CHS Baseball Team Opens With 10-4 Win

Lose to Flat Rock Tuesday Because of Too Many Errors

Last Friday Chelsea High's baseball team opened their season by defeating Stockbridge, 10-4. Playing in weather conditions better suited to football, Stockbridge pushed across three runs in the top of the third. Fred Mills walked, and John Mason was safe on a throwing error. Both runners scored later on another error.

Chelsea came back with five runs in their half of the third. George Staffan led off with a single and after Jim Baxter fled out, moved to third on Odie Richardson's single. Staffan scored on DeFant's infield hit. Ed Wenk walked to lead the bases, Richardson scored on Hugh Weinberg's infield tap. Silas Hopkins singled, scoring DeFant. Frank Frederick drew a base on balls to force in Wenk. Loren Keezer singled to score Weinberg. Staffan, up for the second time, grounded out, as did Baxter to end the inning.

In the first of the fifth, Stockbridge picked up their final run. The first three hitters hit safely to score a run. Then with two on and none out, pitcher Bob DeFant bled down and got the next hitter to ground out and then struck out the next two batters to retire the side.

Their lead seemingly in jeopardy, the Bulldogs struck back for five more runs in their half of the fifth to ice the game. Walks to George Mayer, Loren Keezer, Jim Baxter, and Bob DeFant, plus singles by George Staffan, Odie Richardson, and two perfect squeeze plays by Hugh Weinberg and Silas Hopkins, accounted for the five runs.

Despite the cold, pitcher Bob DeFant flashed midseason form by striking out 14, walking only three men, and allowing only one run.

Odie Richardson paced the Bulldogs at the plate as he had a perfect day with three singles and a walk.

Two new faces showed up in coach Al Conklin's starting lineup, as both turned in fine performances. Loren Keezer handled the catching in excellent fashion, while driving in a run. Third baseman Frank Frederick walked and lined to the third baseman in two trips to the plate. Both are sophomores.

Score: Chelsea 10, Flat Rock 4.

Stockbridge 00 801 00—4 4 1 Chelsea 00 505 0x—10 9 8

In Tuesday's game with Flat Rock errors proved costly to the Bulldogs who lost the game by a score of 6-3.

Flat Rock got three runs in the first inning and Chelsea totaled three in the second and third innings. Flat Rock scored another two runs in the third inning. Each team scored once more before the end of the game.

Bob DeFant did fine pitching for the entire game striking out ten men and walking two.

Chelsea had a total of five errors. The Bulldogs were credited with six hits and four runs.

Flat Rock had six runs, two hits and only two errors.

Today, Thursday, Chelsea hosts Saline in a Huron League game beginning at 4 p.m.

Warn Against Unreliable Peddlers

All house-to-house salesmen must obtain permits from the village clerk before calling at homes. It was pointed out by Robert Browne, Chelsea village clerk, that even though such peddlers are issued permits, it is not to be followed, Devine said, it is people are issued since interest in commerce must be given with care when the representative is promoting interstate sales. This covers magazine salesmen, a group that has been the source of considerable trouble here because of some unscrupulous peddlers.

Residents who have paid in advance for subscriptions have complained that they never received the magazines ordered.

Devine says the only safe rule to follow is to order magazines from local dealers or from local organizations or school groups who are known to the purchaser.

While unscrupulous magazine salesmen have been the chief source of trouble here, other can't be depended on proved to be unscrupulous. Devine said the best way to advise people for the protection of their purchases is to make them from reputable business places.

Olds Owner: That's Oldsmobile's new J-2 Rocket Engine!

Neighbor: What's that? Tell me how it works.

Olds Owner: When you're driving under ordinary conditions, it uses only one carburetor. That means economy with a capital E. But when you need a sudden burst of power, for safety's sake, you just press the accelerator three-quarters of the way down—and two additional carburetors cut in!

Neighbor: In other words, with J-2, you can have economy when you want it and power when you need it. That's for me!

