Social Service  
Committee  
Aids Needy

Many individuals and organizations of Chelsea included in their Christmas plans, thoughts for those less fortunate than themselves and are hoping that through their efforts all families in need in the community were remembered with some of their most desperate needs.

A committee, working under the sponsorship of the Woman's Club of Chelsea, planned the coordination of Christmas giving so that all in need might be remembered.

The cooperation of groups and individuals with this Community Social Service committee brought very satisfying results, committee members stated. The group acted as a clearing house for contributions and requests for help.

Twenty-four organizations and individuals remembered 15 less fortunate families. These included 82 individuals who received fuel, clothing, food and toys as needed. These items were obtained by means of used clothing and toy collections, contributions of money and gifts of hand-made toys, food baskets and fuel.

Committee workers stated that the response from local individuals and groups was gratifying and it is their hope that the newly formed Community Social Service committee can be a continued service to Chelsea and vicinity.

Prakken said the payments were based on a school census of 800 in Chelsea and 23,800 in Washtenaw county, as compiled by the State Department of Public Instruction. The company's total tax allocation this year, largest on record, amounted to \$4.40 for each of the 1,490,000 youngsters in the state between the ages of 5 and 19 who are on the census rolls.

Michigan Bell is the largest single contributor to the Primary School fund. In common with railroads, Pullman, railway express, telegraph, and other telephone companies, Michigan Bell pays a state property tax earmarked for the Primary Fund in lieu of other property taxes.

Heavy Snowfall  
on Christmas Eve  
Nearly Buries Area

Sleet and freezing rain, predicted for late afternoon Christmas Day, did not strike Chelsea, but another heavy snowfall which began about 11 o'clock Christmas Eve and continued until 11 o'clock Christmas morning added about seven inches more to the amount that has been accumulating the past two weeks.

County road crews worked constantly in an effort to keep roads open and main road traffic was kept moving. There were numerous reports of cars going into ditches and in the village itself, cars getting stuck in streets and driveways.

Temperatures ranged from 17 to about 22 degrees during the day.

Michigan Bell Property Tax Paid into School Fund

The Michigan Bell Telephone company today revealed that \$3,500 of its state property tax this year was allocated to the public school system of Chelsea.

N. J. Prakken, manager for the company, said the amount was Chelsea's share of Michigan Bell's total tax contribution of \$6,682,000 into the state's Primary School fund.

Schools throughout Washtenaw county, including Chelsea, received a total of \$106,700 from the company's tax payment.

Prakken said the payments were based on a school census of 800 in Chelsea and 23,800 in Washtenaw county, as compiled by the State Department of Public Instruction. Trees Offered  
to Farmers  
for Planting

Farmers in southern Michigan should act now to take advantage of the Michigan Conservation Department's offer to aid farmers interested in planting trees and shrubs for wildlife.

According to county agricultural agent Donald R. Johnson, the planting stock offered without charge includes pines, spruces, multi-trunked, highbush cranberry, coralberry and others.

The county agent points out that, at the request of the landowner, a farm planner from the Conservation Department will inspect wildlife. The planner's recommendations generally tie in with soil and water conservation practices. Trees and shrubs may be planted on eroded hillsides, in gullies, along pond or marsh borders or along edges of woodlots.

Southern Michigan farmers who would like to take part in the program may get additional information from Don Johnson, whose office is in the Court House, Ann Arbor.

Cut-Back in Civilian  
Goods To Be Offset  
by Military BuyingWar with Russia  
Not Seen Probable  
During New Year

By ROGER W. BABSON

1. Excluding defense orders, the total business volume in 1952 will be less than that for 1951. However, national income in 1952 will be very high as war orders will take the place of peace production.

Government Controls

2. The outstanding feature of 1952—barring all-out war—will be the presidential election on Nov. 4, 1952. I comment further upon this under paragraph 48.

3. The administration and its economic advisors appear firmly convinced that radical inflation is about to break out next year. But the "brain trusters" are overlooking the fact that the boom is already old and that it is creaking badly when the Korean war broke out. The date of the slide has only moved ahead.

4. Farm income will continue high in 1952.

5. As 1952 wears on, the effect of controls, increased taxes, and high prices will cause a decline in legitimate business. Civilian production declines too much, the public may then cry, "This is a government-made slump; let's change the administration."

6. If in 1952 it becomes evident that business is declining too much as a result of government curbs, the planners at Washington will rush their patient into an oxygen tent.

Labor Outlook

7. Many labor groups will be successful in getting another round of wage increases in 1952. Although there may be more important strikes in the first part of 1952, there should be a decline in work stoppages in the last half of the year.

8. Tightness in the labor supply will continue through 1952, particularly of highly-skilled workers. Wages of such workers will be advanced voluntarily in order to hold them.

9. The Taft-Hartley law will not be repealed during 1952, but may be amended. The administrators of the law will continue to wink at some of its clauses.

Commodity Prices Will Remain Firm

10. Wholesale prices of many commodities will suffer a mild decline in 1952 when compared with the price level for Dec. 31, 1951. In some lines the drop may be quite steep from the high levels of 1951. Retail prices for 1952 will hold steady.

11. Commodity speculation for a rise will not peak in 1952. Furthermore, our expanding stockpiles of strategic materials present a real price threat in the event of a peace scare. Such stockpiles could then act strongly as a depressant on prices. Wise merchants will operate with only a conservative inventory.

12. The cost of living will remain high during 1952. This prediction recognizes that living costs next year may continue above the lower levels that existed during the first half of the year now closing. I also predict further rises in freight and passenger rates.

