Citizens who vote for the man, not the party, are being blamed for Michigan's current stalemate between a Democrat governor and a Republican administrative board...

Law enforcement officials, including sheriffs prosecuting attorneys and the State Police, have submitted recommendations to the legislature for tightening of criminal law procedure.

There ought to be a moral somewhere in this item: Detroit's municipal bus-street car system went \$47,000 into the red during March...

Also from Detroit comes a legislative bill to boost salaries of state supreme court justices from \$15,000 to \$25,000 a year and circuit court judges from \$8,000 to \$20,000 a year.

While the legislative taxation auditor-billed furiously Governor G. Mennen Williams quietly turned to his proposed crime commission and the possibility it won't meet approval in the state.

Now the majority of Detroit Bar association members have turned against the commission proposal—ostensibly because it would be an "ineffectual" citizen committee.

Approximately 11,000 men are now awaiting induction with 40,000 coming up shortly for pre-induction examinations.

The number of Michigan strikes has reached the nadir of the curve of the last 10 years. Eighty-one disputes were reported as against 713 in 1944-45.

CHS Baseball Team Tied for League Lead

Buddy Johnson Hurls No-Hitter Against Saline

By DWIGHT GADD Chelsea—High's diamond nine rolled up two more victories last week as they shut out Lincoln High's Railroaders, 5-0 Tuesday on the local field, and drubbed Saline on the Hornets' home field, 19-2, Friday, to run their unbeaten string to four straight.

Lincoln High's Buhl Flower pitched good ball also, but had trouble in the fifth when Chelsea scored all their runs.

In Chelsea's big inning, walks by Alfred Knickerbocker and George Heydlauf, singles by Marty Tobin and Stan Knickerbocker, and a booming triple by Jerry Lehman accounted for the five Chelsea runs. Lehman also slammed out a single to lead Chelsea's attack with two for three.

Line scores: R H E Lincoln 0 0 0 0 0 0-3 1 Chelsea 0 0 0 5 0-5 7 1 Buhl Flower and Neil Armstrong.

Marty Tobin and Stan Knickerbocker Buddy Johnson became Chelsea's second no-hit hurler Friday as he was wild but very effective while silencing the Saline bats for a 19-2 Detroit. Williams had asked that a waiver body be named to probe situations in the state.

Chelsa's scoring was too numerous to mention explicitly as everyone got a chance to play and the runs kept coming in every inning. Second baseman Ted Betts was the big stick for the game as he pounded out two triples, a double, and a single in six trips to the plate.

Line scores: R H E Saline 4 0 1 4 3 2-19 20 2 Chelsea 4 0 0 0 2 0-2 0 5 Tomorrow is an open date on the schedule, while next week is a road week for the team.

Barbara Lou Hafner, six-year-old daughter of Mrs. William Hafner, underwent an operation for the removal of her tonsils Monday morning.

BASKETBALL HONOR BANQUET—Last Thursday night Chelsea saluted its record-breaking basketball team of the past season with a banquet held in the High School gymnasium attended by more than 150 townspeople.

Telephone Company Will File for New Rate Increase

The Michigan Bell Telephone Company today joined the parade to abolish the nickel pay station call. Nicholas J. Prakken, manager here for the company, announced that 10-cent pay calls will be included in an application to be filed by Michigan Bell with the Public Service Commission May 14 for a rate increase to raise revenues 17 per cent, or \$22,000,000 a year.

Table with 3 columns: Class of Service, Present Rates, Proposed Rates. Includes Monthly Residence Rates and Monthly Business Rates.

Prakken said the rate increase is urgently needed to help the company meet the mounting costs of doing business, including higher taxes, wages, and costs of materials, and to assist it in providing the service the state will need during the national emergency.

Womans Club Observes 20th Anniversary

Event Marked with Dinner Program in St. Paul's Church

The Woman's Club of Chelsea observed its twentieth anniversary at a dinner meeting held in St. Paul's church hall Tuesday evening. Twenty-nine members and two guests were present and the guest speaker was Mrs. Leon Roach of Ann Arbor who told the story "Music on the Muscat-saut." Mrs. Roach was introduced by a past president of the club, Mrs. Philip Olin, now of Ann Arbor.

Club members opened the meeting by repeating "The American Creed" in unison and there was a short business session. Following Mrs. Roach's talk, Mrs. Warren Daniels, the club's first president, and Mrs. George Walworth, one of the charter members, took part in a little skit in which they reminisced about the club's activities since it was chartered in October 1931.

The Woman's Club was the originator of the rummage sale plan for raising money for its many philanthropic projects and at one time was able to care for two French orphans. Since so many other organizations in the community now conduct rummage sales, the club's proceeds from this project are considerably less.

