Volunteers Sign To Act As Leaders of County 4-H Clubs

More than 60 of Washtenaw County's busiest citizens are volunteering their time and talents to serve as adult leaders of their local 4-H clubs, reports Frank Gendron, county 4-H club agent.

The volunteer local leaders are men and women who are sufficiently interested in young people to be willing to spend some time in training for the work and in helping members with their many activities.

The leaders help plan the program for the year and assist in getting enrollments. In addition, they attend regular club meetings, visit the homes of members to assist with records, to see how demonstrations and projects are progressing and to give help and encouragement.

In Washtenaw County, the men and women working as adult leaders this year and who have already sent in their club enrollments are:

Wide Awake Club led by Mrs. Walter Wolfgang and Wanda Eschelbach of Chelsea.

Learning By Doing, led by Mrs. Lewis Haselwerdt, Mrs. Clarence

Reddeman, and Mrs. Roland Eder, all of Chelsea.

Geddes Shamrocks, led by Mrs. Harvey Sanderson, Ann Arbor.

Lapham 4-H Club, led by Mr. and Mrs. Herbert Conant and Arthur Clinansmith, of Salem.

Rip and Sew, led by Martha Wessel, of Ann Arbor.

Wonder Workers, led by O. J. Ryder, Mrs. Leo Hayes and Mrs. George McKim, of Ypsilanti.

West Side 4-H Club, led by Mrs. Gerald Payne and Mrs. Maynard Sellers, Ypsilanti.

4-H Farmettes, led by Mrs. Marianne Wandy, Mrs. Doris Townsley, and Mrs. Mildred Jewell, of Milan.

Busy Beavers, led by Mr. and Mrs. Robert Wilson, of Salem.

Local FFA Members Join in Pig Hunt

When one hears about wild pig hunts, he usually thinks of the deep south and the everglades, but in Chelsea last Monday night our own kind of pig hunt was held.

Monday night, Philip Smith, agriculture teacher in the high school, Dave and Bob Fischer, Bob Wierich, Irvin Knickerbocker, and Reuben Lesser went out to a woods next to Dave Fischer's home to help catch his registered gilt which he had previously caught in the pig scramble at the Community Fair.

The pig, which had been lost for four weeks, was located by some hunters.

Dave then called in the FFA boys to help catch the pig. Dave's two dogs were of great assistance as they located the pig and then chased him until he was tired enough for the boys to catch.

The gilt is in fine condition. In fact, she seems to have grown as much as the one owned by his brother Bob, and at a much lower cost.

No. 2: You Can't Stop in 10 Feet at 10 Miles Per Hour

That pedestrian who pops out from between parked cars can put you on the spot. The parked car hides him until the last second. When you are far enough along to see him you may have only 10 feet in which to stop.

That fatal triangle in the drawing tells the story. See how close the car is before the line of sight of the driver can reach the pedestrian. He only has to move 5 feet to be in front of you.

At 10 miles per hour your reaction time of $\frac{1}{4}$ of a second moves you 11 feet before your foot hits the brake. You will still skid 7.5 feet before you stop. In 18.5 feet you would have run over him.

condary and rambled 87 yards to score. Woods passed to Earl Feldkamp for the extra point and the score stood 7-0.

Late in the second quarter Chelsea took over on the Saline 39 following a Hornet punt. Two running plays picked up 20 yards. When another running play lost five yards, a fumble passed from a spread formation to Bob Bertke for 26 yards and the T.D. Bertke grabbed the ball on the 7 and bulled into the end zone. Bertke then cracked over guard for the extra point.

Saline came back with a strong ground attack of its own, however, and two minutes before the end of the half Chuck Stienner took a pitch-out and swung around the

Bulldogs' left end for nine yards and their second score. Stienner slipped over his left tackle for the extra point and the score stood Saline 14, Chelsea 7 at the half.

Saline received the second half kickoff and marched in for its third score from the 6. The try for extra point failed.

In the fourth quarter Dave Elkin recovered a Saline fumble to give the Bulldogs the ball at midfield. With a 30-yard pass play from Bud Ringe to Phil Bareis being the big gainer, the Bulldogs moved in to score their second counter. The T.D. came on a five-yard pass from Ringe to Don Proctor. Bertke was stopped on the try for extra point and the final score read Chelsea 13, Saline 20.

