## Grid Season Opens Friday Against Milan

Chelsea High school Bulldogs open their 1962 football campaign at Chelsea tomorrow evening against always tough arch-rival Milan.

With the Kiwanis trophy again at stake, the Bulldogs will be trying for their first victory against the Big Reds since 1958.

As game time draws near it appears that it could be pretty much a battle between what is hoped will be a well-balanced Chelsea attack against Milan's size, however, in an opening game quite often the team that can shake the opening game jitters and make the fewest mistakes in the team that's in the driver's seat.

This could very well be one of the most interesting games of the season. Kick-off will be at 7:30 p.m.

## Receipts from Senior Stand Stolen Late Saturday Night

An unhappy note was injected into the closing hours of Chelsea's Community Fair when two unidentified young men escaped into the crowd at 11:45 p.m. after snatching a bag containing receipts of the Senior class booth from a parked car on the grounds.

The two suspects were seen loitering in the area just before the theft was discovered.

The exact amount of money taken was not immediately determined.

### Can We Still Remain Competitive In World If Work Week Is Reduced?

The AFL-CIO Council recently voted to initiate a campaign for a 35-hour work week, with no loss of pay. That means the official goal of organized labor is to reduce the work week by five hours, while requiring the employer to pay the same wages for 35 hours that he has been paying for 40.

One would not take the vote of the AFL-CIO Council too seriously were it not for the fact that organized labor seldom, if ever, backs down from a goal for new benefits once the goal has been announced. Perhaps it is only natural for the leadership of any organization to take that position.

Nevertheless, the current demand for a 35-hour work week is a serious threat to the stability of the United States, both on the domestic scene and on the international economic front. Perhaps the international scene is the more perilous.

The United States dollar is undergoing a severe test at this time and one of the primary causes of this is the inflation which has overtaken the dollar since the end of World War II.

The Russians are not talking about a 35-hour work week but are striving bodily to outdo us and are catching up in various fields of economic endeavor.

For those who love the free enterprise system, with its free rather than slave labor, it would be a good idea to seek ways to increase our productive efficiency rather than to lessen it in these times of challenge from Russian Communism.

### Present Education May Seem Costly But Is Cheap Compared to Ignorance

The process of education in our nation has made tremendous strides since the ancient days when the "three R's" were supposed to compose the curriculum of modern school.

While it is true that the fundamental problem of our institutions of learning is to give the student a proficiency in the use of so-called tools of the brain and, if pursued long enough, to acquaint the mind with the broad outlines of man's progress from savagery to civilization, the scope of the modern school has been widely expanded.

Not only are our schools expected to perform the rudimentary task of educating pupils, but, in addition, to train them for democratic processes, to teach them to get along with other human beings, instruct them in a trade for their economic livelihood and to assume much of the task of the home and church in the development of morality and conscience.

When one considers the vastly extended ramifications of the processes of teaching, there is no occasion to wonder at the increased cost of "education." Nevertheless, when we think of the expense involved, we should also bear in mind that ignorance is the most expensive luxury ever enjoyed by careless people.

Dwight D. Eisenhower, former President:  
 "I believe the problem of the presidency is rarely an inadequacy of power. Ordinarily the problem is to use the already enormous power of the presidency judiciously, temperately and wisely."

Charles de Gaulle, President of France:  
 "We must help to build Europe, the real Europe, the Europe of peoples and consequently of states and not the Europe of words, myths and schemings."

## LIFE'S UNFORGETTABLE GOOD-BYES

## MICHIGAN MIRROR

By Elmer E. White, Secretary, Michigan Press Association

Michigan voters enjoy a position unequaled in most states. They are able to hear the results of their polling in a matter of hours after the ballots are cast because of the extensive use of voting machines.

Secretary of State James M. Hare reports the use of automatic voting machines has increased steadily through the years.

This November, only about 635,000 registered voters will use paper ballots, while the other 3,975,000 voters will have machines at their precincts.

Of the 5,199 precincts in the state, 28.4 percent or 1,477 units, are "paper precincts" while 3,722 are "machine precincts," Hare said.

"Despite the widespread use of machines, only four of Michigan's 83 counties are completely mechanized," Hare said. These are Bay, Kalamazoo, Muskegon and Ottawa counties.

"There are a number of counties, however, where less than 10 percent of the electorate use paper ballots," said the Secretary of State.