Easter Remains Symbol of Hope, Inspiration and Faith

Easter, the principal ecclesiastical event of the year, gets its name from Eostre, a Teutonic goddess, whose festival was celebrated in the Spring. Her name was given to the Christian festival, as it was she, according to legend, who opened the portals of Valhalla to receive the White God and the Sun God, representing purity and light.

The history of Easter, which is a symbol of the Resurrection to us, is intertwined with many religious customs and observances dating back hundreds of years and before the time of Jesus Christ. However, Christians have utilized various customs and traditions to create and color this observance in the real spirit of Jesus' rebirth.

The Easter egg, for example, came to be associated with Easter because eggs were forbidden to be eaten during Lent and on Easter Sunday they were traditionally served. The Easter egg, though, had dated back to the Egyptians and Persians, and also

the Greeks and Romans, who ate eggs annually in the Spring festivals, according to historians. Eggs have long since been connected with new life, as was the rabbit, a prolific animal, and the rabbit was eventually used in children's tales, as another emblem of fertility or new life.

Jesus arose from the dead on the first day of the week, and Gentile Christians have held ever since that Easter should be observed on Sunday. Jewish Christians for many years observed the day on the date of the Passover, regardless of whether it was Sunday or not.

In any event, it is appropriate that Easter comes in the Spring, when the renewal of life is so apparent about us. Sunrise services in many churches, a fairly recent innovation, symbolizes the Resurrection at sunrise. Today this religious practice is observed in practically all churches as a symbol of hope, inspiration and faith.

April Designated Cancer Control Month by President

April is Cancer Control Month, as proclaimed by President Dwight D. Eisenhower. The press has been asked to aid in focusing attention on this serious problem—an answer to which the medical profession has not yet provided.

We could all do well to think a moment about the seriousness of the cancer problem. We should acquaint ourselves with symptoms, aid financially if possible, and help others to appreciate the dangers and value of early detection of cancer.

