State-Wide Tid Bits

**Lack of State funds won't cause schools to close—not yet, at least.**  
The legislature, last week, finally agreed to move forward to May 15 the due date for corporations to pay the state income tax. This will permit the collection of \$55,000,000 early which can be passed on to the schools. Since many large corporations previously indicated they would not object to paying the tax now instead of Aug. 31, the move is expected to bring in \$15,000,000 at once. Penalty provisions for late payment were substantially softened so that corporations would not be unnecessarily pinched by the date change.

**In the third month of sessions and with little accomplished to date, members have an eye on adjournment and how they can plan strategies to take advantage of remaining time.** Bills have been introduced in both houses to set May 22 for the final session. Under the present system, all bills must be submitted 60 days earlier to allow time for printing and study. Exceptions are made for revenue and appropriation proposals or new bills that have general consent.

**Main reason little has been done about new tax rules, observers say, is the approach of spring elections.** Both Republicans and Democrats are anxious to clean up the state's financial troubles, are even more concerned with political implications.

**Neither party wants to give the other any political advantage by taking action which, though sound from a legislative standpoint, might alienate segments of the voting population and give opponents an opportunity to cash in with votes.**

**A good example of such contention is the nearly forgotten income tax report disclosed Feb. 16 after six months of hard work by nationally known tax experts. The recommendations called for no new taxes but a redistribution of present monies and constitutional reduction of the present earmarking of funds. Many legislators agree with the proposals, but they will also tell you it hasn't a chance, except possibly as a long-range goal.**

**For one thing, the present distribution provides many rural legislators with a steady income. For example, differences exist as great as 100% in state aid payment to counties of similar wealth; one city receives 80% of its total receipts, while three get less than 10%.**

**Republican rural legislators would be in the position of favoring a plan that would result in less state aid for their home areas. The most idealistic politician would think many times before he put himself in this position.**

**Democrats, on the other hand, cannot afford to be put in a spot where people think they prefer to capitalize on the deficit than help to solve it. They finally decided to ease financial pressures by agreeing to early collection of the corporation franchise tax.**

**Taxation committees this week were grooming an alternate source of new revenue, three bills: (1) Corporation profits tax, (2) manufacturer and wholesaler gross proceeds tax, and (3) business income tax. One of these bills is likely to emerge from the legislature after the April election, as the solution to the state-treasury deficit.**

**In the meantime, the corporation franchise payments will permit Auditor General John Martin to OK checks to local school systems for \$23,000,000 this month. This is the total of expected corporate fees plus current shares of sales taxes. Mr. Martin figures the state will owe school systems \$24,000,000 by the end of the fiscal year, June 30. This amount he hopes to offset early in July with an advance distribution of \$28,000,000 to the schools.**

**The state still faces, however, a deficit of some \$55,000,000 and, sooner or later, probably later, must find a way to return to solvency.**

**Among other bills and proposals in various stages of consideration by the legislature is one which would eliminate indeterminate sentences where a man is given 10-15 years. These were listed by Jack-**

## U. of M. Visiting Officials Report on School Findings

A visit to Chelsea high school was made on Dec. 22 by Professor John V. Field, consultant in Journalism, Kenneth E. Vance, senior Extension librarian, and Kent Leach of the University of Michigan. The purpose of the visit was to determine the school's status of accreditation with the North Central Association of Colleges and Secondary Schools.

This visit was made before the elementary pupils moved to the new school and some of the former elementary rooms are now being used for high school classes.

The group's findings were summed up in the following self-explanatory letter:

Mr. John Griffin, Chelsea High School, Chelsea, Michigan:

Dear Mr. Griffin:

We observed that many improvements must be made within Chelsea High school if it is to acquire the three-year accreditation rating. In fact, some of the existing conditions place the two-year accreditation rating in jeopardy.

Suggestions for improvement are:

1. Plans for building should be made because: (a) Predictions for future enrollments indicate that more rooms will be needed. If plans are not made now a hit and miss proposition will result in the effort to accommodate incoming students. (b) A full-time instructional office is needed for the present one is inadequate. (c) The shop should be enlarged and its facilities improved so that the boys can have a good course in metal work, machine shop, auto mechanics, and farm shop.