After a poor defensive first half the Bulldog line, led by Walt Beuerle, did a good job of stopping Saline's split T offense.

Six seniors played their last game for the Bulldogs. They are Bob Bertke, Don Proctor, Walt Beuerle, Dave Elkin, Duane Sathrethwaite and Lloyd Grau.

Chelsea's season record is four wins and four losses.

Following are the season records of the Chelsea Bulldogs:

Police Warn of Dangers in Early Fall Snowstorms

Chief of Police George W. Doe

watched a load of Thanksgiving pumpkins going by yesterday, and through a process of logical deduction he saw in them a warning to motorists.

"When the frost is on the pumpkin," the chief said, "it means that pretty soon there's going to be snow."

November snowstorms, Chief Doe said, can be more hazardous to motorists than January blizzards, for the reason that they come unexpectedly and find many motorists unprepared both mechanically and psychologically for the problems that snow driving brings.

Right now is the time, Chief Doe emphasized, for all wise motorists to observe the following safety rules:

1. Don't blame accidents on the weather; be prepared for bad weather.

2. When snow comes, get the "feel" of the road when starting out.

3. Keep the windshield clear of fog and frost, and be sure headlights, windshield wiper blades, and defrosters are working.

4. On snow and ice, use tire chains. They cut stopping distances in half, and give four to seven times greater traction.

5. When you have to stop, don't jam on the brakes. "Pump" your brakes to avoid skids.

6. Follow other cars at a safe distance. Give yourself room in which to stop.

Asked if tire chains are necessary if a car has "winterized" tires, Chief Doe said that the report of the National Safety Council's Committee on Winter Driving Hazards, has found that snow tires with special tread cannot approach tire chains for safety.

Even less reliable, Chief Doe added, are so-called "inertia" or gyro anti-skid devices. These, he explained, are mysterious pipe-like gadgets which are being widely sold and installed under the rear frame or luggage trunk of automobiles, on the claim that they prevent winter skids.

National Safety Council tests, the chief said, show these so-called "stabilizing" devices to be of no help whatever on snow or ice. He warned against being misled into trouble by a false sense of security.

MICHIGAN MIRROR

(Continued from page one)

announced his candidacy three weeks ago, no one at the Capital was surprised. But his eandor permits him to set up campaign machinery openly. A Brake For Governor Club has already been formed and boasts more than 200 members.

Brake says that he has stepped aside previously in hope of party unity; that he is in this campaign to stay.

Teacher shortage in Michigan is bad, but there's a disagreement about how bad.

The National Educational Association reported that Michigan's need is greater than any other state — 9,000 during the 1952-53 school year.

Dr. Clair L. Taylor, state superintendent of schools, would not affirm this figure. He set Michigan's need at 5,500. In Dr. Taylor's opinion, the state's need is worse than any other except California. For the 1953-54 year, he places the number of additional teachers needed at 7,000.

Average yearly salary for Michigan teachers was computed to be \$3,900. California, Maryland and New York are only states with a higher figure.

Only half as many deer will be killed this year as was taken in 1952, say game experts. Some are predicting less than that. Last year about 160,000 deer were taken. Conditions were favorable — large herd, some ideal weather, a special season of three days. Conversely, Monday dawned in Michigan on a much smaller herd, weather is uncertain, special season is only one day.

Conservation officials are hopeful, but not sure, that enough deer will be killed to eliminate starvation among those remaining in the woods.

More babies than ever were born in Michigan during September. Health Department figures show that 16,986 new citizens arrived to establish a new record. During the first nine months of 1953 a total of 130,938 births have been recorded compared to 128,844 during the same period in 1952.

Projections for the whole year are 176,642 new babies. This will be a new grand total for Michigan.

AMERICAN EDUCATION WEEK
Last week was observed as American Education Week in the Chelsea Public schools as well as all across the United States. Different classes had displays in local store windows.