The equipment for the asphalt-mixing plant was brought in by rail and was unloaded at the siding about a half-mile west of Chelsea where the plant will be set up and operated.

AFTER THREE MONTHS of the great debate over the troops to Europe issue, the senate has made a welcome agreement to debate little and vote often in an effort to catch up on some important legislation.

In the face of this senate action, the house is now dragging its feet on universal military training, despite the fact that every public opinion poll before, during and since the war has indicated that more than 70 percent of the American people favor universal military service.

One observer here remarked that during World War II, there was a great hue and cry because about 25 percent of the young men of America were deferred and thrown out in the draft because they were too stupid or ignorant and couldn't pass the mental tests.

In the meantime the Senate and house had time to hear President

Elsewhere in this newspaper, in accordance with state law, you will find a notice of Michigan Bell's intention to ask the Michigan Public Service Commission for a further increase in telephone rates.

What would YOU do about telephone rates if you were in our shoes?

Suppose you were managing Michigan Bell. Suppose that your job was to continue supplying the kind of telephone service that Michigan and the nation can depend on in these critical times.

Immediately, you'd run up against these inescapable facts:

1. To maintain the quality of service expected by the public, to provide improved service for many thousands of present users, and to meet the needs for new service in growing communities, your Company must continue to expand.

2. On top of that, the grim shadow of war demands that telephone service be ample for the giant job of national defense.

3. But the millions of dollars to finance this essential expansion and improvement of the telephone system must come from thousands of people who have savings to invest.

4. You'd find that Michigan Bell's earnings—the money left over after expenses are met—are far below the earnings of other businesses.

5. You'd realize that previous adjustments in telephone rates haven't caught up with the increases in the Company's cost of providing service.

6. As a public utility your rates are regulated by the Michigan Public Service Commission.

Faced with those facts, what would you do? Sit back and do nothing... stop adding facilities... get along as best you can with what you have and let it go at that?

Of course you wouldn't. Even though you'd rather not ask your customers to pay more for their service, plain horse sense would tell you that you should apply at once for increased rates to make your Company's earnings adequate for the job that has to be done.

And that is what Michigan Bell is planning to do

Telephone wages versus telephone rates 1941-1950

Revenues from increased telephone rates have gone up 21% while the cost of living has gone up 84%.

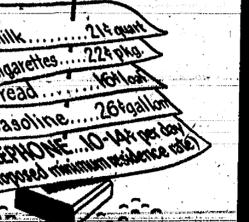

Size of "telephone package" is larger—more telephones can be reached without a toll charge.

Average worker earns enough to pay telephone bill in one-third less time than it took in 1940.

For most residence customers, the increase needed is less than 3c a day.

Telephone service would still be one of the cheapest things in the average family budget.

Higher costs inevitably mean higher prices, and the cost of furnishing your telephone service keeps on going up. From where I sit... by Joe Marsh

You've Got To Hand It To Sandy
 Sandy Johnson's wife "Tiny" suddenly asks him at breakfast the other morning "Why don't you build me some bluebird houses?"
 "What for?" asks Sandy. "Why for bluebirds, of course" says Tiny. "We always had 'em at home when I was a girl. May sound silly—but I sorta miss 'em."
 Well, I know how busy Sandy's been lately and the thought of taking time out to build birdhouses could have made a lot of men blow their top. But not Sandy. He says, "No, Tiny. It doesn't sound silly. I think it's a wonderful idea—we're going to have bluebirds—and I'm starting on some birdhouses tonight."
 From where I sit, we could do with more understanding people like Sandy—and Tiny, too. He respects her likings, and she respects his. He likes a temperate glass of beer now and then—and although Tiny sticks to coffee, whatever Sandy likes is O.K. with her. They live and let live—and that's why they live so happily.

"Smart Buy's Roadmaster"

It started the day the 1951 ROADMASTER made its first appearance—and has been building up ever since.
 Folks looked at the fresh new styling—the power—the features—the fabrics—the cloud-soft cushions—and the prices—and said, "Here's the smart buy in the fine-car field."
 Why don't you come and see for yourself what a sensational buy this proud beauty really is?
 It's a honey to handle—a joy to ride in—and just about the handsomest thing on wheels.
 It has room, and poise, and a level-going gait that comes from coil springs front and rear.
 There's a triumphant thrill in the willing obedience of its Fireball power and the luxurious ease of its Dynaflow Drive, which doesn't cost you a penny extra.

There's a sweeping view fore and aft through broad and uncluttered glass areas, and the new clarity of an instrument panel with high visibility at night.
 Even the brakes are new, self-cooling, with a grip that takes hold like steel fingers in a velvet glove.
 Here indeed is a car that is fine in bearing, in action, and in the precision of every structural part—a ROADMASTER custom built by Buick. When will you try one as our guest?
 Equipment, accessories, trim and models are subject to change without notice.

