years a resident of Freedom township, died suddenly Sunday evening at the home of Mr. and Mrs. Emanuel J. Sott, Pleasant Lake, with whom he had resided for nine years. Coroner E. C. Ganzhorn, who was called pronounced the death due to apoplexy.

Mr. Koch, who was born April 6, 1879, in Germany, was a year old when brought by his parents to America. He was united in marriage to Bertha Heinrich, who died in 1908.

He is survived by one daughter, Mrs. Carl Stierle of Ann Arbor; five sisters, Mrs. E. J. Sott of Pleasant Lake, Mrs. Albert Eisele and Mrs. William Frey of Ann Arbor, and Mrs. Emanuel Wacker and Mrs. Albert Schiller of Lima township; three brothers, Christ and Frederick Koch of Lima township and Albert Koch of Dexter; and two grandchildren.

Funeral services were held at 2:00 o'clock Wednesday afternoon at the Sott home at Pleasant Lake. Rev. M. W. Brueckner officiated and burial was in Zion cemetery, Freedom.

## WHEAT THRESHING STARTS

Wheat threshing commenced in the vicinity of Chelsea the past week. The grain in the majority of cases is of rather poor quality, rusty, and it shrinks. The yield varies according to the location and it runs from 20 to about 25 bushels to the acre.

**Mackinac Island**—Holding their annual outing at this historic island at the crossroads of the Great Lakes, newspaper editors of Michigan had an opportunity last week-end to study the recreational resources of the Upper Peninsula. They were impressed anew, as all Michigan residents are sooner or later, that Michigan is a big state—the only one in the country to comprise two peninsulas, separated by a straits of water between two large inland seas.

Despite a mild winter that interfered somewhat with winter sports and a frequent labor turmoil that prompted some executives to cancel summer vacation reservations, Michigan's tourist industry has been doing good business this year.

Proof of that is seen in the unprecedented traffic jam which occurred at the Straits preceding the July Fourth holidays.

According to our four tourist bureaus, Michigan is attracting more and more tourists each year, and even 1937 is no exception.

## New National Park?

From a scenic point-of-view, the Straits offer a treat to the average tourist. A trip from Mackinaw City to St. Ignace is made easily by commodious state highway ferry boats, affording an enjoyable break in motoring. The boat trip is always refreshing.

Promoters of a Straits bridge point out that public convenience would be served by construction of a structure saving the traveler's time and avoiding discomforts of long delays.

Upper Peninsula residents, who see a great future in this region bordering Lake Superior, hear much these days of the proposed bridge. The talk is usually linked up to plans for recreational development of the region.

From Washington comes news that the National Park Service is interested in a proposal for a 125,000-acre national park between Little Glis Point and Union Bay.

This area would include the famed Porcupine mountain range of Ontonagon county which is clothed with a velvety sheen of virgin hardwood. (Continued on next page)

## F. F. A. News

**Chelsea Poultry Team High**  
The results of the State Vocational Judging contest has just recently been published at Michigan State College.

A total of approximately 2500 boys participated in the various contests, including grain, potato, poultry, dairy and general livestock. As high as 140 school-teams participated in each contest.

The poultry team composed of H. Gage, R. Spiegelberg and P. Bristol made a total of 1083 points to place fifth in the state.

The dairy team composed of V. Haffey, E. McHenry, and M. Hepburn placed 43.

The potato team composed of W. Beaman, J. Alber and L. Tisch placed 87.

General livestock team composed of R. Ives, H. Gage, and R. Spiegelberg placed 89.

Grain team, composed of J. Alber, M. Leach and W. Beaman placed 132. I wish to congratulate these boys on their participation and representation of Chelsea high school in the judging contest and their achievement. I hope that the experience has been helpful and that many will be back next year.

Roy Wallis,  
Voc. Agric. Instructor.

**Dairy Judging Contest Aug. 10**  
The Southeastern Michigan Parish Show for Jersey cattle will be held August 10, at the Washtenaw County fair grounds. A Junior judging contest for Vocational Agricultural students and 4-H club members will be held in the forenoon. Suitable awards to the five highest contestants will be made. Four classes of four animals will be judged. Written reasons on one of these classes will be required. Let's have Chelsea represented at this contest.

**F. F. A. Meeting Aug. 2**  
There will be a meeting of the F. F. A. club on Aug. 2 at 7:30 in the Chelsea high school. Plans for the annual trip will be made at this meeting and every member is expected to come.

R. Ives, President.

**BRIDE-TO-BE HONORED**  
Mrs. Russell McLaughlin was hostess at a 1:30 luncheon Friday afternoon at the Haunted Tavern, Ann Arbor, given in honor of Miss Barbara Reeves of Stockbridge, whose marriage to Cleland McLaughlin of Chelsea will be an event of the near future. Guests at the luncheon included Mrs. W. R. Reeves of Stockbridge, mother of the bride-elect, Mrs. Max Heald of Ann Arbor, Mrs. E. R. Dancer and Mrs. O. R. McLaughlin of Chelsea.

## Local Foundry Starts Operations This Week

Reorganization of the local foundry formerly operated as the Chelsea Foundry & Manufacturing Co. was completed during the past week and operations at the plant were started this week.

The foundry will be operated as a corporation, with J. A. Merrill and Ray Whipple as the owners. Mr. Merrill will be superintendent of the foundry and Mr. Whipple will be business manager of the concern.