The State Corrections Department operates basically six institutions which annually house upwards of 9,000 persons convicted of a crime.

Included under the department's jurisdiction are the Southern Michigan Prison at Jackson, the House of Correction and Branch Prison at Marquette, the Michigan Reformatory at Ionia, Cassidy Lake Technical School near Chelsea, a medium security institution at Ionia, and the Detroit House of Correction.

In addition several prison camps and a 100-man probationary recovery camp for youthful re-

probationers near Traverse City are operated.

A 1953 legislative act charges the department with the responsibility for carrying out the state's adult prison, probation and parole systems at the order of a commission appointed by the Governor and under the administration of a director named by the commission.

Female inmates are confined at the Detroit House of Correction. A few male inmates also are placed in this institution to assist in general maintenance and operational requirements.

In addition to those incarcerated under state laws, the department is responsible for supervising probation services. This involves more than 5,000 persons in an average year, department officials said.

### Uncle Lew from Lima Says:

BEAR MISTER EDITOR:  
 I see by the papers where Secretary Dillon carries the keys to the money box in Washington has final got around to fixing the official shortage for the 1962 fiscal year. He says we come up 6 billion short this time around.

On account of this being the 26th time we been short in the last 23 years, I reckon some papers didn't even mention it. I'm just setting the fingers down in case my banker thinks I'm the only one short around here.

Per quite a spell now the most popular thing coming out of Washington news stories is the words "billion dollars." It's a billion dollars here and a billion dollars there and a billion dollars everywhere. It's got sure it's hard for them Washington reporters to get through the first paragraph of anything without saying something about a billion dollars.

They ain't many folks, including me, that's got any idea of how much a billion dollars is and we get used to taking this item for granted ever morning like we take our coffee. Well, Congressman Frank Row came out not long ago with some figures that the taxpayers back home can understand. He says, for instance, if you give your old lady a billion dollars and tell her she can't spend but \$1,000 a day of it, she won't pester you for money no more for another 3,000 years. Now that is language, Mister Editor, that I can understand, and it's the first time I've had me a good idea of how the money is flowing in Washington.

But the best item I've saw come out of Washington on the situation come from Senator Cotton. He allows as how things is "always a riot of colors along the Potomac." He says the lawns is green, the sailors is dressed in white, the Pentagon boys is wearing gold uniforms and the Government is running around in the red. Yep, I reckon things is right colorful along the Potomac.

Well, it appears the Estes hearings will last out another phisical year. When you git this case boiled down, it looks like they got him charged with gitting money for putting fertilizer that didn't exist in storage tanks he never built. Maybe, Mister Editor, he was putting this fertilizer that didn't exist on them crops the Government pays farmers not to grow. I'm a little confused, can't figger out which one ought to be the defendant in this case.

I bring this item up at the country store Saturday night and Ed Doolittle was of the opinion that if Estes had put the non-existent fertilizer in Surplus and the non-existent storage tanks in the Soil Bank, everything would be legal and he could appeal his case to the United Nations. Personal, Mister Editor, if I ever git un-confused just once, I'm going to quit reading the newspaper.

Yours truly,  
 Uncle Lew.

**Decision Due Wednesday On PTA**

At Chelsea High school cafeteria next Wednesday at 8 p.m. interested citizens of the school district will decide the fate of the Chelsea PTA. This, the fourth article on the PTA in four weeks, is intended to give a preview of the possible outcomes of that meeting.

If a president is elected to the group, the PTA will continue to exist. If no president is elected, the organization will cease to exist and the meeting could be an organizational meeting for a new or more new parent-teacher group in the Chelsea schools.

Possible groups to be organized include a Senior High PTA, a Junior High PTA, a secondary school PTA (grades 7-12), a Senior High PTA (Parent-Teacher-Student Association), an elementary school PTA for both schools, a separate group for North and one for South, or a combination of elementary school clubs of some other type of group.

James Hoffmeyer, elected president last spring and acting chairman, recently called a joint meeting of the PTA executive committee and school administration to discuss the current status of the PTA. This group has no authority to make decisions for the PTA nor to recommend solutions to its problems, but the members of the group have come up with suggestions for consideration next Wednesday evening.

The suggestion is that the Chelsea school district organize an elementary school PTA and a separate secondary school group could split up the Senior High and Junior High organizations.