2. A physical education program for boys and girls is needed. Various sports are important but can only be considered as a substitute for a diversified physical education program.
3. A hot lunch program should be initiated.
4. Full-time clerical help should be obtained for the principal. Without full-time clerical help records cannot be kept up to date.
5. The area of guidance needs attention. The cumulative folders do not have all the information that they should contain.
6. The library facilities need improvement. The collection of materials should be enlarged and journals of comment to be used by college preparatory students should be added.
7. The homemaking room should be modernized.
8. The new school needs lockers and storage space.

Some of the above items were brought to your attention two years ago, and have not been taken care of. You and your superintendent have made plans to alleviate many of these conditions, but the board of education must give its support. In our estimate Chelsea has an evaluation sufficient to receive a two-year rating.

## Tom Smith Closes Red & White Store

Thomas Smith, who had been the proprietor of the Red & White grocery store here for almost 18 years, sold his stock of groceries and closed out the business as of Saturday night.

He and Mrs. Smith plan to remain in Chelsea but have made no definite plans for the future except to take a rest for the present.

## Sammy Misalledes Draws News Notice

Sammy Misalledes was singled out for favorable comment in a newspaper story about the Tucson Cowboys, the baseball team on which he was recently signed as a pitcher. It was pointed out that Sammy, a right-hander, "will bear watching," the story also cited his high school record of 8-0 last year as well as his three no-hit games in four seasons of play on the Chelsea High school team.

In a letter to his parents, Mr. and Mrs. Mike Misalledes, he said he was getting along fine.

## ENTERS MILITARY SERVICE

The Chelsea Fire department made three runs in as many hours Tuesday afternoon, two being caused by grass fires and one being a rubbish fire which was mistakenly thought to be a burning building at Cedar Lake road.

The Cedar Lake run was made shortly after 2 o'clock.

At 3:15 the firemen were called to the Harold Craven property on Elm street because of a grass fire and at 4:15 to the Mabel Hoppe property at Cavanaugh Lake road and Garvey road.

Approximately two acres burned over on the Hoppe place.

## Kiwanis Wins Major Award for Voting Campaign

Anton Nielsen, president of the local Kiwanis club, in a letter from Kiwanis International headquarters in Chicago, was advised that Kiwanis International has been awarded the Freedoms Foundation George Washington Honor Medal, as well as a major prize from the American Heritage Foundation for its national non-partisan registration and vote campaign, "Ballot Battalion."

These awards were won by Kiwanis International in competition with hundreds of entries to the awards juried by the Freedoms Foundation of Valley Forge, Pa.

Both organizations are non-political, non-partisan and actively work to promote more personal participation in citizenship and furthering of the American way of life.

The "Ballot Battalion" program of Kiwanis International was aimed at coordinating the efforts of all local civic, professional and fraternal groups in every Kiwanis community throughout the United States in an all-out, non-partisan, "get out the vote" campaign.

**News and Notes from Saline Hatchery**  
Dear Folks:

This is about the time of year when a lot of good folks will be heeded out of some very good money on baby chicks. You will get some advertising both over the radio and the press offering chicks at ridiculously low prices such as \$3.95 per 100 chicks. If you notice those ads you will probably sense that they do not guarantee either sex or breed of such chicks.

We at Saline Hatchery, and I am sure any other local hatchery, would be very happy to take such orders ourselves for \$2.50, 100 and you can come and get them yourself without the hazards that go with shipping chicks. But I will tell you in advance that they will be Leghorn Cocks. Why pay more when you can get them cheaper right here?

Then another stunt is illustrated by the experience of one of our old customers last year. Some folks came to his farm during the time of a shipping strike with a load of white chicks claiming that they were White Rock Pullets that had been ordered but could not be shipped due to the strike and they had to sell them out at \$10.00 per 100 in order to move them. He bit. They grew up to be Leghorn Cocks and he would gladly have sold him at \$2.50 per 100.

I know about these rackets because I have had an opportunity to sell our surplus Leghorn Cocks to some of these brokers doing this type of business. We do not want any part of it.

If any of you want Leghorn Cocks, just call us on the phone. In fact we will sell you 100 Leghorn Cocks and one hen lamp for brooding them which costs \$1.00, all for \$3.00 total.