This local plant has been idle for some time and the reopening will be welcome news to local residents. The management report that they have enough orders on hand to keep the foundry busy for some time and that prospects for a large volume of business are good. Several men have been employed and this number will be increased when operations are well under way.

## Collections Increase As Deadline Nears

With only five weeks remaining for Michigan taxpayers to avail themselves of the installment plan for paying back taxes without penalty, Auditor General George T. Gundry, stated this week that reports show many of the tax paying public are hurrying to their county treasurers' offices to take advantage of the legislative plan to save their property from the tax sale next spring.

Mr. Gundry pointed out that payments made before September 1st may be made with only a 2 per cent collection fee while those paid after that date may still be paid in full but under heavy penalty.

The Auditor General indicated that all real estate taxes for 1935, and earlier years will go to sale unless they are paid in full or are paid up to the currently due installment. He explained that this meant that 1935 taxes must be paid in full, that at least one-tenth of the total of 1933, 1934 and 1935 taxes must be paid in order to escape this sale and that at least three-tenths of the total of 1932 and prior years must be paid to forestall sale of the property next May.

Attention was drawn to the fact that if the first installment of 1933, 1934 and 1935 taxes has not been paid the property will go to tax sale for the full amount of these taxes.

## KAERCHER REUNION

The annual Kaercher reunion which was to have been held Sunday at the Dexter-Huron park, on account of the inclement weather, adjourned to the home of Mrs. L. Kaercher in Dexter where dinner was served to 41 members. Ezra Wagner of Ann Arbor was elected president for the coming year; J. Allyn Kaercher, Ann Arbor, vice-president; and Miss Erma Nowak, Ann Arbor, secretary-treasurer. ## Rust Hits Some of State's Wheat Crop

Just when Michigan wheat growers were ready to capitalize on the misfortunes that have hit farmers in the west, some of the western wheat troubles have floated into the state, born by the wind.

From out in the state have come reports of serious damage by black stem rust, the worst infestation in years, county agricultural agents are reporting to men on the staff at Michigan State College.

Normally Michigan's wheat fields are maturing in time to escape serious damage, explains E. E. Down, plant breeder at the college. In his work he has experimented in an attempt to breed wheat that would be more resistant to the black stem rust. The problem is that it is difficult to combine resistance with good yield and a desirable stiff straw.

Michigan has worked for two decades to eliminate the hazard of rust. Japanese barberries have been hacked out and pulled in every county in the state. The barberry serves as a host for the spores of the rust when it is not working on a crop. Because the barberries are gone, the spores that arrive with winds from the south and east usually settle down in Michigan after the wheat is matured and past possible danger.

This year a late spring and damp growing weather caused the wheat to spore a chance to work. In some sections of the state estimates of the damage run as high as 30 per cent of the expected yield. The rust mycelium stops plumping of the wheat kernels, lowering yields and cutting test weights.

**Early Weather Data Exhibited**  
The beginning of systematic weather recording and forecasting is exhibited in a Harvard group. The first weather map was made at Blue Hill, Mass., in 1886.

**Heligoland for Zanzibar**  
In 1890 Heligoland was traded by England to Germany for Zanzibar, 3,000 times as large.

## Michigan Mirror

(Continued from page one)  
timber—a bright green cloak of beauty. This tract would include the Lake of the Clouds which is at the highest altitude in the central west, directly at the foot of Government Peak, the giant of the mountain chain.

## Wealth of Scenic Lures

The Upper Peninsula country, called the "Land of Hiawatha", may be visited easily in a week's time, so Michigan editors are advised by George Bishop of Marquette, secretary of the Upper Peninsula Development Bureau.

On your first day you should visit Mackinac Island and Les Cheneaux. On the way to Sault Ste. Marie a side trip might be made to the quaint old village of DeTour.

The second day would take you to the Sault Ste. Marie locks and then to a river trip to Tahquamenon Falls, driving to Munising and the Hiawatha national forest in the early evening. On the third day the tourist party will see the Naples of America, the Pictured Rocks, Miner's Falls, and Grand Island.

The fourth day could be occupied well by a brief inspection of the Marquette cities and iron range. Perhaps to White Lake, and then on to the Copper country.

The fifth day would reveal such scenic grandeur as the Porcupine mountains and the Lake of the Clouds, accessible only by foot trails. Next morning you visit Agate Falls, the Gogebic range, Mount Zion park and its wonderful view, Watersmeet, the Ottawa national forest, Crystal Falls, Iron River, Iron Mountain, the Menominee iron range, and Menominee.

For your seventh and last day the circle route leads through Escanaba and the Bay de Noc country. Kitchiti-ki-pi Spring, Indian Lake, Manistique, outstanding Blaney Park, Manistique Lakes, the 60,000 acres of the Hiawatha Sportsmen's club, and the Brevort lake shore drive into St. Ignace.

It is approximately a 1,000-mile awing over water and mountains and through an unspoiled wilderness.

Whether it is possible for a tourist party to see all these sights comfortably in seven days, we cannot vouch for personally. George Bishop is our authority for the statement.

## "Roof Garden"

According to Bob Becker of the Chicago Tribune, the Upper Peninsula is the "roof garden of the United States." This entire peninsula region is air conditioned by Superior and other northern Great Lakes. It is free from dust, smoke, and pollen, protected by heavy forest cover because of the air's tonic quality.

