

Recreation Ball League Is Organized

Attendance at the second week's Chelsea recreation program included 148 at the morning athletic program, 470 at morning play-ground, 330 at afternoon swimming and 197 at the evening activities at the athletic field.

The Friday evening street dance was cancelled because of rain. The Recreation Baseball League has started and includes Chelsea, Dexter, Stockbridge, and Grass Lake teams, two from each place. The two teams are for boys 15 years and under and 12 years and under.

Thursday evening the local teams played Dexter at the athletic field, the local boys 15 and under defeating Dexter, 5-3, while the 12 and under team won by a score of 10-0.

In the 15 and under game George Mayer and Frank Frederick shared pitching duties allowing Dexter only four hits while striking out 12 players.

Mayer, Frederick, George Staff, Matt Murphy, Bob Weber and Ed. McDaniel had hits for Chelsea. In the 12 and under group Dave Myers combined to strike out 18 Dexter batters.

Darrell Keeser, with a double and single, Jerry Ringe with three singles, and Guy Devine who has had three hits, led the team at the plate.

This week the local teams travel to Grass Lake for two games to-day.

Recreation Director Alan Conklin indicated that if other boys are interested in baseball they should report for practice at the athletic field.

BEATING THE HEAT—Carol Dancer, at left, holding Judy Blass, baby daughter of Mr. and Mrs. Julius Blass, and her friend, Karen Kern, standing next to her, who is spending some time with her grandmother, Mrs. Carl Bagge, did a thriving business at their Kool-Ade stand during Saturday afternoon's heat. At the time the photographer snapped their picture they had already taken in 80 cents at the rate of two cents for a small glass and five cents for a large glass of the ice-cooled beverage. The stand, set up on the lawn at the home of Carol and her parents, Mr. and Mrs. Donald Dancer, attracted two of their neighbors, Margaret Walworth, at right, daughter of Warren Officer and Mrs. Thomas K. Walworth who are staying with the former's mother, Mrs. T. Kent Walworth, following their return from service in Austria, and Janice Wood, second from right, daughter of Mr. and Mrs. Clarence Wood. Karen, part owner of the stand, is a daughter of Mr. and Mrs. C. Slater Kern, of Detroit.

MISS LELA G. McCONNELL

Kentucky Missionary To Be Guest Speaker At Salem Grove

Miss Lela G. McConnell, a missionary worker in the mountains of eastern Kentucky since 1934, will be the guest speaker at a special service to be held at Salem Grove Methodist church at 8 p.m. Wednesday, July 13.

Rev. Louis Caister, pastor of the church located at US-12 and Notch road, said the public is invited to attend the service.

With Miss McConnell will be a quartet of girls from the Kentucky Mountain Bible Institute who will furnish special music.

Miss McConnell's talk will be about her work in the Kentucky area which has grown to include 21 parishes, two grade schools, a grade "A" high school and the Bible Institute. When she began her work there in 1934 there were very few churches and no adequate schools.

Recently a radio station was built in the area and this has increased Miss McConnell's work. The station, a non-commercial venture, is dedicated "to the work of God" and is on the air 65 hours during the week.

Chelsea Rod and Gun club members will be entertained at their July 12 meeting with a feature-length motion picture film story of a three-month hunting safari in the heart of Africa. The pictures show the adventures of E. Y. Hunt and his son, Ed, of the Hunt-look and Manufacturing company of Detroit. The film was secured for the local club through L. D. Guinan.

Lions, rhinos, elephants, hippos, buffalo, leopards and other wildlife pictures are shown in unstudied, natural scenes.

Also to be seen are shots of the difficulties and tribulations of traversing rugged primeval hinterlands, the day-to-day life in safari camp and the customs and habits of the primitive tribes encountered.

Tuesday's meeting will be held at the Legion Home at Cavanaugh Lake.

Guests of Mr. and Mrs. Keith Boylan at a picnic supper Monday were Mr. and Mrs. Edward Hellmann and son, Steven, of Ann Arbor.

Gradient Attachment To Be Carried by Mail Order Firm

Gerald Carr was notified Friday by telephone from Chicago that a gradient attachment for levels he invented will be included in the winter catalog of Montgomery Ward mail order company and also, that the company will stock the attachment in its three Detroit stores as soon as a shipment can be made.

Carr received the order for the shipment to the Detroit stores and the assurance of the catalog listing after visiting the Chicago mail order firm Thursday morning and submitting a volume price quotation.

The gradient attachment was invented by Carr as an inexpensive way to convert any ordinary level to one that can measure the rate of fall for grading, drain installations, etc. E. T. Quint assisted him in perfecting the device.

Carr and two brothers-in-law, Robert, Herick and Saranac, and Raymond Lower of Ionia, have formed a partnership for manufacturing the attachment, with Al Kleis as manufacturer's representative.