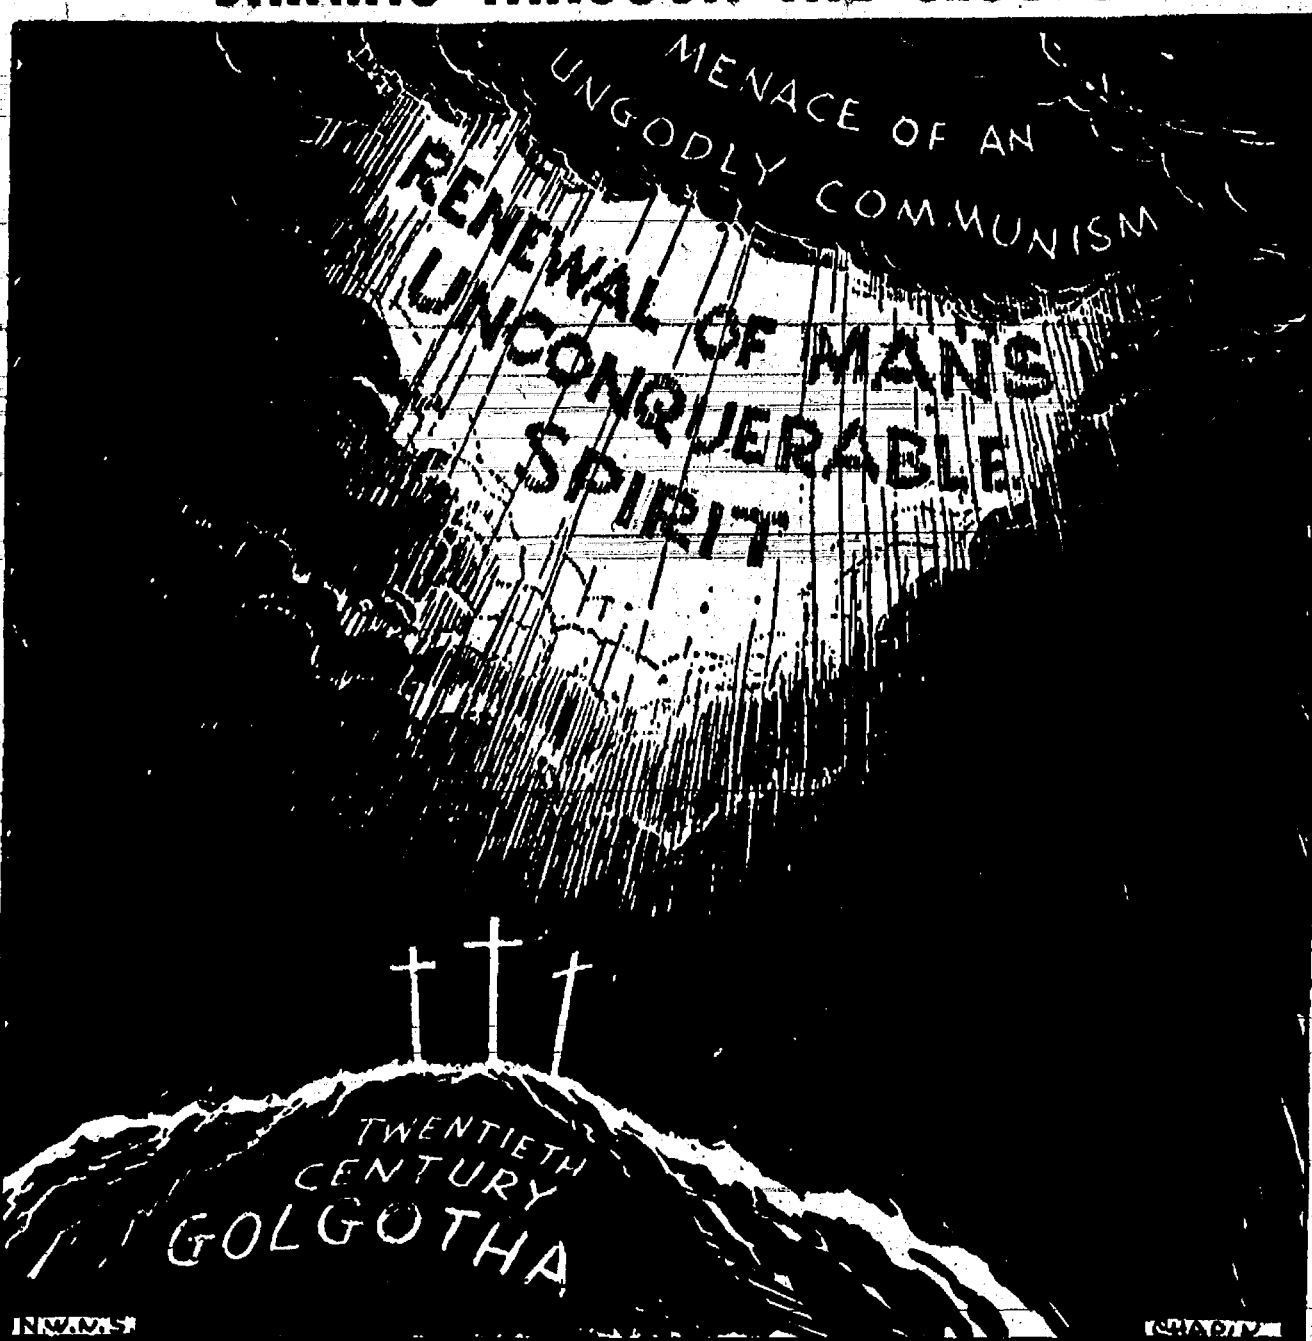

The average citizen can do little, to be

sure, but the combined interest and support of many citizens can mean much.

The Standard is happy to take notice of April as Cancer Control Month, and suggests we all lend our support in whatever way possible in the fight against a mysterious disease which still baffles science, but against which an unprecedented organized effort is now being directed.

Sure, there are splinters on the ladder of success, but you'll never notice them unless you are sliding down.

SHINING THROUGH THE CLOUDS

MICHIGAN MIRROR

By Elmer E. White, Secretary, Michigan Press Association

An immediate savings of \$3 to \$4 million will benefit Michigan taxpayers this year if the legislature approves a new financing method for a Michigan State University building program.