In these days of widespread tourist promotion, it is interesting to note that many Michigan residents are not familiar with their own state. Many of them have never visited the Upper Peninsula. This "roof garden" is yet to be discovered by thousands of Michigan people.

**Bridegroom Crushes Wine Glass**  
No one knows definitely why the orthodox Jewish wedding ritual requires the bridegroom to crush a wine glass under his heel. According to the most popular of its many interpretations, however, says Collier's Weekly, it is done to keep fresh the contempt which the Jews hold for the Romans who, in 70 A. D., captured Jerusalem, and, in burning the city to the ground and enslaving the few who escaped the sword, ended the Jewish nation.

## Formation of Clay

Clay is formed by the decomposition of rocks—a process of nature taking centuries. That's why Hawaii, a new land geologically speaking, has little of it. Early Hawaiians substituted the imu, or oven pit, for cooking utensils. A fire built in the pit heated stones. Then food was wrapped in green leaves, put in the pit and covered by more hot stones. It took four hours to cook a hog. Plates and other utensils were made of wood.

## 'WAY BACK WHEN

## JOSEF STALIN STUDIED FOR THE PRIESTHOOD

WITH what blindness do we attempt to guide our children's footsteps in life, so often forcing on them an ambition of our own? It might be laughable were it not so seriously in opposition to the man's own desires, but Josef Stalin was forced to attend the Tiflis Greek Orthodox seminary, because his mother wanted him to be a priest. Young Stalin, legally named Josef Vissarionovich Dzhugashvili, did not want to be a priest.

Born in 1879, Josef was educated in the village school of Gori, Russia. In his young days he was a fighter who bore many a black eye, and he was somewhat of a bully, although he always displayed intelligence and character. At the seminary, he led the other students in plotting against the authorities, and local railway workers met in his room. Eventually, he was dismissed in disgrace. At the age of seventeen, he joined the underground dock workers of Batumi in a riot and, when the terrorist Bolsheviks were formed became active in their movement. While attending a Bolshevik party conference in Stockholm, in 1905, he met Lenin for the first time.

Josef Stalin was arrested a half dozen times, and exiled from Russia the last time. He changed his name regularly and returned again and again. With Lenin and Trotsky, he took over the government of Russia in October, 1917. After Lenin died in 1924, Stalin supporters exiled Trotsky and through ruthless executions made Stalin dictator.

Josef Stalin's life is hardly the kind of biography you would expect from a boy who studied for the priesthood. The very fact that he was forced into religious studies may account for much of the violence that marked his career.

## First Brakes Were Used in Seventeenth Century

The Greeks and Romans had no brakes. It was not until the Seventeenth century that anything resembling a modern brake came into existence. For not until then, observes a writer in Fortune Magazine, did it occur to anyone to move wheeled vehicles along tracks. The track, eliminating irregularities in the roadway, stepped up vehicular speeds, thereby creating the necessity that mothered the invention of the brake. Early brakes were hand-operated levers, worked by deflecting the lever so that its business end was forced against the wheel.

Even the earliest steam locomotives, however, were too potent for hand-braking, and in 1833 Robert Stephenson invented a power (steam-driven) brake to go with them. The individual cars making up the trains, however, were hand-braked. Hand-braking was inadequate even for the short, light trains of the 1860s; no two brakemen braked with the same speed; the trains stopped slowly and jerkily and with a high percentage of brakeman mortality.

## TORNADOES SWEEP MICHIGAN AGAIN CAUSING HEAVY LOSS

Many sections of the state were visited during the past few weeks by terrible windstorms. Barns were torn apart, houses were wrecked, farm tools smashed, orchards uprooted and livestock killed.

From one cyclone alone, June 14, this company had over 200 losses in three townships. Damage was done in sections where cyclones had never before struck. You never can tell when or where a tornado will rip up a few hundred thousand dollars worth of property.

If you want to be safe from heavy loss get a windstorm insurance policy with this company at once. The cost is very low.

### Short Freedom

In the year 1517 the Spanish king permitted a friend of his to import 4,000 negroes annually into the new Spanish colonies of the new world. In 1540 he revoked the permission and sent an envoy to America to convey this and set the slaves free, which was dutifully done. But the minute the envoy took ship to embark for home the slaves were all recaptured and set to work again as slaves.

### Strange Wild Life

The birds, turtles and reptiles of the Galapagos islands, situated on the equator west of Ecuador, are totally unknown in any other part of the world.

When Frederick the Great Ruled Frederick II, who was called "the Great," ruled Germany from 1740 to 1786.

## Question And Answer Dept.

Ques.—How are nutmegs produced and where do they come from?

Ans.—Nutmegs grow on an evergreen tree which is native to the Virgin Islands. They are now cultivated extensively in Brazil. The seed is grown inside a thin, hard shell which is removed by hulling.

Ques.—What was the day and date of the battle of Manila Bay in the Spanish-American War?

Ans.—The battle of Manila Bay was fought on Sunday morning, May 1, 1898.

Ques.—Can you tell me what happens when an immovable object meets an irresistible force?

Ans.—Such a thing as that is an impossibility. If the immovable object could stop the force, then the force would not be irresistible. And if the irresistible force moved the object (which it could, as nothing whatsoever could stop it) the object would not be immovable. It is somewhat similar to asking a man how high he can lift himself by his bootstraps.

Ques.—Is it known what the size is of the largest ear of corn?

