THE FORD WAY OF DOING BUSINESS

The Ford Motor Company was founded by a working-man for working-men. Its present officers began as employees of the Company. It was the first company to pay a minimum wage, beginning in 1914, at the then astounding figure of \$5.2 day. That was double the prevailing wage of the time. The Ford minimum is now \$6 a day for all employees engaged in production work. And from that, the wages rise to \$10.80 a day, with the average wage \$7.25, exclusive of salaried employees.

The Ford Motor Company was the first large Henry Ford and Edsel company to establish the Ford keep daily per-B-hour day-also in 1914. sonal touch with all And the 40-hour week phases of Ford manuwas inaugurated by the Ford Motor Company in facture. In a conference 1926, years before any with his staff, Henry such laws existed. Ford often says "Go

ahead-I'll sit here and

represent the public."

The Ford Motor Company employs men without regard to race, creed or color. It is common knowledge that working conditions in

the Ford-shops are the best that science and constant care can make them. A square deal, a just wage and stabilized employment for a large proportion of our employees - and as fully stabilized for all as conditions will permit -enable our men to retain their personal independence.

In consequence of these policies the Ford Motor Company has one of the finest bodies of employees in the world. The larger proportion are mature men of long

service with the Company-sober, decent family men. Hundreds of them have been with the Company for more than 25 years - thousands for more than 15 years. Their health-record, home ownership and citizenship records are good.

All this is reflected in Ford products, whether cars, trucks or tractors. The work is honestly done. Materials are the best that can be made or procured. Less profit to the Company and more value

> to the customer is known throughout the motoring world as "Ford's way of doing business."

> Ford Motor Company was the first to make a motor car within the means of the average family-quitting the manufacture of what was then the largest_selling model in the world to do so. Its chosen field in all the 30 years since that

time has been the average American family - for which it has consistently provided car facilities which formerly only the wealthy could buy.

It is the policy of the Ford Motor Company to share the benefits of advanced methods and management with workers and public alike. Increased wages and employment over a period of many years have resulted in

A 300 per cent increase in the built-in value of the Ford car and a 75 per cent reduction in its price.

Memorial Day

From Revolutionary days until today the men of the United States have participated in its battles for freedom. On Me-

morial Day we remember their bravery, their loyalty to

country—we remember them with flowers. The silent.

fragrant beauty of flowers speaks the kindest remembrance.