This feature is part of a dynamic new plan which could in a single stroke ease the critical college classroom shortage and provide a co-ordinated expansion program for MSU.

Additional advantages provided by the plan were listed by MSU's President John A. Hannah, who heartily endorsed the proposal. Hannah stated that:

1. The buildings will become available now for immediate needs.
2. The bill provides for necessary expansion without placing large demands upon the current income of the State of Michigan.
3. Assuming that building costs will continue to increase, an immediate savings will result by immediate construction.
4. Costs of the new educational buildings will be spread over future generations of students—those that will benefit most.

Heart of the proposal introduced by Senators Frank D. Beadle (R-St. Clair), Robert E. Paulkner (R-Coloma) and Edward Hutcheson (R-Penton) centers around the use of student fees.

Right now, all student fees are used as part of the operating expenses of MSU. The rest of the operating costs are supplied by the state legislature. Funds for new buildings must be approved separately by the legislature—and come from taxes. This is done on a year-to-year basis.

Under the new plan student fees would be earmarked for the construction of new classrooms and laboratories at MSU. The state would contribute no money for new buildings. Future legislatures would be asked only to provide operating expenses for the University.

Effect of the bill would be the launching of a \$50-million construction program at the East Lansing University according to President Hannah.

The new classrooms would be built during the next three years using private funds. Student fees for the next 10 years would be pledged to repay the loan.

"This new approach is needed to solve problems of financing classroom needs," Hannah stated. "Our space situation is critical and under current procedures of annual appropriations for capital outlay will (by the legislature) grow much worse."

How do we save up to \$4 million? Using the next fiscal year as an example Hannah points out that "the governor's budget proposes for Michigan State \$28,000,000 for operating expense, and \$7,314,000 for new construction, a total of \$35,314,000."

"With unpledged student fees for next year estimated at about \$4,000,000, the legislature would be asked to appropriate the full amount of operating costs, (about \$27,000,000) but nothing for new buildings. That's a difference in total budget request of more than \$8,000,000."

The plan is an outgrowth of the program adopted by President Hannah after World War II.

At that time he borrowed capital from private sources to construct dormitories, married student housing, faculty facilities, and to add to the athletic plant, health center, music and student services buildings. Loans were repaid through the earnings of these facilities.

Only classrooms and laboratories will be in the new program if it receives legislative approval. Student fees will replace the "earnings" of the earlier project as security for the loans.

As the bill now stands it applies only to Michigan State. However,

other Michigan universities and colleges desire to use the same financial arrangements, the bill can be amended to include them, Sen. Beadle commented.

A move to prevent "unjust enrichment" by trading stamp companies was underway in the Michigan senate last week.

A bill sponsored by Senators Lewis G. Christman (R-Ann Arbor) and Harold M. Ryan (D-Detroit) would require that the cash value of unredeemed trading stamps that have been issued more than seven years be paid by the trading stamp companies to the state's general revenue fund.

Legally speaking, this action would place unredeemed trading stamps under Michigan's "escheats law."

Supporters of the bill reason that:

1. The trading stamp companies sell the stamps at assigned value.
2. Some trading stamps are never redeemed.
3. The companies have received money for the stamps and they no longer own them.
4. Since the true owners cannot be determined, the value of the stamps that are not redeemed should be turned over to the state.

Actual value of unredeemed stamps is a closely guarded secret. Some trading stamp companies say it is very small.

Others contend that a large proportion of the stamps are never turned in and that the issuing companies are reaping large profits.

Washington Report

By Senator Charles F. Potter
 The latest news from Washington of special interest to Michigan.

MAJESTY AND DIGNITY are hallmarks of the United States Senate. Last week, blossoms opened in Washington, spring came to the Senate Chamber in the guise of courtly gestures and flowery phrases.

The principle of free and unlimited debate has lifted the Senate to its pinnacle as "the greatest deliberative body in the world." Occasionally—and spring can be one of those times—the principle may serve to drown a kernel of action in a sea of words. An example, Senate discussion of my bill to exempt wheat farmers from penalties for overplanting.