Ans.—Probably not. However, the largest ears of corn on record were exhibited at the Omaha (Nebr.) National Corn Show. A unit of ten ears was displayed, and the average weight for each ear was 22 ounces and had 21 rows of kernels. These ten ears sold for \$935. The champion ear weighed 25 ounces and had 26 rows of kernels. This single ear sold for \$85.

Ques.—Do the days and nights vary in length at the Equator as they do in this latitude? Do they have any winter?

Ans.—Days and nights at the Equator are exactly 12 hours each in length. Their winters are a mathematical quantity, and the temperature at the Equator varies very slightly throughout the year.

Ques.—Why is the banjo so closely associated with the negroes?

Ans.—The banjo is a direct inheritance of their African ancestry, as throughout that country the natives are passionately fond of story-telling, singing and music—the banjo being their favorite stringed instrument which were made from gourds with strings made of grass. With these simple means they produced music of that which was catchy and pleasant, although of not an artistic character. From this the modern banjo was developed.

Ques.—Was the Trojan War a reality? If so, what were the warring nations, and what was it all about?

Ans.—The history of the Trojan War is partly mythical. The war occurred between 1193 B. C. and 1184 B. C., and it was between the Greeks and the Trojans. The Greeks waged the war to avenge the abduction of Helen of Troy by the Trojans. The results were that the Greeks captured and destroyed Troy.

Ques.—Did the United States Supreme Court always have just nine members?

Ans.—No. Originally, the Court consisted of seven members. This number was increased to nine members early in the nineteenth century.

Ques.—How did the ancient Egyptians get the huge stones out to the desert and build those mammoth pyramids with their crude transportation and lack of mechanical contrivances?

Ans.—The ancient Egyptians accomplished their work of transporting stones and building the pyramids by the lavish use of man-power. Thousands of men were employed for months in moving a single stone from the quarries to the places where the pyramids were built.

Ques.—Who was Joan of Arc? And what became of her?

Ans.—Joan of Arc was the heroine of the French army in the war between England and France. The English had laid siege to the city of Orleans and hope of saving the city was almost abandoned by the French. Joan of Arc, a girl of 17 years, presented herself to the French army heads and implored to be commissioned to head the army to raise the siege. She had brilliant success. She also routed the English at Rheims. Later she was captured by the English and burned at the stake.

### Catacombs Under Palaces

There are nearly eleven miles of passages and grottoes underneath Fortress hill, which rises like an island of antiquity among the modern buildings of Budapest, the pleasure loving capital of the Hungarians. The hill is built up with the older palaces and newer mansions of the Magyar aristocracy, who didn't know until a generation ago that their homes were undermined by the deepest of man made tunnels. Some of the passages extend out beneath the bed of the Danube. The catacombs date back to the days when the fort of Buda was held by the Turks, marking the farthest fortified advance of the forces of Islam into Christendom.

## CHILDREN IN COURT

Judge Malcolm Hatfield

The tragedy of a boy with too much idle time on his hands was revealed in court today when a college freshman was convicted of a reckless driving charge in which several persons were injured.

Some ten or twelve years ago the son of the late Calvin Coolidge was approached at his work in a tobacco shed by a young man who casually remarked, "Believe me, if I had a car and my father was President of the United States you wouldn't catch me doing this kind of work."

Young Coolidge is reported to have looked up and replied, "You would if Calvin Coolidge was your father."

If there were more parents like the late President we would have fewer boys with high powered automobiles and large expense accounts seeking excitement and thrills on heavily congested highways.

## State May Issue Eight Car Plates

Back in 1909, citizens affluent enough to drive motor cars in Michigan had "life-time" licenses in the form of small metal discs on the dashboards. For many years, there was only one form of license plate, even after plates were bolted to cars annually.

In 1937, Michigan had five different kinds of motor vehicle license plates—in 1938, this number may be jumped to eight.

Next year, house trailers will carry distinctive plates for the first time. A new special plate will have to be devised for the "50-cents a hundred-weight" class of motor vehicles, authorized by the 1937 legislature. Leon D. Case, Secretary of State, was given authority by the same legislature, to decide between "stickers" and metal license plates for half-year permits. His decision still pending.

Hearses, ambulances and privately owned farm trucks used in the owner's farming business, will drop from the \$1.25 rate to the 50-cent rate in 1938, the legislature ordered. The rate for passenger cars is 35 cents per hundredweight.

It requires 650 tons of steel and 6,000 gallons of paint for the production of the 1,500,000 sets of plates for 1937. If plates are used for half-year permits, instead of stickers, the figures on steel and paint will jump about one-third. Michigan's prison industries can make about 15,000 sets of plates a day; those for 1937 took about 100 days to make. Additional work would be created by the making of more plates.

The next time you are riding in an automobile, just note the action of pedestrians. Is it any wonder that almost fifty per cent of the automobile fatalities are caused by pedestrians?

Of course, the pedestrian has some rights and he should exercise those rights. There is no right under high heaven that allows the pedestrian to cross in the middle of the block, to come from behind parked cars, or to lay-walk at corners. He takes his life in his own hands and is subject to the mercy of the automobile driver who does not see him and cannot control the pedestrian's actions. When we come to the realization that we must walk right and in the proper

place, then we will have an opportunity to make a big cut into the automobile fatalities in the nation. Walk in the manner and in the place where you are supposed to walk.

**English Rulers and Language**  
It was not until the reign of Henry IV that English became the native tongue of the kings of England. French and Latin were the languages used at court until the fourteenth century.