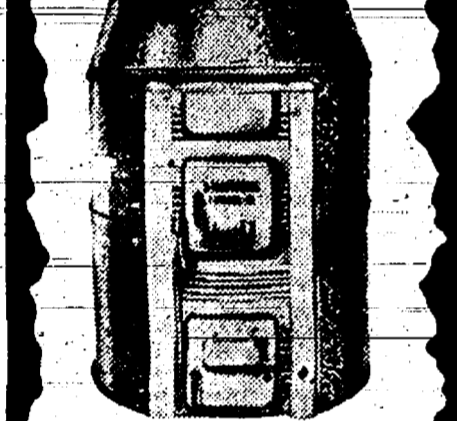

Among the displays was that of the Home Ec. department whose display was canning for the first year course, clothing for the second year, and holiday decorations for the third year. The art, mathematics and speech departments also had displays.

Band instruments and uniforms were the principal articles in one store window.

The library and Latin club displays were together. Books being shown for the library and also a desk with a student represented sitting at it. Roman pictures and dolls showing life in those days were displayed by the Latin club.

Typed pictures by some of the students in business education were an unusual project.

INSIDE THE CAPITOL

By Owen J. "Pat" Cleary,
Secretary of State

The Department of State operates as a distinctly big business. The work of the department has increased. We have many duties, but our supervision of the ownership and operation of motor vehicles constitutes one of our heaviest work burdens. Ours is a motorized society, a nation on wheels.

With an estimated collection of \$196,417,850 during the present fiscal year, our department ranks as the "second" largest revenue producing agency in state government.

It is interesting to note that the majority of this revenue is a result of just one phase of modern life in our state—the operation of motor vehicles. Approximately 194,218,000.00 of our total collection will come from taxes, fees and licenses connected with such operation.

The greatest portion of this \$194,218,000 will result from the collection of four and one-half cents per gallon on fuel used to propel vehicles on Michigan highways. This will amount to an estimated \$91,983,000.

Next in dollar volume will be some \$50,250,000 from the sale of license plates for motor vehicles.

Another very substantial item will be the approximately \$48,500,000 which we will collect for the Revenue Department in sales

and use tax on new and used motor vehicles.

Titles and title transfers will amount to an estimated \$1,500,000. Finally, approximately \$2,000,000 will come from the fees paid by the applicants as operators or chauffeurs.

Except for the totals acted in operators and chauffeur fees, and insures and use taxes, the revenue we collect in connection with motor vehicle activity is credited to the motor vehicle highway fund. Our work burden in this phase of our activity increases in direct ratio to the increase in motor vehicles, their mileage of operation, and in the numbers of people who are licensed to operate them on the highways of our state.

The Legislature and the people of Michigan have very wisely decreed that the majority of the tax, license and fee income from motor vehicle activity shall be earmarked for highway construction and maintenance, so that as the need for highway facilities increases, the revenue will at least to a substantial extent, also increase.

There Is No Other Television Quite Like G-E Ultra-Vision

It Is The Ultimate In Television Picture Perfection

Ultra-Vision by General Electric offers a new high standard of television viewing. In side-by-side tests in Buffalo, Syracuse, New York, Bangor, and other cities viewers preferred GE Ultra-Vision 7 to 1 over leading competitive brands.

In a scientific test by the United States Testing Co. in January, 1953, GE Ultra-Vision gave 580% more picture contrast under all light conditions than the average of 9 other receivers tested. Thus, General Electric Ultra-Vision has set a new high standard of picture quality for the industry.

