ROBERT HELLER

NORMAN FELDKAMP

## Two Local FFA Members Win State Farmer Degrees

Norman Feldkamp and Robert Heller were awarded the coveted State Farmer degree at the 25th convention of the Future Farmers of America at East Lansing. This is the highest degree that the state association awards and it represents an outstanding farming program, together with marked leadership ability and scholastic achievement.

Feldkamp and Heller were given their award certificates and State Farmer pins at the convention. Only 212 of the degrees were awarded this year, the recipients being chosen from the 10,512 FFA boys in Michigan.

Both of the Chelsea boys honored are seniors at Chelsea High school. Upon graduation both plan to be farming full-time in partnership with their fathers.

Norman is the son of Mr. and Mrs. Ezra Feldkamp of Hashley road. Robert's parents are Mr. and Mrs. LeRoy Heller, of Waters road.

Philip Smith, Chelsea High school FFA advisor, accompanied the boys to the convention. The local FFA group also sent two high school seniors to the convention as voting delegates. The two are Gene Lake and Kenneth Galbreath.

Norman and Robert are the third and fourth Chelsea boys to receive the State Farmer degree and it is an unusual honor to have two local boys receive the award the same year.

Keith Bradbury was the first local FFA member to receive the award, in 1949, and Kenneth Proctor, Jr., received the award in 1952.

Gries was elected to the Board of Education, defeating Mrs. Parmelee, and Brody and Rouse won the Board of Agriculture posts over Democrats Himes and Smith.

The former Michigan governor, Harry F. Kelly, defeated the incumbent Adams as Supreme Court justice, and Dethmers was re-elected. Talbot Smith, of Ann Arbor, ran a weak fourth on the non-partisan ticket for Supreme Court justice.

Judge James R. Breakey, Jr., unopposed for circuit judge, received a large number of votes in all parts of the county.

 come in and play with them with  
 me some time.

Two of you will actually own  
 these two trains July 1, but in the  
 meantime we will all play with  
 them. Yes, we are going to give  
 them away to some boy or girl,  
 July 1.

There is a big freight train in-  
 cluding stock yards and cattle,  
 lumber car and loader, barrel car  
 and loader, milk car and milk sta-  
 tion, coal car and loader, etc. The  
 big passenger train has small  
 people inside riding and a diesel  
 engine.

In the set-up that will be given  
 away is a lot of track, a pair of  
 automatic switches, a set of farm  
 buildings, crossing gate and flasher  
 signal, talking station, a lake with  
 a cottage, church, store and super-  
 market. In fact, I can't name them  
 all. In all there is \$300.00 worth  
 of trains and accessories. You  
 must see it to appreciate it. We  
 expect to add several other real  
 worthwhile prizes to this contest.

This will be known as the Saline  
 Hatchery Kiddie Popularity con-  
 test. Any customer of Saline  
 Hatchery can nominate any boy or  
 girl (6 months to 60 years old).

Then every customer will get 10  
 votes for his favorite candidate for  
 every dollar spent at Saline Hatch-  
 ery from April 1 to July 1. All  
 checks bought since January 1 will  
 count in the contest, but other  
 items such as Kaseco Feeds, all  
 Eouley Equipment and remedies  
 or anything that we sell will count  
 from April 1 to July 1.

Then for this train, over How-  
 land Heath's program over WPAG.  
 Then why don't you get your folks  
 or some friend to nominate you  
 and then encourage all of your  
 friends, relatives or special groups  
 of people to buy their checks and  
 all of their feeds and supplies  
 from Saline Hatchery and vote  
 for you in the contest.

You will hear more about these  
 trains and this contest from time  
 to time in this column and over  
 the radio.

Yours for a lot of fun railroad-  
 ing,  
 Art Hagen,  
 Saline Hatchery,

### Permit Required To Burn Off Grass or Brush in Open

"Before burning off grass or weeds or starting a brush fire, contact your fire chief or conservation officer for a fire permit," is the emphatic admonition of Conservation Officer Donley Boyer.

Boyer stated there is no charge for a permit and it is not the aim of the fire or conservation department to be arbitrary and prohibit necessary burning, but it is essential that they be notified for various reasons.

"Chief reasons, of course," Boyer stated, "are the prevention of fire hazards to neighboring lands and property when fires get out of control and preventing costly, unnecessary runs of the fire department's equipment."

Boyer said it has happened on several occasions that the fire department was called out and upon arrival at the scene found the fire had been set by responsible people and was under control of a sufficient number of watchers to keep it under control.

"If the fire chief or conservation officer had been notified of the farmers' intention to burn the area," Boyer pointed out, "the run could have been prevented with a saving of the \$50 cost to the township."

Wild game animals and birds are especially susceptible to fire during the nesting season. Large numbers are killed each year because of fires which get out of control. Civil or criminal prosecution may follow if fire spreads to others' land. Burning without a permit is a misdemeanor and responsibility for damage from a run-away fire rests with the person who started it.