**Goliath's Height**  
The Bible states that Goliath, the giant whom David slew, was six cubits and a span in height. A Hebrew cubit is equal to 17.58 inches, and a span of 8.79 inches. Goliath, then, was nine feet, six inches in height.

## As Modern as an Airplane

A buggy is a vehicle that runs on four wheels, but there its similarity to the latest model automobile stops. So far as its outer shell is concerned, an Electric Range has much the same appearance as the old-fashioned cooking equipment, but again the similarity stops right there. It operates upon entirely different principles and contains features that cannot be duplicated by any other method, regardless of the efforts of imitators.

The Electric Range is a truly modern cooking machine that applies pure electric heat directly to the cooking operation. In this one respect, it is as different from all devices that use flaming fuel as is a present day airplane from the old balloon that floated over the fairgrounds.

The modern housewife desires the utmost in service, convenience, appearance, and economy. Measured by these requirements, today's Electric Range outclasses every form of cooking the world has ever known.

## MICHIGAN

for a safe and pleasant vacation

Among the many factors that combine to make Michigan an ideal vacation land is the work of our very efficient Michigan State Police.

Ours is one of the finest State Police organizations in the Union—well officered, well manned, well equipped. These public servants are of exceptionally high type—educated, trained, courteous. And they have accomplished much in making this State a safe and pleasant place in which to live or visit.

To vacationists, the work of the State Police is of special benefit, for members

of the highway patrol ever have in mind the safety of the traveling public. Moreover, they are equipped to direct the stranger, and to point the way to places of particular interest.

Friendly and well informed, our State Troopers do much to enhance Michigan's attractions for all who are in search of the perfect holiday.

## THE WISE BUYER KNOWS WHEN TO BUY TOO!

LOWEST BUICK PRICES EVER!

TAKE a look at the size of that Buick—watch it in flashing action on the highway—listen to the admiring comment that rises up on every hand—can there be any question as to what car you ought to buy?

Nor can there be any doubt as to when to decide on a Buick! The time is now! For there's plenty of ideal driving weather left. You'll be making many a summer and fall trip yet this season when you'll thrill to Buick get-up-and-travel, to Buick comfort and ease.

And if you buy while the buying's good, you'll get one of these handsome travel-

ers at an all-time low as far as Buick's prices go!

It's an actual fact—with all its action and life and thrilling behavior, the hundred-horsepower, valve-in-head straight-eight Buick SPECIAL now costs less in some models than certain sixes!

So why hold back? Why be content to be one of the crowd? Why put things off when such a stand-out buy as this is still waiting to be picked up at your say-so? If you haven't driven a new Buick, make arrangements to try one out right now! It's got what you want at a price that's nicely within your reach.

Centuries ago, moas were plentiful in New Zealand, for their bones have been found in caves and swamps all over the country. The mystery is why the moas perished, and when. Scientists say there is no doubt that moas existed when the brown-skinned Maori settled in New Zealand about the time the Norman kings were ruling England. It seems as if the moas were exterminated by the Maori hunters, perhaps centuries before the European explorers visited New Zealand.

WILLIAM A. FISHER, vice-president of General Motors and president of the Fisher Body Craftsmen's Guild, congratulates three of the winners in the model car design competition conducted by the educational Foundation, as Guild Secretary William S. McLean looks on. Left to right are, Mr. Fisher; Victor Cooper, 17 years old, whose model took second place in the senior division of the state-wide competition; Teddy Mandel, 14, first junior state and regional winner, who now becomes eligible to compete for the \$5,000 university scholarships offered as national awards; Mr. McLean; and Peter Wozoszyzna, 19, the first place senior winner for Michigan. The boys all live in Detroit. Other winners in the competition are from Lansing, South Haven, Ferndale, Jackson, Kalamazoo and Highland Park.

## OUR NEIGHBORS

MASON—Labor conditions, according to one faction, and exorbitant costs, according to another faction, have caused a change in the construction program of M-36 from Mason east through Dansville toward Detroit. According to spokesmen for the AFL teamsters and chauffeurs union, the state highway department took over the project so that an agreement between the WPA and the union could be terminated. According to officials of the highway department, the project was taken over so that the highway can be completed before 1945 and so that the cost can be kept somewhere within reason. —County News.

TECUMSEH—A truck and trailer, loaded with ice cream and owned by the Miller Ice Cream company of Eaton Rapids, were destroyed by flames at Tipton, shortly before noon, Wednesday. The fire started when an extra gasoline tank fell from the truck and was run over by the wheels. The flames spread rapidly that the driver, Harold Brunton was forced to leap from the cab. Residents of Tipton attempted to extinguish the flames but to no avail and then a call was sent to the local fire department. The highway, M-50, was blocked by the fire and smoke for nearly half an hour. —Herald.

BRIGHTON—The Argus publishes elsewhere the advertisement of the State Highway Commission for bids for the grading and paving of 4.07 miles of US-23 from M-59 or what is generally known as Lemen's corner, south to connect with the end of the paved section just north of Brighton. This will cut the unpaved part of 23 down to about 12 miles. —Argus.

BROOKLYN—Caretaker Slater at the Wolf Lake county park and bathing beach has cut a high water record notch on a wharf post. The lake level has descended 18 inches since the storm period which drove the Slater family from their nearby cabin with two inches of water over the floor. It is a record that will probably never again be equalled in this high-water-shed part of Michigan where the water breaks in all directions for the big lakes. —Exponent.