In a nutshell, three powerful allies stepped forward last week to support the bill—two members of the Senate Agriculture Committee and the Department of Agriculture itself, but the sage of these simple actions as they unfolded on the Senate floor covers page after wordy page in the Congressional Record, all in fine print. Democracy in action, complete with verbal curlicues, is revealed in this highly condensed portion of the Record.

Senator Potter: "Many small farmers in Michigan have an allotment of 17, 18, or 20 acres of wheat. They are being hauled into court and prosecuted when they plant one or two acres more than their allotment. It is difficult for me—and for our farmers—to understand how the Congress of the United States can fail to act. Day after day farmers are being prosecuted. For what? Because they used their wheat to feed their stock, or for seed. The farmers of Michigan are pretty independent. They cannot understand why the Congress has not acted."

Senator Humphrey: "The Senator from Michigan has an ally with the strength of a legion. I refer to the distinguished Senator from North Dakota (Mr. Young). Together they will stand as would the Spartans at the pass of Thermopylae had they been reinforced. They are like the Athenians. They

Hens Eating Up YOUR PROFITS?

Feed Economical NEW Larro SURELAY (FORMERLY LARRO EGG MASH)

You may THINK you're saving money by buying a cheap feed. But you're probably really losing potential PROFITS. Larro SURELAY produces just one extra egg per bird every month is worth \$1.12 MORE per bag.

A Leghorn hen eats about 40 lbs. of Larro SURELAY a year, so 50 hens will eat about a ton. An extra egg each month from 50 hens is 600 eggs or 50 dozen each year. Fifty dozen eggs at 45 cents a dozen is \$22.50 EXTRA PROFIT for each ton of Larro SURELAY fed.

Just one EXTRA EGG from each bird every month makes LARRO SURELAY worth \$22.50 more per ton of \$1.12 more per bag. And you'll probably find that your hens will produce an extra 2, 3 or even more eggs each month when you feed them LARRO SURELAY.

are winning all the struggles. They cannot lose. It would be helpful if the Senator from Michigan would wait the day when his measure can be reported in its full glory. With the Senator from North Dakota—and the Senator from Michigan marching arm in arm in a solid phalanx, there is no doubt that victory will crown their efforts and glory will be their reward.

"I wish to commend the Senator from Michigan. I hold in my hand a favorable report from the Department of Agriculture on his bill. The bill is now before the Agriculture Committee of which I am a member. Let me say to the Senator from Michigan that I shall make it my personal business to seek action on this bill in the committee in order that it may be reported promptly to the Senate. I give my whole-hearted assurance of cooperation and my pledge of fidelity and loyalty to the end."

Senator Carlson: "In view of the fine words of the Senator from Minnesota, I merely wish to advise the Senator from Michigan to beware of Greeks bearing gifts."

Senator Mundt: "I, too, feel that the proposal of the Senator from Michigan is excellent. We have heard today, in open meeting, the pledge and the promise of the Junior Senator from Minnesota. I might add that there is nothing the Senator from South Dakota would rather do than ride hard on the Junior Senator from Minnesota in this connection."

Senator Humphrey: "Oh, that there is ample proof already."

Senator Mundt: "I know he will not need any watching or pressuring or pushing. But if he should need it, I shall be very happy to do it."

Senator Aiken: "Coming from a dairy state, I wish to make the observation that it is pleasant to note one place where butter is used very liberally."

Senator Humphrey: "I suggest that we now have the unbeatable combination of Notre Dame and Michigan State."

Senator Potter: "And with Minnesota doing the line bucking. I am sure we will have success."

A new age of automobiles begins with this car

Here Today! The FORD SKYLINER—world's only Hide-Away hardtop

Once in a long, long while a car comes along that people remember and talk about for years after its introduction.

The first model "A" Ford was such a car...
The first Ford V-8 was such a car...
The first Ford Thunderbird was such a car.

Today Ford Division is proud to announce still another car that many say is destined to become the most famous Ford of all. The Skyliner—world's only hide-away hardtop.

If you plan to buy a new Ford, or already own one, the fact that Ford created this car is important to you. For all the exhaustive research, planning and testing that went into the Skyliner is evidence of the engineering skill you get in every Ford model.