Don't be a sucker. We at Saline Hatchery cover your business, but if we don't like it, there are other good reliable hatcheries right here at home that will give you a square deal on all of your chicks and poultry needs.

Very truly yours,  
Art Hagen,

## Beaver Controversy in Michigan Subject Of Study by Wayne U. Biology Students

Inspecting a mounted beaver and a typical beaver-cut tree trunk and chips are Wayne University coeds Marilyn Hilborn of Grand Rapids (left) and Alice Mori of Lansing.

Much has been said and written—mostly untrue—about the remarkable feats of engineering performed by the Castor canadensis michiganensis—Michigan beaver. This rodent played an important part in the early exploration and settlement of North America including the State of Michigan.

Biology students at Wayne University in Detroit have been "busy as beavers" studying some curious facts about this animal. Although beaver spend much of their time in the water, they are strict vegetarians. Their diet consists of everything available in the way of twigs and bark. In Michigan, beaver are particularly fond of the twigs, leaves and bark of the aspen.

Beaver skins were at one time exchanged as stable currency over half the continent. The long exploitation by fur trappers and traders, however, brought about the necessity for an extended closed season.

Michigan beaver trappers in 1920.

There has been some controversy as to the desirability of this animal in Michigan's wildlife conservation program. Many pro-beaver advocates maintain that beaver do not destroy anything of value and that protecting them improves fishing, conserves water and generally aids in the wildlife and conservation program.

However, those with less sentiment for the "hardworking beaver" and a more factual point of view claim that this animal should not be protected because it causes the blockage of streams, hinders the migration of fish, floods out forests and shade trees in recreational areas.

Under Michigan conditions, a beaver cuts an average of from 200 to 300 trees per year. Not being the keen foresters many people think they are, beaver waste a considerable proportion of their work by falling one tree into another or, what is more common, by falling to utilize the trees they cut. They destroy a lot of small growth as well as large timber. White birch, small Norway pine, small maple and tamarack are cut by beaver when in need of material for a dam.

Second growth of cedar spruce, balsam and tamarack is prevented in the areas flooded by beaver.

Beaver dams located at the outlets of large lakes and streams conserve these waters only temporarily. When rainfall is low in the area of the small streams and lakes, the dammed-up water becomes dirty, discolored, and stagnant. Beaver then look for more water.

The extent of the beaver's influence, good or bad, upon an area depends on the local conditions—the nature of the stream and surrounding environs. Dr. Cresser says:

## Unusual railroad cars do big jobs on New York Central

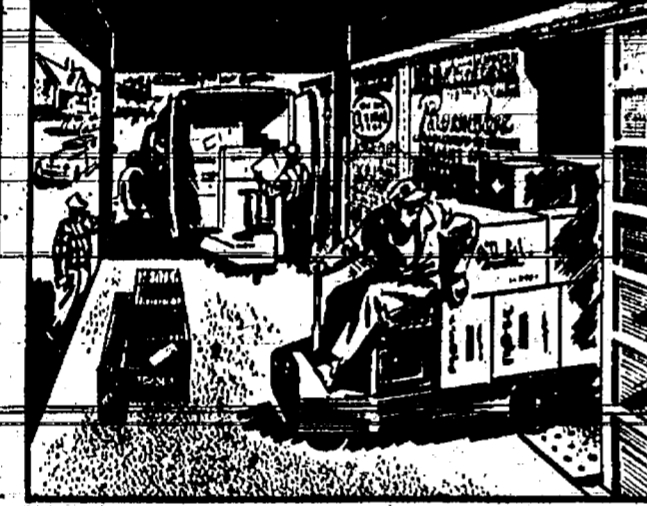

**1. THIS IS "PORKY"—the "porcupine car."** Its "quills" feel out and measure the clearances under tunnels and bridges—alongside signals and stations. So, when an extra high or wide shipment heads for your town, New York Central experts know just which tracks to route it over.