WILLIAMSTON—At special meetings of the stockholders of the Williamston State Bank and the Crossman & Williams State Bank held here Wednesday evening, stockholders of both institutions voted to merge the two into one financial institution in Williamston. It is reported that there were no dissenting votes among the stockholders of the Williamston State Bank although there were a few dissenting votes cast at the meeting of shareholders of the other institution. —Enterprise.

The lamps brought by the Pilgrims on the Mayflower were called "Betty lamps," from the German "besser," or better. They were iron, slot lamps of Dutch manufacture.

## IF WE ONLY UNDERSTOOD

Could we but draw back the curtains That surround each other's lives, See the naked heart and spirit, Know what spur the action gives, Often we would find it better, Purer than we judged it would, We would love each other better, If we only understood.

If we knew the cares and trials, Knew the efforts all in vain, And the bitter disappointments, Understood the loss, and gain, Would the grim external roughness Seem, I wonder, just the same? Would we help where now we hinder, Would we pity where we shame?

Ah—we judge each other harshly, Knowing not life's hidden force, Knowing not the fount of action Is less disturbed at its source, Seeing not amid the evil All the golden grains of good, Oh! We'd love each other better If we only understood.

## Skim Milk Adds to Profits for Pigs

Michigan's pigs that live on the farms of the more efficient farmers are enjoying skim milk and butter-milk diets this summer.

At least experiments conducted by the animal husbandry department of Michigan State College indicate profits in feeding fairly definite amounts of skim milk. At present, considering prices of corn and tannage, skim milk is considered worth 40 to 50 cents a hundredweight, with an additional return for labor involved in feeding the liquid.

Tests conducted at the college by V. A. Freeman of the animal husbandry department hold some hints as to the most efficient feeding of the skim or buttermilk.

Pigs on pasture drank up three to four pounds daily with efficiency. When they were compared with pigs getting all they wanted, the three pound limit proved twice as efficient. On dry, the most efficient rate was six to eight pounds of skim a day to each pig.

The college department found out some other facts worth money to hog growers. The milk was fed in the trough. Self feeders were used for feeding ground grain. This saved time. There is no objection to mixing ground grain with the skim milk, but neither becomes more efficient as a feed and the process takes extra labor.

Sweet or sour skim is approved. But don't change the diet back and forth, Freeman advises. The pigs get accustomed to one or the other and if shifted from sweet to sour or sour to sweet their stomachs become upset.

## Sheep Men Aided by Extra Feeding of Lambs

Extra feeding of lambs at this time of the year to supplement the pasture and frequent sorting of the flock in order to market animals of a desirable weight and finish is recommended by George A. Brown, head of animal husbandry at Michigan State College.

By marketing his lambs as fast as they reach around 80 pounds in weight and acquire a desirable finish, the flock owner may be able to avoid the lower prices which usually result with the influx of western lambs on the market. Indications are that the bulk of lambs in the country this year will be somewhat later in coming to market than usual, Brown says.

Where the best leguminous or green succulent grass pasture is not available for both lambs and ewes, then the lambs should be weaned at from 3 to 3½ months of age and placed on better pasture. The alfalfa or clover meadow from which the first cutting has been removed offers an ideal place for the lambs which have just been weaned, Brown suggests. No danger from bloat need be expected, he says, provided the meadow is dry and the lambs are full when first turned on fresh pasture, and also if there is an abundance of shade and plenty of water.

To help put them in market condition as soon as possible, the lambs should be started on oats, and after 10 days barley, corn or wheat added to the ration and increased in amount until the animals are receiving a mixture of equal parts of oats, corn and wheat or barley. The amount fed should be increased until the lambs are getting about 1 to 1½ pounds per head daily after three weeks on feed.

Whereas, said mortgage together with the note or obligation mentioned therein, was thereafter duly assigned by deed of assignment by the Ann Arbor Savings Bank to Federal Deposit Insurance Corporation, on the 14th day of February, A. D. 1936, which said assignment was thereafter duly recorded in the office of the Register of Deeds for Washtenaw County, Michigan, on the 15th day of February, A. D. 1936 in Liber 25 of Assignments on Page 204; and  
Whereas, the amount claimed to be due and unpaid on said mortgage at the date of this notice is the sum of Two Thousand Three Hundred Fifty Dollars (\$2,350.00) for principal, the sum of Eight Hundred Fifty and 87-100 Dollars (\$856.57) for interest, the sum of Two Hundred Seventy Two and 80-100 Dollars (\$272.30) for taxes for the year 1933, the sum of Twenty Seven and 51-100 Dollars (\$27.51) as interest on said taxes; and the sum of Thirty-Five Dollars (\$35.00) for an attorney fee as provided in said mortgage, making the total now due upon said mortgage the sum of Three Thousand Four Hundred Ninety and 80-100 Dollars (\$3490.38), reserving the right given in said mortgage to pay any or all unpaid taxes at any time before sale, and to add the amount thereof so paid to the amount secured by said mortgage; and, no suit or proceeding having been instituted at law to recover the debt now remaining secured by said mortgage, or any part thereof, whereby the power of sale contained in said mortgage has become operative;  
Now, Therefore, notice is hereby given that by virtue of the said power of sale, and in pursuance of the statute in such case made and provided, the said mortgage will be foreclosed by a sale of the premises described therein at public auction, to the highest bidder, at the southerly or Huron Street entrance to the Court House in the City of Ann Arbor, in said County of Washtenaw, that being the place where the Circuit Court for the County of Washtenaw is held, on Saturday, the 9th day of October, A. D. 1937 at nine o'clock in the forenoon of that day, which said premises are described in said mortgage as all those certain pieces or parcels of land described as follows:  
Lots number forty-three and forty of South Park Addition in the Township of Ann Arbor, Washtenaw County, Michigan, according to the recorded plat thereof, recorded in Plat Book number two on page 98. Subject to the building restrictions placed upon said lot as more fully shown in deeds recorded in Liber 202 on page 256; in Liber 198 on Page 231, in Liber 200 on page 6.  
Also, the north twenty-two feet of the east half of lot nine and the east half of lot number ten in block three south of Huron Street, range two east, according to the original plat of the Village (now City) of Ann Arbor, Washtenaw County, Michigan.

