Welfare Programs Loaded with Persons Preferring Not To Work

The various welfare programs of the states and the federal government carry a great number of free-loaders and lazy-individuals who prefer to draw welfare rather than work. This, of course, is natural to some degree—and possibly never could all of them be eliminated.

But a court in New York has just given encouragement to all the bums and free londers, with a decision over-turning 12 of the now-famous tightened welfare regulations of the City of Newburgh, N. Y.

It may be remembered that the governing authorities in that city became so exasperated with the loafers and the lazy that a greatly tightened welfare qualification program was announced. A court battle followed, as both federal and state agencies and authorities went to war against the Newburgh

... Among the tightened regulations which the New York State court decision recently overturned were the following

1. Welfare payments were to be issued in voucher form 2. All able-bodied males on relief were to report to the City Public Works Department.

3. Those reliefers who refused employment were to lose welfare payments.

An examination of these eight rules (there were four Members of both parties agree year, GOP leaders blasted the de-creases each year in the number ily" and enjoying it very much; about 50 area leaders asking them others which were overturned) will show that they are on the problems in each area, but partment for not spending money of applicants for post-high school those in the second grade, those to be present at a meeting in designed to discourage laziness, idleness and a willingness to their solutions are far apart. draw relief rather than work

Remember? The weather forecast was sort of uncertain, but it looked so nice when you finished breakfast you decided to wash anyway. And by the time the clothes were ready for the line, brother, there it was, rain, a cold wet river of