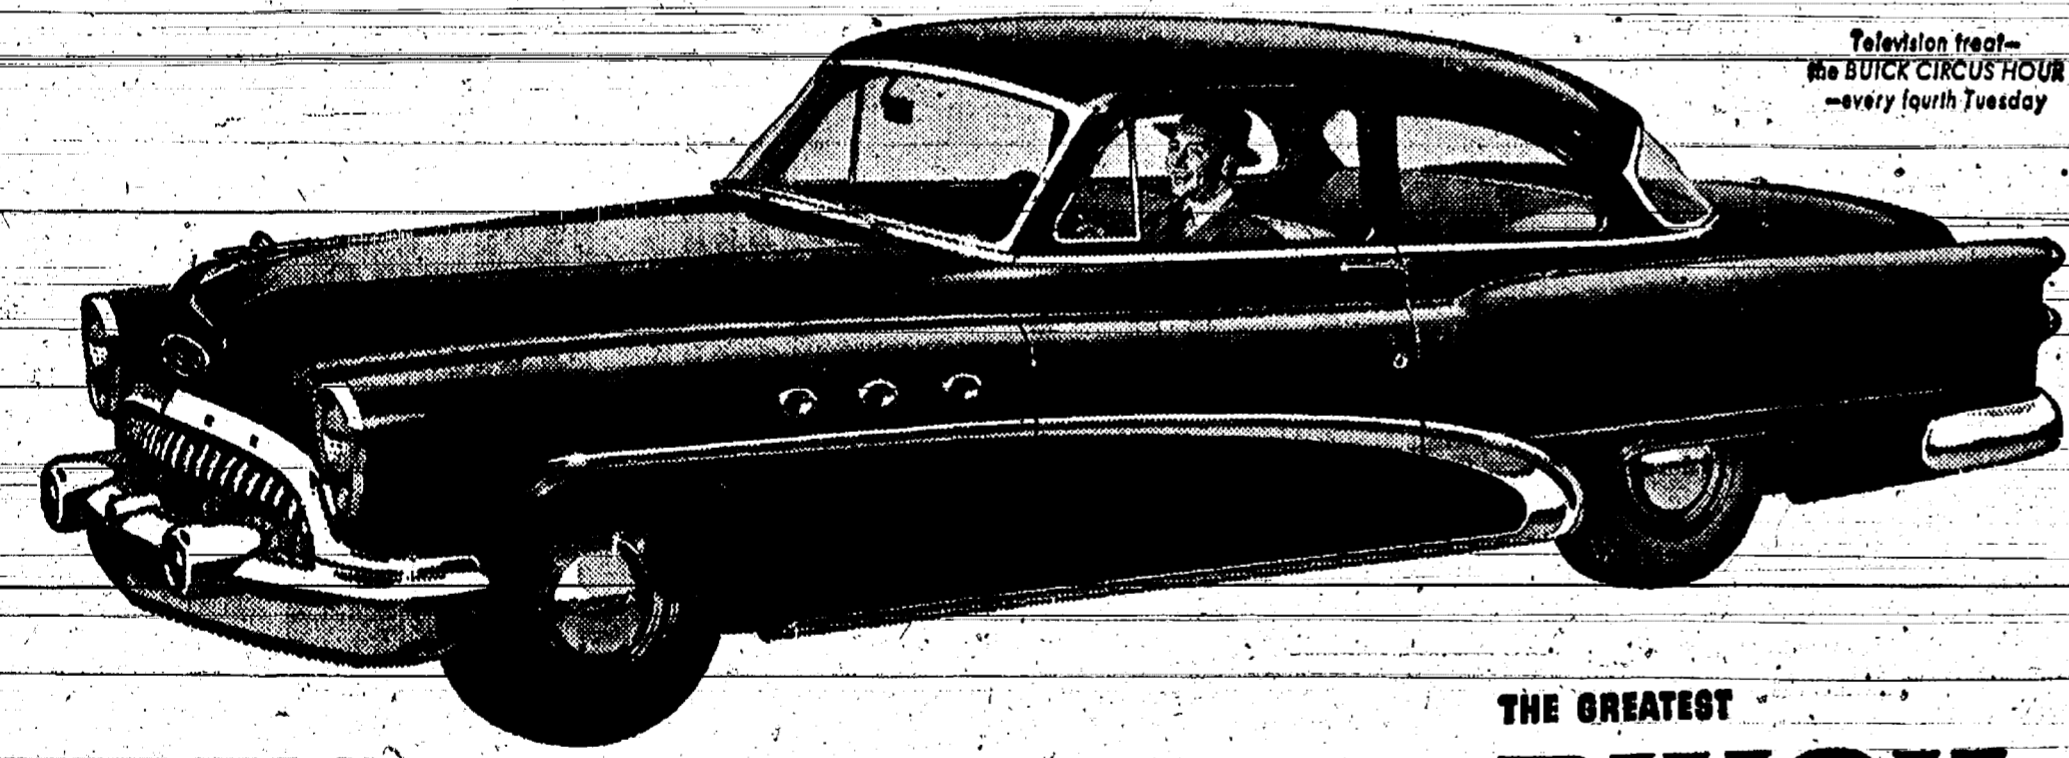

**2. WEEDING OUT TROUBLE** is this car's job. Its long arms spray four tracks with tank-car loads of weed-killer. For tough weeds invade the busiest right of way. They hold moisture, rot ties, delay traffic. So New York Central uses this modern way to keep the tracks to your town clear.

**3. CAR WITH "X-RAY" EYES.** Human watchfulness could never equal this car's electro-magnetic "eyes" that see through steel. It detects and marks hidden flaws to guide maintenance crews. That's one reason why you and your shipments travel New York Central with matchless safety.

**4. MECHANIZATION** helps New York Central railroads do jobs faster and more productively. That's why they earn more now—even though rail rates, if compared with most prices, are lower today than in 1940! Yes, finest transportation at lowest cost is the CENTRAL IDEA.

Television treat—  
the BUICK CIRCUS HOUR  
—every fourth Tuesday

**You can boss a Buick**

**MAYBE** you didn't know just how easy it is to own a new Buick.

So we show some typical prices here—and proudly.

Proudly—because the price of any new Buick buys a lot more automobile, a lot more comfort, a lot more room and power and thrill than the same money buys elsewhere.

Nothing will prove this more emphatically, of course, than your own comparisons. So we invite you to start comparing.

Compare power and performance.

In these Golden Anniversary beauties, you'll find more lift and soaring thrill—from the highest horsepower and compression ratios.

**THE GREATEST BUICK**  
IN 50 GREAT YEARS

Series for Series, in all Buick history—and from the infinite smoothness and dazzling getaway of the new Twin-Turbine Dynaflo Drive.

Compare room, comfort, handling ease. Every 1953 Buick has room to spare. Every one has the Million Dollar Ride with still softer all-coil-spring cushioning. Every one has easier steering and better balance.

