SECURITY

The Chelsea Standard, Thursday, February 12, 1976

from better

Continual uncertainty is mental torture. It is a psychological fact that people are healthier and happier when they are secure.

Only in recent years have psychologists and pyschlatrists begun to analyze man with a new dimension in mind. This new important dimension is "Faith." "Faith in a Supreme Being." they say, "brings stability and security."

No one knows better than God, our Creator, how harmful it is for man to continually feel uncertain. God never intended for His creatures to be insecure, and man never was - until he sinned and turned his back on God.

God didn't let it go at that, however. In His great love, He made a marvelous provision for mankind, so that they need not grope blindly for something on which they might stake their future. God made the supreme sacrifice—He gave His own Son, Jesus Christ, to die for our sins. When we trust in His shed blood we are forgiven. We are then the sons of God-and we are assured of an eternity with Him.

Come unto me, all ye that labour and are heavy laden, and I will give you rest.

Take my Yoke upon you, and learn of me; for I am meek and lowly in heart; and ye shall find rest unto your souls.

For my yoke is easy, and my burden is light. Matthew

Full implementation of the mass transportation act will give handicapped people more opportunities to travel. One system, Amtrak, the Government - subsidized railroad corporation, is now making its trains and stations accessible to handicapped travelers.

Today frequent air travel is a fact of life for many Americans. It is also the most comfortable and convenient way for physically disabled people to go long distances. Most airlines have served us well, but as more physically disabled people have traveled by air, the airlines have imposed more restrictions. Disabled individuals and concerned organizations are working to change air

Transportation is only the beginning of the travel problem for disabled people. Accomodations also can be hard to find. No matter how luxurious a hotel room, it doesn't do me much good if my wheelchair can't fit through the bathroom door. Ten or fifteen years ago, few hotels even considered the needs of handicapped people. Today, a number of large chains such as Travelodge, Howard Johnson, Quality Irins, Ramada Inns, and Holiday Inns of America provide a certain number of ac-

Vice-President Rockefeller said in his acceptance speech, "There is nothing wrong with America that Americans can

Abraham Lincoln in 1838 tells us HOW one of today's major wrongs can be made right — "Let every American, every lover of liberty, every well-wisher to his posterity . . . swear never to violate in the least particular the laws of the country. Let reverence for the laws be breathed by every American mother, let it be taught in the schools, in the seminars and in the colleges. Let it be preached from the pulpit, proclaimed in the legislatures, and enforced in the courts of justice. If bad laws exist, they should be repealed as soon as possible. While still in force, they should be religiously observed."

Both quotations make sense . . . The first is mainly rhetoric. The second is definitive. Need more be said? . . . BURGHARDT FUNERAL HOME, 214 East Middle St., Chelsea, Mich. Phone 475-1551.

North School Notes

FROM THE PRINCIPAL-North school was visited by Mrs. Eulahlee Packard, Mrs. Mary Kniss, and Mrs. Norma Seyfried of the Chelsea VFW Auxiliary. They presented classroom flags to several classrooms that have been added to North school. The pre-sentations included a talk about the significance of the flag to our country, some history of the flag; flag etiquette, and the recitation of the pledge of allegiance by the classes involved. They also presented a book about American flags to the media-center, and a desk flag to the principal.

Teacher: Mrs. Dykstra Mrs. Dykstra's 3rd grade has been working hard since Christmas. In math, we have moved on from multiplication to geometry for a while. While learning about shapes and angles and lines we keep practicing our multiplication facts.
In English we are learning how
to write good letters. Some of us

Teacher: Mr. Smith
This month has been a fun month elle Fletcher. for us so far. We gave away all of our gerbils and got a new pair of young gerbils to keep in our room. Our rabbit is doing time, sometimes we let him out to hop around the room. He is half wild and half white rabbit so he has some funny instincts which make him hop around very funny when he is loose.

We have been studying the human body and have made some diagrams of different parts of our bodies. It is very interesting to learn how important our five senses are and how we take them

We had a couple of birthdays in January: Marie Bulick and Re-becca Lee. We were going to have a nice party on Rebecca's birthday but school was closed be-

In social studies we have been working on the Bicentennial and have learned a lot about the first years before we became a country. Some women from the VFW came to the 3rd grades and presented us with a new flag and a Bicentennial calendar. A lot of our kids have made good reports for a big Bicentennial bulletin board we have made.

We are looking forward to celebrating Washington and Lincoln's

brating Washington and Lincoln's birthdays this next month and also are ready for a Valentine's Day party. See you next month.