To obtain a permit to burn off grass to start an open fire it is only necessary to call Fire Chief Ted Balmer, Chelsea phone number 5131, or the conservation officer whose number is Chelsea 7701.

## Chip Pulls a "Pip"

Chip Hanson is a clever cartoonist. Beside doing cartoons on our paper, he picks up "free lance" drawing jobs.

Right now he's whipping up posters for the Safety Campaign. They all have headlines like "PLAY IT SAFE!"... or, "A LIVE WIRE CAN START A FIRE!"

Chip looked a bit sheepish yesterday. Didn't want to tell me why. Finally he blurted out, "I feel like a dope. Here I am on this safety program and the fire inspectors tell me my own studio's a fire trap. I've been storing paint there for years..."

From where I sit, what happened to Chip could happen to anyone. He was just too busy in forming everyone else about safety — not realizing his safety was threatened. Like those who fret about their neighbors — whether they can afford a new house, whether they should have coffee or a glass of beer with lunch — Chip simply forgot to "draw" some obvious conclusions about himself!

**Worth more... and why**

There's an old saying that a thing is worth what someone is willing to pay for it. Well, if you could tour the wholesale and retail used car auctions around the country, if you could survey hundreds of used car lots you would discover that used Fords bring higher prices than any competitive make—and by substantial amounts.

**THAT'S WHY** we feel our '53 cars should not be compared with cars in the same price range. Not because our competitors don't do a good job—obviously they do—but because we feel Ford Cars have more in common with the highest priced automobiles. The similarities are far greater than the differences.

For example, Today, the most expensive cars in this country have V-type, 8-cylinder engines. Ford Cars have had this exact same type of engine for over 20 years.

What's more astounding, the current Strato-Star V-8 sells for hundreds of dollars less than several other makers charge for a six-cylinder car. Now there's nothing wrong with a Six but they do cost less to make. Ford makes a Six—the most modern overhead valve Six in the industry. And if it's a six-cylinder car you want, Ford has it and for less money than the V-8, which is as it should be.

What about ride? Here's another Ford similarity with high-priced cars... **Riding Comfort.** One of the misconceptions for many years has been that weight—sheer weight—is what it takes to make a car ride well. Ford has found that you can make a 3000-pound car ride softer and hold the road better by far than many cars that weigh a full 1000 pounds more. In the '53 Ford, for example, front end road shock has been reduced up to 80%. We say it compares most favorably with the heaviest cars sold today.

What about automatic transmissions? It would take the fingers of both hands to count the various kinds of automatic and semi-automatic transmissions on the market today. The one we

offer is called Fordomatic. It is the most versatile on the market, it represents the most profound consideration of engine-to-wheel power transfer—and that it does the best job for our engines isn't even open to question. It "shifts" better than you could shift by hand.

What you can see is also important. Here again Ford Cars lead not only in their price field but in the medium and upper brackets as well. Ford visibility is **Full-Circle Visibility.** This means huge, curved unobstructed glass area, front and rear, plus side windows that allow all passengers what the hotels call "room with a view."

**Appearance?** A higher price, of course, does not make a car more beautiful. Conversely, beauty in a Ford comes "for free." Ford has found that it costs no more to develop a beautiful car than one that is less pleasing in appearance. You can drive up to the most exclusive doorways in the world and feel perfectly at home in your Ford. Fords "belong"... in exactly the same social category as the finest, one-of-kind creations. After all, a Ford is a custom creation multiplied.

What about running costs? Here's one place that Ford's advantages are obvious. For oil and gas economy Ford has the big cars whipped. Ford parts cost less, Ford service charges are less. Ford tire mileage is thousands of miles greater. And, Ford depreciation is the lowest of any car on the market—bar none.

What are Fords made of? Some people have the idea that the costliest cars are made of "better stuff." It's true that some high-priced cars have costlier upholstery and fittings. What Ford has is

so good, both in durability and appearance, that you probably could not tell the difference. You might even prefer it, because of its better design and more pleasing appearance.

Then there's the question of sheet metal. If you were to measure and analyze the sheet metal structure in the most expensive car, you most likely would find it identical in thickness to the corresponding panels in Ford.

After all, then, what is the difference between a Ford and the costliest cars?

In our opinion, the difference is largely a matter of dimensions, weight (and the power required to move it) plus the distinction of owning a car that not so many other people own. The desire for these things is understandable... and probably justified for people who are willing to pay the price to satisfy it.

As to comparing Ford with other cars in its price range, by all means do so if you wish. But, as we said before, you'll get a better picture of Ford value by comparing with cars that are most like Fords—those that are priced up to twice as much. In fact, we think you'll quickly begin comparing the other cars with Ford—because the 1953 Ford has really established the New Standard of the American Road.