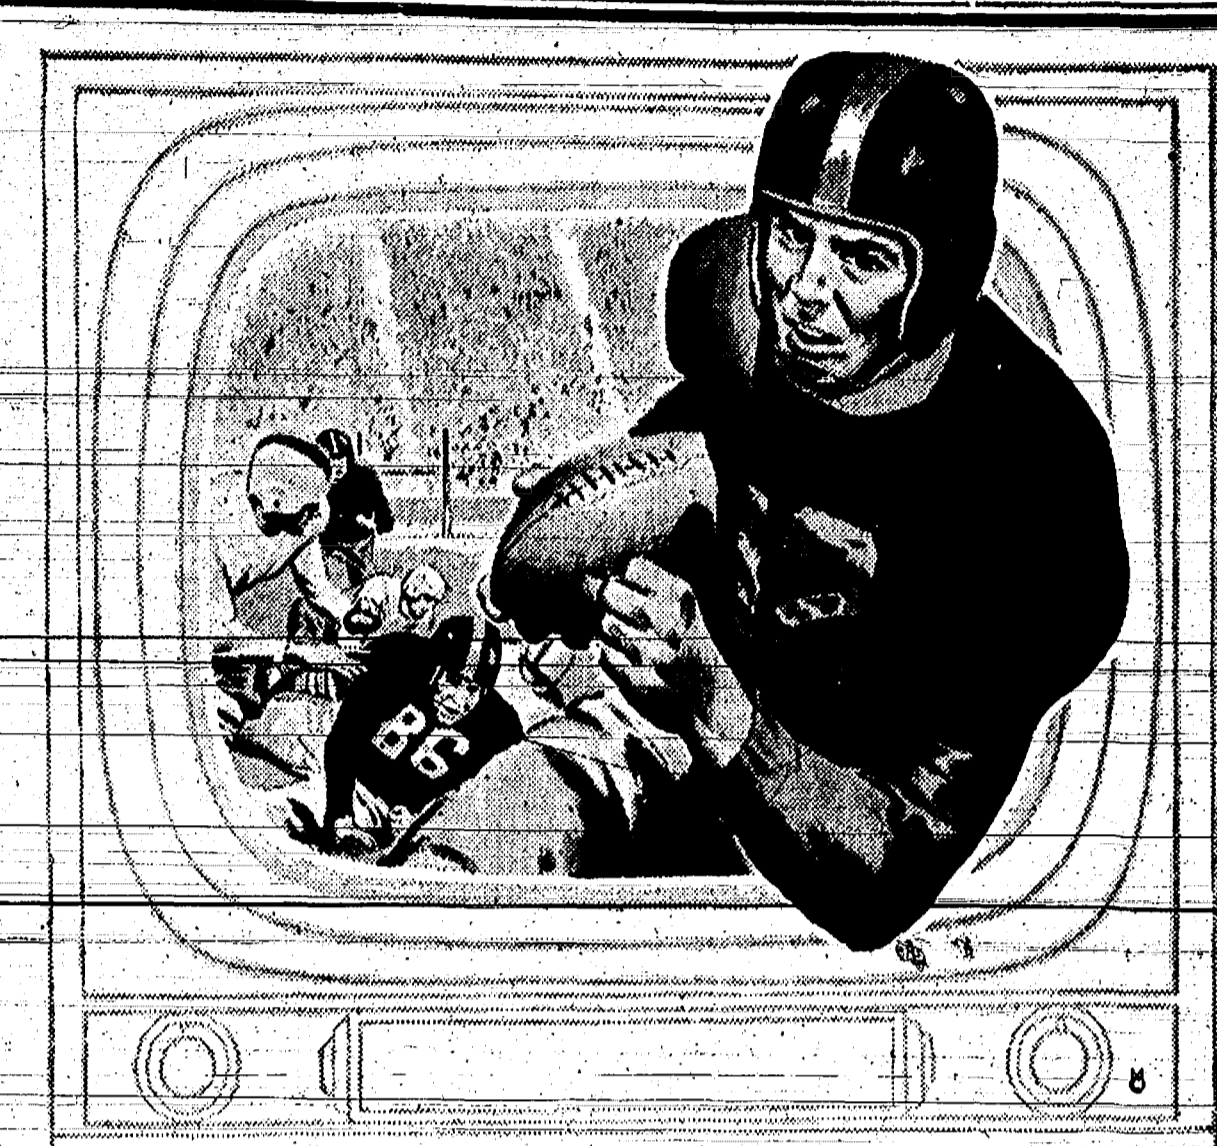

Remember... Seeing is Believing! A side-by-side comparison convinces even the most skeptical customers.

● GE has a powerful new 22-tube chassis, plus 4 rectifiers—that doubles previous sensitivity.

● Black tinted safety glass cuts unwanted room light from dark picture areas to give blacker blacks.

● GE aluminized tube increases brightness up to 100% by use of an aluminized screen on the back of the picture tube—face that acts as a mirror to reflect light toward the face of the tube.

● Glarelector... the 4-degree inclined safety glass and 2-degree inclined cylindrical picture tube deflects light reflections downward.

Enjoy all the thrills and none of the chills of the big-time football games every week... from the comfort of your own living room... via TV!
