## Farmers Urged To Help With Weed Cutting on Roads

Six highway mowers began operations this week on county roads, according to Kenneth Halenbeck, County Road Commission Manager.

"This number of mowers for 1425 miles of highway or 2850 miles for both sides of the road, which should be cut, points out the immensity of the task to be attempted by the Road Commission," Halenbeck said. "The one-way mileage is approximately the distance from New York City to Los Angeles, and is over 300 miles greater than the distance from Ann Arbor to Portland, Oregon," he said.

"We will have to be satisfied with just the shoulder cut, if we can accomplish that," Halenbeck pointed out. "A noticeable upswing in the number of farmers who are cutting their own roadsides from fence to fence, has been evident each year and in several areas the local farm organizations have sponsored weed and grass cutting which admittedly enhances the appearance and value of their property."

A total amount received by the road commission to maintain the former township roads is \$58.00 per mile per year (approximately \$1.00 per week) and this is an undulating amount from a part of the gasoline tax collection. This very limited amount could easily be spent on mowing and brush cutting which would leave no funds for graveling, drainage, snow removal and other operations.

The Knights of Columbus held their annual election of officers on Wednesday, June 8. Bob Devine was elected grand knight; Dick Hara, deputy grand knight; Lehman Wahl, chancellor; William Detling, recorder; Duane Rowe, treasurer; Ben Staple, advocate; Steve Clark, warden; Leo Juergens, inside guard; Ed Beisel, outside guard; and Ken Schanz, trustee for the year.

The newly elected officers will be installed during the July 13 meeting.

The Knights of Columbus Scholarship award was presented to Donna Kaimbach during Class Night exercises on June 8. The savings bond award, given this year for the first time, will be presented annually to the Chelsea High School senior who is graduated with the highest academic record.

A like award will be granted to the eighth grade pupil of St. Mary's school who has shown outstanding scholastic ability.

PICTURED ABOVE with these members of the Park committee are 16 UAW-CIO workers who turned out last Thursday afternoon after leaving their work at the factory, and put in several hours of work on the Pierce Memorial park clean-up. Reading from left to right, those standing are David Mohrlock, Lambert Meypans, Chester Keezer, Dale Keezer, Hursell O'Dell, Harold Rowe, Elwood Keezer, Harvey Lixey, James Allan, Al. Mahar, Fred Harris; kneeling in front are Alvin Vail, Ross Munro, Gene Coltre, George Eder, Norman Elsemann, Lloyd Heydlauff and Walter Harper. Mohrlock, Heydlauff and Harper are the three park committee members. The others are all employees of the Federal Sewer Works. Park committee spokesmen said "they really turned out a lot of work in a few hours." Another helper present who did not get in the picture was Cynthia Paul, daughter of Dr. and Mrs. L. J. Paul. Committeemen say she earned the distinction of being the first girl to offer assistance on the park project. She helped pile brush and limbs to be burned or hauled away. There is still much to be done on the park site and volunteer workers, and plenty of them, are needed if the job is to be completed. Committee members were gratified with the fine turnout and the work accomplished by the Sewer plant employees and are hopeful that other groups will follow their example and lend what assistance they can. Work will be continued on the project this afternoon (Thursday).

## Will Vote on Sale of School Buildings

Elections are to be held at 8 p.m., Monday, June 27, in six of the 12 former primary school districts in this area which, with the Chelsea district, were reorganized two years ago to form the Chelsea Agricultural Schools district. The elections are being held for the purpose of deciding whether permission shall be granted to the Chelsea Agricultural Schools district Board of Education to sell the school buildings and any interest in the sites in these six former primary districts. The six school buildings in question have all been abandoned for some time, in some cases for as long as thirty years.

As long as the school buildings remain the property of the district, insurance and maintenance costs must be paid, which in the opinion of board members, is an unnecessary expenditure inasmuch as the buildings have been so long unused.

The elections in these former primary districts must be held because of a state law which requires that no property in any of the former districts may be sold within a five-year period after reorganization without the permission of 60 per cent of the former primary district electors present and voting at an election on such a proposal.

If permission to sell the buildings and the district's interest in the sites is given at these elections a time to receive sealed bids will be set at a later date.

Affected former districts, the names of the schools, places of election and chairmen of the elections are as follows:

District No. 11, Lyndon, Lyndon Center school, election at Lyndon Town Hall, Lawrence Shanahan, chairman.

District No. 12, Fr., Lyndon and Waterloo; McIntee school, election at the school, Earl Beeman, chairman.

District No. 14, Fr., Lyndon and Sylvan, Howe school, election in Study Hall at Chelsea High School, Lyman Walker, chairman.

District No. 5, Fr., Sylvan and Sharon, Merkel school, election at the home of Oscar Widmayer, chairman.

District No. 8, Sharon, Irwin school, election at the school, Donald Irwin, chairman.