The attachment is being manufactured for them by the Clev Manufacturing company at Ionia.

Annual Kiwanis Club Rummage Sale Set Friday, Saturday

What might be called "the coming thing" in cross-country transportation was demonstrated here late Tuesday afternoon when a helicopter landed neatly between the rows in Glen Wiseman's cornfield near Schooley's tourist cabins on Fletcher road.

Thinking the pilot might be in trouble the Schooleys and their guests in the cabins rushed out only to be met by a couple on their way from Detroit to Chicago who thought it would be a good place to stop for the night since it looked as if a storm might be brewing.

Later, however, with the sky clearing, they decided to go on as far as Jackson.

Oil Well on Haab Farm Promises Good Production

An oil well being drilled for Sun Oil company in the woods on the Elmer Haab farm on Waters road, gives every indication that it will be a good producer, the Haabs were told this week.

Another week of tests is expected to determine the amount of oil which may be expected as a daily yield.

The well is southwest of the one on the Henry Niehaus farm which has been producing approximately 20 barrels per day for almost a year.

Located in the southwest corner of the Haab farm, the well just brought in will also benefit Alton C. Grau and Clarence Buss, portions of whose farms are included in a 40-acre area around the well.

Drilling on the Haab well extended 4,200 feet down into the Trenton strata at the time oil was struck.

Wheat Marketing Cards Are Ready for Distribution

Need Seen for Additional Farm Storage Space in Fall

The 1955 wheat marketing cards are ready and representatives of the county ASC office have been distributing them to farmers in various locations throughout the county beginning Tuesday, July 5, at Sylvan Town Hall.

In this area the cards may be secured Monday, July 11, between 1 p.m. and 9 p.m. in room number 104 at Dexter High school and Thursday, July 14, at Sharon Town Hall.

The cards may also be held by contacting the ASC office, 201 East Liberty street, Ann Arbor.

Farmers who want to put wheat under the 1955 price-support program must be prepared to meet more specific standards of grain sanitation, according to information from the Washtenaw county Agricultural Stabilization and Conservation office (ASC).

The information states the following:

This year, the Food and Drug Administration has resumed a previously suspended wheat sanitation enforcement program which is based on specific minimum standards. These provide that wheat which, on sample test, shows more than the minimum of rodent contamination or damage, cannot be used for human food. This means that such wheat must be disposed of for nonfood uses.

In line with this enforcement program, the Commodity Credit Corporation has revised the regulations governing the wheat price-support program. Under the new provisions:

(1) 1955-crop wheat must meet the Food and Drug minimum sanitation requirements to be eligible for price-support loans.

(2) 1954-crop wheat which has been under price-support loan, as covered by purchase agreement, must meet the minimum-sanitation requirements to be eligible for "real" loans.

(3) 1955-crop wheat under loan and resented 1954-crop wheat must meet the minimum sanitation requirements (those in effect when the wheat went under loan) upon delivery to CCC at the end of the loan period. If it does not, the "settlement" value will be the price at which the wheat is sold by CCC to the highest bidder for feed, or for industrial uses other than food or beverages. Producers, of course, may redeem their loans if they wish.

(4) 1955-crop wheat which is covered by purchase agreements will not be eligible for delivery to CCC if it fails to meet the minimum sanitation requirements.

Wheat storage space will be tight this year. Farm storage will be needed. Producers who have satisfactory space, or space which can be put into safe storage condition, should plan to use it. CCC loans are available to finance the construction or purchase of new farm-storage bins. Other assistance is also available to help producers handle their wheat harvest and storage operations efficiently and safely.

The Extension Services in wheat states are emphasizing clean grain and can furnish valuable suggestions to meet the needs of each locality.

The kitchen equipment includes a new electric stove which is a gift from the congregation to the new pastor. The home is heated by an oil furnace. The parsonage faces Fletcher road and is on part of the property which also is the location of the parish hall. The latter, however, faces on Waters road. Rev. and Mrs. Kaiser held open house at the parsonage Sunday afternoon following a reception in their honor in the parish hall attended by 200 guests. 188-hp Buick SPECIAL 6-Passenger, 4-Door RIVIERA, Model 43

This 4-Door Beauty is the Newest Hit in Hardtops

YOU certainly ought to come see why this new kind of hardtop is headed for the best-seller list.

It's a Buick Riviera, of course. Which means the low and rakish look of a Convertible—a solid steel roof overhead—and no center posts in the side window areas to obstruct your view.

But that's only the beginning. Here you get two extra doors. They open to the rear compartment. So no one in the front has to move when someone gets into or out of the rear. Here you get massive half-pillars on either side on which the front doors latch and the rear doors hinge. (That's

why you see no center posts above the door line.)