## SENATE KILLS COURT BILL

Votes 70 to 20 to Recommit . . . Elect Barkley New Majority Leader . . . Spanish War Enters Second Year

Senator Harrison (right) Congratulates Senator Barkley.

#### 'Glory Be to God!'

D-YING for weeks, the scheme to add to the number of justices of the Supreme court finally choked its last gasp and left this world. On a roll-call vote the United States senate voted to recommit the Robinson substitute for the President's original bill to the judiciary committee. The vote was 70 to 20, the most crushing defeat the President's legislation has yet suffered at the hands of a house of congress.

In an agreement made at a session of the judiciary committee earlier, it had been decided to let the opposition senators write their own bill, an innocuous measure for "judicial reform" not dealing in any way with the Supreme court. Senator Barkley, the new majority leader, attempted to save the President's face by having the bill left on the calendar, but he never had a chance. When the roll-call came, even Senators Ashurst of Arizona and Minton of Indiana, two of the Supreme court bill's chief supporters, voted to recommit.

"Glory be to God!" said Sen. Hiram Johnson (Rep., Calif.) when the results of the roll call were made known. The applause that followed from the senators and gallery alike left no doubt that the veteran from California had voiced the sentiments of the great majority.

#### Low Interest for Farmers

BY A vote of 71 to 19, the senate overrode the President's veto of a bill extending for a year low interest rates on loans to farmers. It was a defeat even more crushing than the recommitment of the court bill, and made the bill a law without the President's signature, for the house had previously passed it by a two-thirds majority over Mr. Roosevelt's veto.

Senator Barkley made a half-hearted attempt to stave off the overwhelming vote, and the defeat was accepted by many observers as an expression of resentment over Barkley's having been elected majority leader instead of Sen. Pat Harrison of Mississippi.

#### Barkley, 38; Harrison, 37

SEN. WILLIAM H. DIETRICH of Illinois changed his mind at the last minute and today Alben W. Barkley, hard-fisted, blustering senator from Kentucky, is the majority leader of the United States senate, succeeding the late Joseph T. Robinson of Arkansas. The vote was 38 for Barkley to 37 for Sen. Pat Harrison of Mississippi.

Vice President Garner

The conservative Democrats in the senate had been assured of 38 votes, enough to elect Harrison, on the eve of the secret election. But that night Dietrich, apparently under pressure from the Democratic party organization in Illinois, begged Harrison to release his pledged vote, in order that the President's choice might head the party in the senate.

The slim victory by no means patched the obvious party rift. Even the administration admitted that the President's Supreme court bill was virtually dead, even then. Vice President Garner visited Sen. Burton K. Wheeler of Montana, leader of the opposition forces, and invited the opposition, which it was believed had enough votes to recommit the substitute court bill to the judiciary committee, to draft a new bill.

President Roosevelt then told Senators Barkley and Harrison at the White House that four measures "must" be passed before the January session: The minimum wage, maximum hours and child labor bill; the new AAA and ever-normal granary bill; the Wagner housing bill, and legislation to plug loopholes

in the federal tax laws. Congress was all for quick adjournment, the President was told. The possibility of adjourning congress, then recalling it into special session in the late fall, with committees continuing to function in the interim, was then discussed, but what agreement had been reached was not announced.

#### A Citizen Takes His Pen

CRUSHING blow to the President's court program, delivered at the time it hurt most, was a letter written by

Gov. Lehman

Gov. Lehman of New York to Sen. Robert F. Wagner of that state. The letter, made public, revealed Governor Lehman's opinion "as a citizen of the state of New York" that the bill would be "contrary" to the "interests" of the people of the state. "Its enactment," the governor wrote, "would create a greatly dangerous precedent which could be availed of by future less well-intentioned administrations for the purpose of oppression or for the curtailment of the constitutional rights of our citizens."

#### Bloody Anniversary

THE Spanish civil war entered its second year. For the populations of rebel cities, the occasion was one for joyous celebration, with fiestas, bull fights and concerts the order of the day. Gen. Francisco Franco, commander of the insurgent forces, publicly proclaimed it a "year of triumph." He ordered that all communications and public documents for the next twelve months be dated as of "the second year of triumph."

In the first "year of triumph" more than a million persons, including women and children, were killed. The insurgents claim to have taken 34 of the 50 provincial capitals of the country, and all of its colonies. They have captured six of the eleven cities of more than 100,000 inhabitants: Seville, Malaga, Bilbao, Saragossa, Cordoba and Granada.