WOLVERINE Shell Horsehides dry out soft—stay soft—because they are tanned that way by the secret Wolverine tanning process. Cost less to wear on any job—farm or factory—because they wear longer. You save time when you call by number

You'll save yourself time, these busy days, by keeping a list of the numbers of the out-of-town telephones you call most often.
 When you call by number, the Long Distance operator doesn't have to take the time to get the number from Information so your call goes through faster.

That means better service for you—and better service for all America, right now when telephone lines are carrying urgent industrial and military calls.
 P. S. When you don't know the out-of-town number, why not jot it down when the operator gets it for you. That way you'll have it handy the next time you call.

Invest in America's Future Leaders

Report from Washington

By Congressman George Meader

Washington, D. C.—An affirmative American foreign policy by which the forces of freedom and self-government can assume the offensive in the world-wide combat with the ideology of totalitarianism and slavery is proposed in a bill which I introduced in the House of Representatives on Monday, April 23.

This bill provides the means by which our government could take the lead in a movement among the nations of the earth to develop the natural resources of underdeveloped areas through effective utilization of the creative power of individual enterprise and initiative.

It proposes the establishment of a bi-partisan commission on Aid to Under-Developed Areas, whose duty it will be to identify and destroy or minimize the artificial barriers now preventing natural economic forces from developing these resources.

The objective of this program was espoused by President Truman in his last inaugural address, in which he announced "a bold new program" which has come to be known as the "Point Four program." This bold new program has merits and advantages not previously emphasized.

Historically, the imperialistic aggressor has expanded his rule first against the weak and unprepared. Underdeveloped areas are vacuum areas into which the force of ambition and ruthless power has a natural tendency to rush. Infusing strength where there has been weakness will discourage the imperialistic aggressor and minimize the likelihood of wars of conquest.

It is important that we should assume the offensive in the ideological combat with Communist totalitarianism through the demonstration, by performance, of the economic advantages of the free enterprise system. One ounce of action will outweigh tons of oratory and propaganda.

The weakness of our defensive policy of containment of Russian Communism is that we can never win while we are on the defensive. It leaves the initiative in the hands of our opponent and requires us to be prepared to meet his next moves on a hundred fronts. No football team ever made a touchdown with the ball in the other team's possession.

The potential of free competitive enterprise cannot be unleashed until the roadblocks and barriers are broken down. Thus far they have withstood attacks upon them. These problems have thus far defied solution.

The proposed Commission on Aid to Under-Developed Areas is a study commission, not an operating commission. We first must determine what our policy and our program should be, before creating agencies to carry them out.

It is bipartisan because a program of this character cannot be successful unless it is enthusiastically supported by both political parties and by the general public. It is fact-finding powers because, unless its study penetrates below the surface of emotional generalities little that is worthwhile will be accomplished. Its activities should be conducted publicly so that the program which emerges will be completely understood by the American people and thus receive their support.

The most statesmanlike and best informed persons in the country must be enlisted for the membership and staff of the Commission.

Creation of the Commission is necessary for the following reasons:

First, no agency or department of the Executive branch of the Government has demonstrated any initiative in this direction, although there has been nothing to prevent its broken down. Thus far they have withstood attacks upon them. These problems have thus far defied solution.

Second, the Congress has not developed its investigative function sufficiently to insure a successful attack on a problem of this scope. Third, the American people should have a part in formulating a program in which the vigor of their voluntary action will determine its success or failure. The general public would have dominant representation on this Commission.

The suggested agenda for the Commission includes: Formulation of plans to provide against expropriation of property, double taxation, and discrimination against non-nationals; free exchange of currencies; promotion of equality

of opportunity for competing business enterprises, and prevention of monopoly and restrictive trade practices; correlation of existing programs in international economic activities; assembling of statistical and scientific information to aid private capital in mining, agriculture, transportation, finance, communications and other investments; and promoting self-liquidating international public works as aids to production and commerce.

This is a new program and, while it may ultimately make unnecessary certain existing agencies, it is not a substitute for any present national policy.

The Point Four program as it has existed for the past two years has amounted to little more than a technical assistance program designed to better the lot of underdeveloped areas through sanitation and public health services and agricultural methods.

Important as this may be, the Point Four program will be of lasting significance only if it utilizes natural economic forces for the mutual benefit of the occupants of underdeveloped areas and supplies the energy, enterprise, initiative, capital and knowhow necessary to develop the natural resources which exist there.

Government aid for this program on a purely charitable basis, would be likely to be temporary and superficial. Government investment in speculative foreign enterprises would be contrary to our traditions and out of harmony with our free enterprise system. Expanded