District No. 6, Dexter, Stapish school, election at the home of Otto Goets, chairman.

In all cases the former board members of the former primary districts were asked to act as the election boards.

**LIMA CENTER EXT. GROUP**

The Lima Center Home Extension Group met for an afternoon meeting Tuesday, June 14, at the home of Mrs. Lewis Haselshwerdt with 17 members and two guests present.

Members finished the lampshades they had begun at a previous meeting, and then the hostesses served ice cream, fresh strawberries, cake and iced tea.

It was announced that the annual picnic will be held next month at the home of Mrs. Harvey Fischer at Four Mile Lake.

## New Paving Will Be Applied from NYC Railroad Tracks North to Village Boundary

### Federal, State Aid Cuts Village Share to One-Eighth Total

A new bridge on M-92 at the North Main street entrance to the village and pavement curbing from the New York Central railroad crossing to the bridge are to be realities here in the very near future, according to information received Friday by Village President M. W. McClure from State Highway Commissioner Charles M. Ziegler. Tentative plans call for a 44-foot bridge, built upstream some distance west of the present bridge, thus affording a wide, sweeping curve in the road from North Main street over the bridge and west on M-92.

The pavement on North Main street as tentatively planned, will also be 44 feet wide and will be completely finished with curbing and proper drainage structures.

Credit for securing this much desired and long-awaited improvement in the northern part of the village is given to Village President McClure who broached the matter to Commissioner Ziegler when he was in Chelsea for a Chamber of Commerce meeting last February 15. At that time the commissioner was taken on a tour of the roads north of the village and agreed with the village president that the bridge and the pavement of North Main street were definitely needed improvements. The commissioner said then that he would do what he could to bring about early consideration of the matter.

President McClure has carried on a steady correspondence with Commissioner Ziegler since then with the result that the project has now been approved.

Ralph Dibble, assistant to the deputy commissioner, chief engineer of the State Highway department, was in Chelsea six weeks ago and made a survey of the proposed project. On Friday, June 8, he was again in Chelsea and called on President McClure, advising him that the project was to be approved. Official confirmation and the necessary papers to be made out and filed with the State Highway department were received by Mr. McClure Friday, June 10.

President McClure immediately called a special meeting of the village council for Friday evening at which time a resolution was approved that the village request the State Highway department to proceed with the improvement of North Main street.

In a letter to President McClure several weeks ago Commissioner Ziegler stated that if the proposal for the new bridge and road improvement should be approved he was hopeful that the contract for the bridge could be let in October, but it now seems probable that the contract may be let earlier. If this proves to be the case work may be started early enough so that necessary surveys can be made almost immediately and all underground drainage structures for the pavement, as well as abutments for the bridge could be finished this fall. The bridge construction and the work of paving North Main street could then be begun as soon

as the weather permitted next spring.

President McClure was assured in a telephone conversation Friday with Ralph Dibble that the project will be completed in 1950.

Cost of construction of the new bridge will be paid by the state. The North Main street pavement is tentatively estimated to cost approximately \$50,000. Of this amount the federal government will pay one-half the state three-eighths, and the village the remaining one-eighth.

Breaking this down, Chelsea's share of the cost will be about \$6,000. Payment of one-fourth of this amount, or approximately \$1,500, must be made when work on the project is begun. The remainder is to be paid in three annual installments.

Improvement of North Main street and a new bridge at this point, have long been objectives of the community and former city officials have previously made attempts to have some action taken in regard to the matter. With improvement of the Werker-Stofer road and the proposed further improvement of M-92 north of here, the Chelsea approach became more of an issue than ever.

When Commissioner Ziegler was shown the condition of the highway and the bridge last winter he said he hadn't realized the need for improvement was so great. This part of the state was formerly in his charge while he was district maintenance engineer for the State Highway department in the 1920's. The bridge and road were then considered in fairly good condition in relation with other roads in this area.

## Vacation Bible School Opens with 95 Children Present

Mrs. Herbert Sanborn, director of Chelsea Community Vacation Bible school which opened its two-week session Monday morning, reported that there was a registration of 95 children on the first day. The primary group is meeting in St. Paul's church hall while the kindergarten and junior groups are in session at the Methodist church. Classes are being held each day from 9 until 11:30 a.m.

Mrs. Sanborn said Monday that she was pleased with the splendid response of teachers and helpers from the three participating churches and was very grateful for contributions of fruit made by local merchants. The fruit is used for lunches in the primary divisions.

The kindergarten group is served milk and cookies during the morning.

The theme for the Bible school this year is "God in His World." The kindergarten's special topic is "Let's Go Out-of-Doors," the primary's, "Exploring God's Out-of-Doors," and the juniors' "Discovering God in The Beautiful."

Mrs. Faye Palmer left Tuesday for San Francisco, Calif., where she will attend the graduation of her grandson, John V. Copren, from San Francisco High School. Mrs. Palmer expects to remain in California for a month.