The rebels lost little time in attempting to regain their losses around Madrid. Franco unleashed the full power of his main army of 100,000 in a drive to recapture Brunete and other suburbs of the loyalist stronghold; they were met by at least 250,000 defending government troops. Every weapon of war except gas was used. There was hand-to-hand fighting in the trenches and the greatest use of artillery since the World war as the fiercest battle of the Spanish conflict raged. The battle was opened by a spectacular aerial fight as the world has seen in years; insurgents were reported to have lost 27 planes against only four for the loyalists.

If there were any definite gains made in a week's fighting, they were probably on the side of the insurgents, observers reported, although the government estimated the rebels had lost 10,000 men.

#### Japs Maul U. S. Women

ASSAULT upon two American women by sentries in the Japanese embassy in Peiping brought vigorous protests, both orally and in writing, from the United States embassy. The two women, Mrs. Helen R. Jones of Detroit and Miss Carol Lathrop of Washington, D. C., were walking through the embassy when sentries charged them from behind sandbag barricades. While one sentry kicked Miss Lathrop in the side, another held off Mrs. Jones with the flat of his bayonet. When the women were released they were roughly shoved. Mrs. Jones being forcefully kicked from behind.

#### Sino-Japanese Crisis

JUST after a verbal agreement between Chinese and Japanese military commanders had appeared to have prevented an impending renewal of the Sino-Japanese war, the Japanese government officially announced that heavy concentration of Chinese troops had been made at Peiping, constituting a direct act of aggression against Japan.

At the same time the Nanking government claimed that 17 Japanese troop trains, carrying 30,000 soldiers, were en route to North China from Korea and Manchukuo. Earlier, 12,000 Japanese troops were said to have arrived in North China to supplement the regular garrison of 7,000.

At Tientsin, Gen. Sung Chieh-Yuan, chairman of the Hopei-Chahar political council and commander of the Chinese forces in North China, had complied verbally with the Japanese ultimatum for peace, although he refused to sign anything. In a talk with Lieut. Gen. Kiyoshi Katsuki, the Japanese commander, he apologized for the clash between Japanese troops and the Chinese Twenty-ninth army at Lukowkiao July 7, the incident which precipitated the new crisis, and expressed the regrets of the Hopei-Chahar political council. He said that he would dismiss several of his officers as a punishment.

Gen. Sung assured the Japanese he would evacuate the area west of Peiping, and would do his utmost to suppress communism and anti-Japanese activities.

Part of the agreement was that both Chinese and Japanese troops should be withdrawn from the walled city of Wanpinghsien, suburb of Peiping. But Chinese troops refused to withdraw when they alleged, it became certain the Japanese had no intention of withdrawing, either. In the midst of many conflicting and confusing reports the outcome of any truce was problematical to say the least.

#### Europe Short on Grain

EUROPE began to worry about the possibilities of a hungry winter as early threshing indicated a serious grain shortage.

Germany's shortage was estimated at 3,000,000 tons. The deficit will be met partly with increased consumption of potatoes, and sugar beets, and partly with cheap, plentiful corn from southeastern Europe. It is expected, even so, that Germany will have to buy 1,500,000 to 2,000,000 tons from other foreign countries. Experts estimated that the German harvest for 1937 would be 10 to 20 per cent below the average for the years 1930-35.

Poland, from which Germany has been able to buy grain in the past, will not be able to sell any this year, while Hungarian, Rumanian and Jugoslavian crops will be smaller than last year, because of drought.

It was believed that if the current drought continued the farmers of Great Britain would likewise suffer; rainfall in the past month has been about one-fifth normal.

Of the Baltic countries only Lithuania, it is believed, will have a crop equal to her needs. Crops suffered badly in Latvia, Estonia and Finland. Only Spain, in all Europe, with an increase of 15 per cent over last year's grain harvest, appears likely to enjoy a well-filled bread basket.

#### De Valera Is Re-elected

IF HIS party, Fianna Fail, can keep in power that long, Eamon de Valera will be president of the executive council of the Irish Free State for another five years. He was elected to the nation's highest office by a vote of 82 to 52 in the dail-eireann (parliament). De Valera, in favor of severing all ties with Great Britain, won even the vote of the labor group, which does not endorse his party.

It was believed that De Valera would go ahead with legislation necessary to implement the new constitution approved in the plebiscite of July 1. He would in that case set up a senate and elect a president by popular vote, as the constitution provides. If De Valera is elected president, to serve seven years, political experts say he will virtually disappear from politics and his party will break up.

#### Static Wrecked Hindenburg

THE spectacular crash of the Zeppelin Hindenburg, killing 36 at Lakehurst, N. J., last May 6, was probably caused by an unseen spark of static electricity which jumped from the atmosphere to the frame of the dirigible. At least this is the theory of the board of inquiry which investigated the accident and reported to Secretary of Commerce Daniel C. Rogers.

The experts considered every other possible cause—fire, sabotage, brush discharge of electricity from sharp points on the ship, broken propeller blade, radio transmitter spark lightning and structural failure—and decided that their theory most nearly fitted the circumstances attending the disaster.

#### Inventor of Wireless Dies

GUGLIELMO MARCONI, who altered the lives of all of us when he invented the wireless, died suddenly of a heart attack at his home in Rome. He was sixty-three years old, had been in good health and was planning the construction of a new radio station in the Vatican at the time of his death. Premier Mussolini paid homage to the great inventor, kissing the dead man's forehead in reverence.