Here, too, you get wholly new structural principles in body design and strength that give this beauty the extra safety of rock-firm solidity at the top, sides and bottom.

And here—bless those Buick engineers!—you get a lot more room in the rear compartment. For the 4-Door Riviera gives you over 9 inches more hiproom and 5 inches more legroom—yet with no increase in wheelbase or over-all car length.

So we repeat—you certainly ought to come in and see this stunning new kind of hardtop.

It's the last word in beauty, comfort, convenience. It's available in Buick's two lowest-priced Series—the SPECIAL and the CENTURY. And it's all Buick—power, ride, handling—and the spectacular performance of Buick's Variable Pitch Dynaflo.*

Drop in today—tomorrow at the latest—and learn what Buick's all-time record sales year can mean to you in the way of a whopping-big trade-in deal.

*Variable Pitch Dynaflo is the only Dynaflo Buick builds today. It is standard on ROADMASTER, optional at modest extra cost on other Series.

Did You Ever Hear the One About the Dairy Farmer?

If you haven't, you should make the acquaintance of your Dairy Farmer! He furnishes about a fourth of your food every day and does so for a sixth of what you pay for the other three quarters. Ask any dietician.

This morning, as they do every morning 365 days a year, 13,000 dairy farmers arose at the crack of dawn, fed, watered and milked a quarter of a million tested cows, shipped 2,395 tons of pure, fresh milk to Detroit. That's 2.2 million quarts, including a surplus over table needs going into ice cream, cottage cheese and other healthful dairy products.

Putting on call an abundant daily supply of milk requires production and marketing efficiency of the highest order. The milk assembly line starts with a heifer. It's a line, 3 years long, you can't stop or start with a

push-button. Besides, your dairy farmer cooperatively owns plants, laboratories and transport equipment for receiving, testing, conveying and processing his milk shipments.

He supports industry-wide research for the improvement of his product and its uses. He employs management, scientists, technical personnel, stenographers, and truck drivers, in getting his milk from farm to market.

When you meet this farmer, he'll tell you truthfully that he earns less than factory wages for the time and money spent, but he'll say you'll get your milk, fresh from the farm, tomorrow morning.

Twin Pipes that play sweet music!

Chevrolet's "Super Turbo-Fire V8" with 180 h.p.

You can spot this one by the twin tail-pipes. No matter what you drive, you're going to see twin-exhaust Chevrolets pulling away—in traffic, on the toughest hills, on the long straightaways.

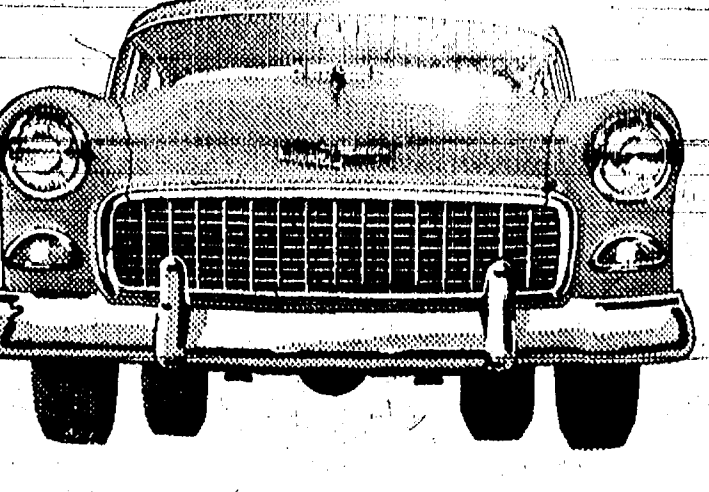

... Unless you have a "Super Turbo-Fire V8" of your own. And then you'll know what it's like to pilot the car that sets the pace for everything else—and doesn't pause to read the price tags!

What makes the Super so? Chevrolet's superb valve-in-head V8, with the shortest stroke in the industry, the most power per pound, and the only

12-volt electrical system in its field—all this plus a four-barrel carburetor and free-breathing twin exhausts.

Want to sample this silk-lined cyclone? Just give us a call any day this week, and we'll be proud to show you just how hot a V8 can be.

*Optional at extra cost.
†Station wagon models have single exhaust pipes.

Keep Pencils, Paper, Pins in Handy Spots

Pins and needles, and paper and pencils are the little things that make running a household easier.

And running a home can be easier still if these small pieces of equipment are placed at strategic spots in the house, says Esther Everett, assistant professor of home management and child development at Michigan State College.

Extra brooms and dustpans, for instance, can save steps if kept in several places where they will be used—front hall, basement and back door.

Spare needles, thimbles, scissors and thread for light mending can be kept at the ironing board, as well as at the sewing machine.

Miss Everett says, "If you city magazines or newspaper articles and recipes, another pair of scissors can be kept near where you read the material."