The Ford SKYLINER, the only all-steel hide-away hardtop, is a car for history. This is an old dream of Detroit, a dream of two generations of motorists. And today Ford has made that dream come true—in steel.

But the story behind this dream is a story of men who refused to accept "no" for an answer. In the Ford tradition they kept striving toward the goal long after others had given up the chase.

To understand this Ford spirit you must go back to 1908. That was the year

when many Detroiters smiled smugly as Henry Ford announced, "We will build a motor car for the great multitude... so low in price that no man making a good salary will be unable to own one." And they did.

Today, nearly a half century later, Ford continues to cause the "experts" to change their tune. When you see this all-steel hardtop that retracts into a convertible, you'll be seeing a car that many said would never be mass-produced. But Ford did it.

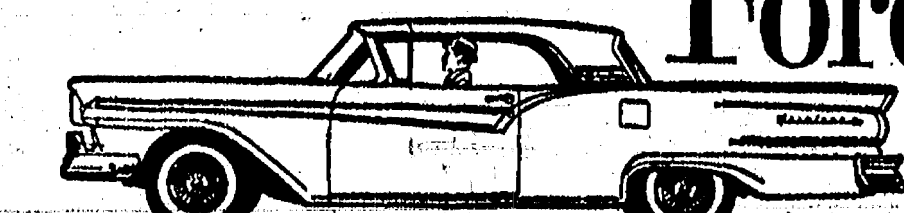

It was December 1956—after eight years of research, planning, experimenting and testing—when Ford unveiled this masterpiece... unveiled it amid all the pomp and splendor of the New York Automobile Show.

And now this history-making car, this prototype of a whole future generation of cars, is ready for your own personal inspection in the showrooms of many Ford Dealers.

Plan to see it soon. And ask your Dealer to show you the exciting advances in all models of the new Ford line for '57.

It's the newest new kind of

Ford

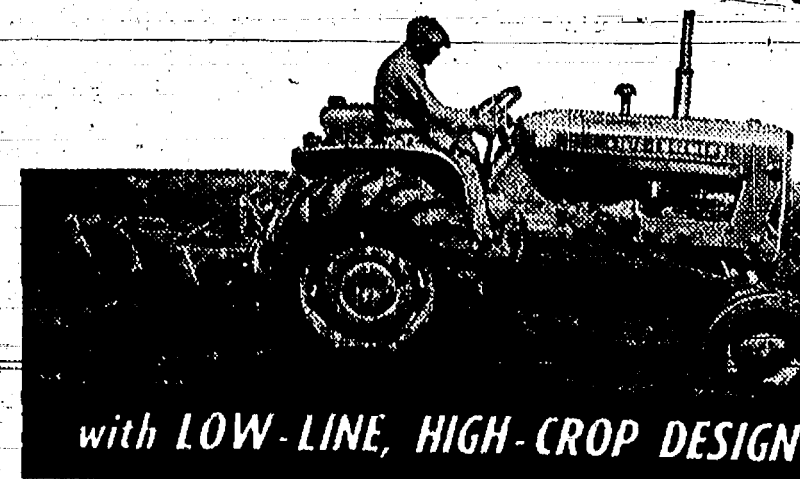

1. It's an all-steel hardtop with sleek Victoria styling... 2. Touch a button and presto! It's a fun-loving convertible!

EVERYTHING YOU DO!

FROM THE MOMENT you awaken until you go to bed, almost everything you do is closely dependent upon the operation of trucks. In fact, even while you're asleep, trucks are working for you. (Beds arrive by truck, too, of course.)

Without trucks, your favorite food market would have empty shelves. Without trucks, you wouldn't find gas stations located conveniently almost everywhere you turn. Without trucks, the building of new homes, factories, and stores would slow to a walk-and-businesses of all kinds everywhere would suffer.

Sooner or later, everything you eat, wear or use depends on trucks for transportation. Eventually, everything has to get to you—the consumer. So, when you consider that trucks haul THREE TIMES the tonnage hauled by all the other forms of transportation combined, you realize how very important they are to YOU!