A new bridge on M-92 at the North Main street entrance to the village and pavement curbing from the New York Central railroad crossing to the bridge are to be realities here in the very near future, according to information received Friday by Village President M. W. McClure from State Highway Commissioner Charles M. Ziegler. Tentative plans call for a 44-foot bridge, built upstream some distance west of the present bridge, thus affording a wide, sweeping curve in the road from North Main street over the bridge and west on M-92.

The pavement on North Main street as tentatively planned, will also be 44 feet wide and will be completely finished with curbing and proper drainage structures.

Credit for securing this much desired and long-awaited improvement in the northern part of the village is given to Village President McClure who broached the matter to Commissioner Ziegler when he was in Chelsea for a Chamber of Commerce meeting last February 15. At that time the commissioner was taken on a tour of the roads north of the village and agreed with the village president that the bridge and the pavement of North Main street were definitely needed improvements. The commissioner said then that he would do what he could to bring about early consideration of the matter.

President McClure has carried on a steady correspondence with Commissioner Ziegler since then with the result that the project has now been approved.

Ralph Dibble, assistant to the deputy commissioner, chief engineer of the State Highway department, was in Chelsea six weeks ago and made a survey of the proposed project. On Friday, June 8, he was again in Chelsea and called on President McClure, advising him that the project was to be approved. Official confirmation and the necessary papers to be made out and filed with the State Highway department were received by Mr. McClure Friday, June 10.

President McClure immediately called a special meeting of the village council for Friday evening at which time a resolution was approved that the village request the State Highway department to proceed with the improvement of North Main street.

In a letter to President McClure several weeks ago Commissioner Ziegler stated that if the proposal for the new bridge and road improvement should be approved he was hopeful that the contract for the bridge could be let in October, but it now seems probable that the contract may be let earlier. If this proves to be the case work may be started early enough so that necessary surveys can be made almost immediately and all underground drainage structures for the pavement, as well as abutments for the bridge could be finished this fall. The bridge construction and the work of paving North Main street could then be begun as soon

as the weather permitted next spring.

President McClure was assured in a telephone conversation Friday with Ralph Dibble that the project will be completed in 1950.

Cost of construction of the new bridge will be paid by the state. The

Just how high is  
 "HIGH  
 COMPRESSION"  
 ?

WHEN the talk turns to cars and car engines these days, that's a topic you hear much about.

So it's fairly interesting to note that, even back before the war, Buick engines like this one were touring the testing grounds with compressions as high as 10 to 1.

Even later than that this same big Buick power plant has been filling our engineers' notebooks with data on 8 to 1 compression ratios.

What has come out of this? Two or three interesting points.

First of all, that this big Buick Fireball valve-in-head straight-eight already has a compression ratio that

gets as much out of present fuels as any engine on the market.

Next, that these ratios can readily be stepped up to fit higher octane gasolines as they become available.

And probably most important of all, that high compression is only one measurement of a good engine.

There's the fundamental matter of engine efficiency—power output per cubic inch of displacement, engineers call it. On that score, Buick stands where it always has—just about tops in its field!

Which means, in very simple words—better go see for yourself.

The fun you get from your car—the pleasure and satisfaction it gives you—are best measured in just one place—behind the wheel.

So we invite you to see your Buick dealer for a firsthand test of Buick. Take it in your own two hands and find out how good it feels, how full of get-up-and-go.

It won't take long to make it pretty clear that the place to get your order in is the place where you get Buick power.

### Don't Fence Yourself In

Every spring, Handy Peterson and Easy Roberts patch up the stone wall that separates their farms. They walk along talking—Easy on one side, Handy on the other—picking up the fallen stones and putting them back.

Afterwards, over a friendly glass of beer, Easy says, "You know, wall-mending is a nice neighborly custom, but we really don't need that wall. We keep it up just because it happens to be there."

"Yes," says Handy, "a lot of walls and fences and boundaries keep on separating people for no

good reason. Maybe we'd all be better off if some of them were torn down, instead of kept standing."

From where I sit, Handy said a month ago, the "walls of intolerance" that people build up against each other, I like a temperate glass of beer now and then, you may prefer buttermilk—but that's no reason for me to criticize you, or you, me. Let's live and let-live together—making more friends and fewer "walls."

Leo Lingane, of Jackson, died  
suddenly at U. of M. hospital, Ann  
Arbor, on June 4, according to in-  
formation received here this week.  
The baby's death was caused by  
a foreign body lodged in the lung.  
The baby's father is a former

Lingane, who now reside in St.  
Petersburg, Fla.

grandfather, Roy Navarre, and a  
great-grandmother, Mrs. Kath-  
erine Navarre, both of Jackson.

and 14 years ago, with a number  
of associates, founded the Falls

outside of Detroit. Some of his  
associates in the business venture  
were his uncle, Thomas Mahoney  
and Harry Swanson, L. H. Heuer,