Compare any other feature—style, smartness, luxurious finish—plus what you get for what you pay—and we honestly believe you'll soon be bossing a Buick, for keeps.

Come in and try one of these great cars—out on the road, where the story is told best—and let the thrills and values speak for themselves.

## Ferris Institute Enrolling Students in Printing Course

Big Rapids—The Ferris Institute printing school is enrolling students for its spring term according to an announcement by Ken Ross, printing instructor.

The Institute's printing school, begun in 1950 at the request of the Michigan Press Association, has grown rapidly in both enrollment and equipment.

Latest addition to the facilities is a completely equipped photoengraving laboratory. Previously acquired equipment includes two Model 5 Linotypes, a Model 26 Linotype, a Model 8 Linotype, two 10x15 job presses, one 12x15 C&P job press, one 10x15 Rice automatic press unit, a 30x42 Miehle cylinder press, a 17x22 Kelly press, a 19x25 Baum folder, and numerous other items necessary to complete instruction in the graphic arts.

The school has been unable to fill more than a small fraction of the job openings referred to it, according to Ross.

"The typical high school accountant is not familiar with the field. These young people are not made aware of the high wages being paid in printing, of the job security and other marginal benefits to be had in the whole field of graphic arts."

Men and women interested in this type of education and training may write directly to Ken Ross, or to Director of Admission, Ferris Institute, Big Rapids, for further information.

## BOY SCOUT NEWS

The Explorers had a meeting and decided to pass the first Explorer rank, which is equivalent to the equivalent to Tenderfoot rank.

The Explorers' and Scouts' hike was very successful.

The Order of Arrow election was held last Monday evening. The two elected will be notified at the Spring Camporee.