Farm Outlook Good

13. Congress will not take any action during 1952 to legally bolster so-called Fair Trade price maintenance. It's too risky politically when consumers are complaining about the cost of living. But, some manufacturers will tighten up on distributors, eliminating those who won't sign Fair Trade contracts.

14. Barring crop failures, the total supply of food available should be larger in 1952 than for 1951, since the government will raise planting quotas as part of its attack on inflation. If the weather is extremely favorable, the government will be asked to give away surplus crops.

15. With prospects good for a rising supply of feed grains, most meat should be more plentiful next year than in 1951. Prices for beef, however, will be held up by high wages and military needs.

16. The burden of federal taxes, both corporate and personal, will

not be increased again during 1952 above the advance late in 1951. State and municipal taxes, however, will go higher again.

17. The above forecast is based on the assumption that unless Stalin starts World War III during the early months of 1952, he has made up his mind to forget World War III until the United States and our allies again "go to sleep," which may be some years hence. We give this as a definite prediction as to the outlook for World War III.

18. There are three ways of preventing inflation: (1) increased production; (2) decreased spending; and (3) as a last resort, increased taxes. I forecast that the current exploitation and accompanying fear of inflation are not yet at their peaks for this business cycle.

19. States and municipalities will again be under pressure to find adequate sources of revenue. Further increases in sales taxes by states and municipalities can be looked for next year.

20. There will be no increase in "luxury taxes" during 1952.

Domestic Trade Uncertain

21. Credit curbs will continue to hold down the demand for automobiles and certain household equipment. Completions of fewer dwellings will also act as a damper on furniture sales.

22. Falling demand for hard goods should stimulate the public's spending for food and lower-priced soft goods.

23. The above trend forecast will mean a decline in department store volume. I predict a rise in the sales of variety and drug chains.

Foreign Trade Outlook

24. I believe that armament is to become a new and permanent industry, at least for many years to come. Airplanes, tanks, artillery, guns, and munitions will constantly be replaced as they become obsolete. This new activity will operate much as the automobile industry has operated. I forecast that this will be more and more recognized throughout 1952.

25. Barring new war developments, I look for continued shrinkage in our civilian exports during 1952. Imports, however, may rise further. Exports to South America will be off. Total foreign trade should not be changed much, but the exporters will be on the short end of this business with the importers gaining.

26. Except for war supplies, it will become more difficult to convince Congress that additional heavy credits should be granted abroad.

27. Many domestic manufacturers will feel increasing competition from foreign merchandise. A cry for increased tariff protection will be heard; but no radical tariff legislation will result.

More Deficit Financing

28. The first quarter of 1952 may actually see a budget surplus as a result of high national income and increased taxation. But, a federal deficit will surely arise during the balance of the year.

29. Government loans will gradually increase during 1952 and there will be some strengthening of basic interest rates.

30. Government bonds will continue to be held tightly between the floor of Federal Reserve support purchases and the ceiling of Federal Reserve anti-inflation sales. Under such conditions, price changes should be negligible during 1952.

31. While Canada and South Africa have permitted "free markets" or revaluation of gold, because of increases in costs of production, the administration is still opposed. The gold stock of the United States is, however, likely to be revalued upward when the nation, in the opinion of government economists, "needs another shot of inflation." This will not be in 1952.

Stock Market and Bond Outlook

32. Until the danger of war is past, wise people who can easily do so will move out of large bomb-vulnerable cities and avoid having investments in such areas.

33. Sometime during 1952 stocks will sell lower than current quota. (Continued on page six)

**THIS FAMILY IS THANKFUL**  
For the Robert Johnson family, nine of whom are tuberculosis victims at Maybury Sanatorium, Christmas wasn't a day to look forward to. They couldn't even exchange words of greeting to each other, that is, not until Dr. W. Leonard Howard and members of the rehabilitation department put their heads together and came up with the idea of allowing the patients to broadcast messages to their loved ones. -24

Many of the adult patients have children in other units and haven't exchanged words with them since they came to the Sanatorium. For them the men's sound of each other's voices was a priceless gift, which cannot be measured by material values. Their words were broadcast over the Sanatorium's own station, WHMS—Northville Record. -24

## Babson Forecast...

(Continued from page one)

tion. This applies especially to oils and certain "blue chips." 34. Stocks now in the best position for 1952 should be many of those that have not been popular as inflation hedges in the past months. I like good chain variety store stocks, certain movie stocks and possibly the air-transportation issues.

Investment trust funds, pension funds, and insurance companies may provide an excellent backlog of demand for sound income stocks where good values can be demonstrated.

36. Successful investors of 1952 will be those who have the patience to follow a carefully planned investment program. Such a program will emphasize diversification, not only by company and industry, but also by quality and cash.

37. Highest-grade taxable corporate bonds should hold in a narrow price range during 1952, but I see no reason for individual investors to buy them unless they are convertible.

38. With present high income taxes, tax-exempt bonds should continue in good demand. Investors should see to it that their bond maturities are carefully diversified, with some part of their bond funds maturing each year. As there usually is not a good market for tax-exempts when an estate is liquidated, it is wise to hold only such bonds as will mature the time of one's probable death.

Real Estate Activity 39. Much of the recent real estate boom was the result of easy credit, almost nothing down and small payments for years hence. Under the recent legislation there will be fewer small homes built in 1952; but some credit restrictions will be modified. Mortgage money should soon be had on more liberal terms.

40. Non-essential commercial building will be hit in 1952