Prior to the business meeting (or organizational meeting) Wednesday, teachers will be introduced as will members of the Board of Education.

**Fair Parade . . .**  
(Continued from page one)  
fashioned of paper as the principal decoration.  
A fourth float in this category, which received an honorable mention award from the judges and attracted favorable attention all along the parade route, was that of the sophomore class at Chelsea High school. In the form of a rocket, the entire body was covered with thousands of white paper napkins attached to give a floral effect. Two "exhaust pipes" at the rear, realistically belched forth "smoke" at intervals. The theme, as displayed along the sides was "We're Rocketing to Success as Tomorrow's Leaders."  
Other floats admired by many who saw the parade included those of the Wide Awake 4-H club, entitled "Get In The Picture," a promotional idea for 4-H club work; the CHS Class of '60 in yellow and blue with the theme "By The Sea"; Blue Ribbon Florists 4-H club, "Living With Flowers"; Boy Scouts, saying "Thanks for the Canadian Trip," and Class of '64 stressing an athletic theme with the title "Bulldogs Champions."  
Judges for the parade floats

were County Clerk Mrs. Luella M. Smith, Roy Tice of Ann Arbor, and Robert W. McGrory, County Extension Agent, 4-H.  
Chelsea High school's uniformed band members drew applause along the line of march in Saturday's Community Fair parade, as they appeared near the rear of the parade and the Waterloo Band, riding on a platform truck at the end of the parade, was also given appreciative applause.  
The two bands, together with the three bands of the Chelsea schools, provided stirring music which added to the enjoyment of the big event of the final day of the 1962 Community Fair.  
The Sheriff's Department Auxiliary Mounted posse, Sheriff's Junior Deputy group, Sheriff's Junior and VFW color guard; and the VFW Auxiliary flags and banners gave color to the parade.  
In addition to the prize-winning floats and those already mentioned, floats were entered by the Kiwanis Club, Joe Merkel, and Chelsea Chamber of Commerce.  
The remainder of the parade included U. S. Army jeeps and trucks, farm machinery, antique cars, horses and riders, and village and Fair officials riding in cars.

**Card of Thanks** — Nine out of 10 cars and trucks in Michigan are registered in 41 counties south of the Bay City-Muskegon line. Five of these counties—Wayne, Oakland, Macomb, Kent and Genesee—account for 55 percent of the 3,400,000 registered vehicles. More than 1,000,000 vehicles are registered in Wayne county alone.

The state's first permanent settlements were made at Sault Ste. Marie in 1668, and at St. Ignace in 1671 by Father Dablon and Father Marquette.

**Card of Thanks** — Money is not the main strength of the organized churches but, since they operate in a material world, they need some of it.

Chelsea Lanes Offered as Center for Senior Citizens

According to insurance company reports a person 15 years old in 1935 could expect to live to age 60. Compare this with age 79 which is the age that the average 15-year-old of 1960 is expected to attain.

Statistics also show that these older people are much more active than ever before. Of the 179 million Americans, 15 1/2 million have reached age 65. Today, the number retiring each year hits one million and this is on the increase as evidenced by another 16 million who are between the ages of 65 and 69.

Most doctors recommend bowling as recreation and healthful exercise for Senior Citizens. A new organization known as "United States Senior's Bowling Association" has been approved by both ABC and WIBC.

Doctors and ministers as well as the Women's Club are very much in favor of organizing a Senior Citizens' group where our retired workers and other able bodied seniors can meet as independent individuals, plan their own special festivities and in general "be on their own."

**THE LETTERBOX**  
 Sept. 8, 1962

To the Editor:  
 The disgraceful conduct of the AFL-CIO toward George Romney at the Detroit and Muskegon Labor Day rallies should surprise no one. It was another example of the union's contempt of the ways of democracy.

I don't think the knowledgeable Mr. Romney really expected justice from the labor bosses when he asked for permission to speak. A labor union which for years has mistreated and abused those of its own membership who try to exercise their constitutional right to hear and be heard and make voluntary political decisions, can hardly be expected to give Mr. Romney fair treatment.

Wayne County AFL-CIO President Al Barbour told the Labor Day crowd:

"Labor Day is a day when we invite our friends to join in the celebration. And we have certain yardsticks by which we determine who our friends are."

Here we have, well expressed, the thinking of a Little Tin God. When Al Barbour says "we" it is generally understood in union circles that he is speaking of guys like Barbour, Scholle, and Reuther.