Teacher: Mrs. Schlupe
Mrs. Schlupe's class has been working diligently on their times

tables. Most of the class knows the multiplication facts through times five. We have used products and factors in family of facts and have made our own multiplication tables. We also made fish which have the correct answers on the back so the class can check themselves.

Our class has learned many interesting things about the planets in our solar system. Each child chose the planet they were most interested in and gave a report to the class about it. The class wrote great stories

about the Boston Common in the 1700's to coincide with our social studies unit on Boston. We are all looking forward to South school's fun fair on Friday.

Everyone is sure to have a great

FOURTH GRADE-Teacher: Mrs. Hafer Reporters: Kim Kleis,

Steve Ramsey Our class had a good idea for the birds. Some of the kids in our class went down McKinley St. and got some old Christmas trees and brought them to school to put in the outdoor courtyards. Then we decorated them with strung popcorn; took halves of grape-fruit and put bird seed in them; pine cones with peanut butter on them. We haven't seen any birds

but the popcorn is disappearing. We have also made a lot of origami. We have made cats, dogs, and peacocks. Walter Gray got a book from the library on origami and took it home and made a

Wrestler of the Week

SOPHOMORE VARSITY WRESTLER, RICK BEEMAN, at 132pounds, has posted a 4-13 record for this season. A record, he hopes to see improve. Rick said that he likes wrestling over all other sports because of the individual aspects. And commenting on what he termed "a not too good season," Rick said he had a lot to learn about outsmarting and out-maneuvering his opponent. He even plans to wrestle when he goes to college. Rick also wrestled last year with the varsity grapplers at 119 pounds. He is the son of Mr. and Mrs. Donald Beeman of Waterloo Rd.

DEAN THOMPSON (14): "We've got to give ourselves a lot of credit," says junior guard Dean Thompson. "We've lost players. we have had a bad season, but we haven't fallen apart. We just hang in there." Thompson who stands 5'11" is in his first year with Chelsea High school's varsity basketball team. "I like basketball. I've always liked basketball. I've been playing since the 7th grade." Dean said that at the beginning of the season he was starting, but that now Coach Balistrere is working with some different combinations that leave him coming off the bench, though he stresses he doesn't mind. For Dean it is all good experience for next year. "Our (the juniors) year will come next year," he commented. He then remarked he is anxious to see next 'year's line-up when some of the talented junior varsity players are promoted. Dean is the son of Mr. and Mrs. Donald Thompson of 227 Washington St. He has two brothers, one of which, 15-year-old Dennis, plays basketball, and a sister.

duction of "The Physicists."

The play will be shown Feb. 11-14 at 8 p.m. at Bush Theatre on the CMU campus. The plot concerns three scientists who feign insanity to commit themselves to an asylum run by the autocratic and scheming Fraulein von Zand.

They assume the names and characteristics of King Solomon, Sir Isaac Newton and Albert Einstein, with "Newton" and "Einstein" attempting to persuade "King Solomon" to divulge his secret scientific formula and make it available to them.

A set of circumstances, a triple murder and the Fraulein's duplicity pose an insurmountable problem for them and they are faced with the chance of being captives of their own masquerade for the rest of their lives.

William Haushalter of CMU's Theatre and Interpretive Arts area is director of the dramatic comedy. Jeff is the son of Mr. and Mrs. Robert Daniels of 665 Washington.

Facts About Food Sometime shortly after the discov-

ery of fire, historians say a caveman dropped a piece of raw tiger meat in-

to flames. When he tried to retrieve it, he only succeeded in burning his

fingers. Instinctively, he licked his fingers. And thus did man have his first taste of cooked meat. Today his descendents are doing just about the same thing...including sometimes burning their fingers...only they\use an oven or a rotisserie or a charcoal grille instead of an open fire. And, here in America at least, they do it on a scale their cave-dwelling ancestor could hardly have com-

prehended. In fact, the meat industry...which includes the raising, marketing, slaughtering, and processing of animals for meat...is one of America's largest. We have some three million farms and ranches where animals are grown, plus something like three thousand major meat slaughtering plants and over thirteen hundred meat processing plants, plus hundreds of small-

er local slaughterers. Last year, for instance, Americans consumed about 35 billion pounds of red tatd more than 80% of the cattle, hogs, sheep, lamb and claves were slaughtered under federal government inspection.

Which just shows how far we've come. The first federaleat Inspection law was passed back in 1890, but it applied only to meat going overseas. It was in response to complaints from France and England about th quality of U.S. beef reaching their tables.

Today nobody...here or abroad...has any beef coming obout American meat, It's the best in the world...and we like to think Polly's has the best in town.