Who might be described as the big three of the big we. Now obviously, Mr. Romney did not claim a seat on the speakers' platform because of an extended romance with labor bosses.

George Romney is the gubernatorial candidate on the Republican ticket. He is the spokesman and representative of the half million or more Republican workers who will vote for him in November.

The problems and interests of all these people are discussed at Labor Day rallies and one could hardly expect Mr. Romney to appear anywhere else. Where did Mr. Barbour expect him to go, water-skiing at Ravello?

Something ago Michigan AFL-CIO President August Scholle hooted and heckled when George Romney confided that he prayed to God for aid in making decisions. It seems the AFL-CIO wishes Mr. Romney to direct his words to neither God nor man.

To Mr. Al Barbour of the Wayne County AFL-CIO let me say this: You use your yardstick and I'll use mine. You choose your party and I'll do likewise. You encourage others to think independently and so will I. You give moral support to the down-trodden Republican minority in the AFL-CIO, and I'll lend my support to the Negro in bigotry-ridden Albany, Georgia.

And Al, please stop acting like a Little Tin God!

 Former Member, UAW-CIO

**Trees Available from Conservation Dept.**

**For Reforestation Uses**

Lansing — More than six million young trees raised by the Conservation Department are now on sale to landowners under a new system in which stock may be ordered for shipment this fall or next spring.

In the past, orders have been accepted only for the immediate planting season. The two-season system is designed to step up reforestation on private lands by allowing owners to plan further ahead in obtaining stock for future timber production, erosion control, and farm windbreaks.

Red pine leads the list of seedlings and transplants being offered, totaling about 3,760,000 trees. Also available are white pine seedlings, 600,000; jack pine seedlings, 375,000; white spruce transplants, 900,000; Austrian pine seedlings, 280,000; white pine transplants, 180,000; and Norway spruce transplants, 216,000.

Official stock price lists and order blanks may be obtained from the Department's forestry division in Lansing or locally at offices of district foresters and county extension agents.

**JFK ON ROCKETS**

President Kennedy has stressed the point that Russia is ahead of the United States in creating big rockets necessary for farflung space travel.

But he added that the United States started late and a tremendous effort is now under way and indicated that by 1970, the United States will overtake its Soviet rival.

**Health Service Warns of Expected Flu Outbreak**

Lansing — The Michigan Department of Health has received a warning from the U. S. Public Health Service that a new outbreak of Asian flu is expected this winter.

The public health service has recommended that persons in the following categories be vaccinated:

- All persons 45 years of age and older, particularly those over 65.
- Persons of all ages who have chronic cardiovascular, pulmonary, renal, or metabolic diseases.
- Pregnant women.

Although the influenza virus may not be more likely to infect persons in these specified groups, the occurrence of influenza in these persons is more likely to be a life-threatening event, the public health service warned.

The Michigan Department of Health recommends that persons in the chronically ill group and pregnant women seek the advice of their personal physician in regard to influenza vaccination.

Since there is a reasonable probability that epidemics of influenza A-2 (Asian) will occur during the coming respiratory disease season, serious consideration should also be given to immunizing those in medical and health services, public safety, public utilities, transportation, education, and communication fields. In industries and large institutions where absenteeism is of particular concern, large-scale immunization programs are encouraged.

For initial immunization, two doses should be given about two months apart, starting as soon as possible after Sept. 1. Persons who received influenza vaccine last year need only a single booster shot this fall.

Since the influenza vaccine is produced from chick embryos, the health department has advised persons allergic to eggs or chickens not to take the vaccine.

**Youths Injured When Car Strikes Utility Pole**

Mike Daniels, 17, son of Mr. and Mrs. James Daniels, and Douglas Sprague, 10, son of Mr. and Mrs. Graham Sprague, were injured, neither seriously, when the car in which they were riding struck a telephone pole on West Middle St. Thursday evening. The accident occurred at 9:55 p.m. in front of the Washtenaw County Road Commission garage property.

According to investigating officers' reports, the accident resulted when the driver—Daniels—reached over to the glove compartment and momentarily lost control of the car.

Daniels' injuries were listed as a lacerated knee and Sprague's as a broken arm and head lacerations.

No other major metropolitan area in the United States has as high a proportion of its families living in single homes which they themselves own.
