"Oh, sweet, sweet, sweet," the maiden said,
As she twined her hair with flowers;
From bird and blessom the echo sped
Through the long and blissful hours.
"Oh, sweet, sweet, sweet," rang the joyful tune."
"Oh, sweet, sweet, sweet, is the world in June." "Oh, sweet, sweet, sweet," the swallow sung
On the summer's dying night;
And "Sweet, sweet, sweet," the echo rung,
As the robin plumed for flight;
"Oh, sweet is the summer when just begun,
sweet, sweet, sweet, when her life is done."

But the maiden, never a word she said,
As she donned her weeds of woe;
The bird that sung in her heart was dead,
With the summer of long ago;
The sweet, sweet, of the bloom and
As idle mocking her dull ear heard. Oh, sweet, sweet, is the whole gla

earth,
When the summer days are here;
And sweet, sweet, sweet, is the time of dearth,
Though the autumn days are drear;
If only deep in the heart is heard
The gladsome song of the "singing bird."

It was an hour after the table d'hote dinner, but still too soon to go to bed, too early even for the 'early-to-bed-early-to-rise' members of three distinct walking parties, who were conversing in the long low salle of the small hotel dual kind. Outside the open windows, the summer sky had deepened into the lovely gray tints, with a broad streak of tender green where the red-gold sunset had but lately faded away; the mighty range of mountains had lost all detail of form, and was massed in purple, almost violet shadows, the jagged outlines standing grandly out against the pallid sky. Indoors, the semi-darkness was made visible by the yellow flicker of half a dozen miserable oil lamps, that seemed to throw curious shadows on ceiling and walls, and to bring into startling prominence the defects of everybody's face and features. Yet in this fitful light the group of English travelers was conversing pleasantly, nay, merrily enough.

The first walking party consisted of four people: Mr. and Mrs. Gray who were a young couple; the middle-aged and Reverend Timothy Browne; and a relation of Mr. Grey, an elderly spinster, who owned the name of Brackenthorpe. This lady was known to everyone as 'poor Miss Brackenthorpe,' the exact reason why, 'tis hard to tell. She was not good-looking, but neither was she espe-cially the reverse; she was not blessed with remarkable talents, but we are not all born clever; she was certainly far from rich, but in this particular she was not unlike a good many of her neighbors. Yet she was never spoken of amongst her friends and acquaintances except as 'poor Miss Brackenthorpe.'

The members of the second company were brother and sister, a strong 'langlegit pair of Aberdonians; whilst the third walking party consisted of nobody but himself. He was a young, goodlooking party on a solitary excursion through Switzerland; he had ascended most of the high peaks, and crossed the most dangerous passes, and, having but few new worlds to conquer in those parts, he was 'doing' Switzerland for ite guide) and loved him like a brother; place, the Reverend Timothy Browne? at least that was the young Englishman's own version of their relations, as he pointed with a lazy gesture over | ed by his young friends' invitation, was his shoulder to the porch of the hotel, called upon to counterbalance poor Miss which was visible through one of the open windows, and where two or three a led his mis-ion very well. Yet she had the fact that she possessed two pale gray orbs that were altogether her own, Miss Brackenthorpe was not unlike one of the Fates, after all. The Michigan Central Railroad, with its connections at Chicago, affords the most direct and desirable route of travel from Michigan to all points in Kansas, Nebraska, Colorado, Texas, Minnesota, Dakota, Manitoba, etc. Michigan Central trains make sure and close connections at Chicago with through express trains on all Western lines. Rates will always be as low as the lowest. Parties going West this Spring will find it to their interest to correspond with Henry C. Wentworth, General Passenger and Ticket Agent of the Line, at Chicago, who will cheerfully impart any information relative to routes, time of trains, maps and lowest rates. Do not purchase your tickets nor contract your freight until you have heard from the Michigan Central.

The czar of Russia is dead, the manner of his decease being explained in the following telegram from St. Petersburg:—As the emperor was returning from the parade at the palace of the Grand Duke Michael about 2 o'clock inday afternoon, a bomb was thrown and exloded under the czar's carriage, doing consid erable damage to the carriage. The czar alighted unhurt, but a second bomb exploded at his feet, shattering both-legs below the knee, and inflicting other terrible injuries. The czar was immediately conveyed in an unconscious state to the winter palace, where he died at 4:30. Two persons are concerned in the crime, one of whom was selzed immediately. The explosion also killed an officer and two Cossacks. Many policemen and other per-

sons were injured. Accounts of the czar's astroination do not fully agree in the particulars and the authori-

The czar was returning in a covered carriage from Michael manege about 11 a, m., with his brother, the Grand Duke Michael. His escort consisted of headquarters troops of Cossacks, and several officers of the household accompanied him in a sleigh. As the carriage was passing along the banks of the Ekaterinofsky canal, immediately opposite to the imperial stables, a bomb was thrown by a man who was standing behind a knot of peman who was standing behind a knot of pedestrians who had stopped to see the emperor go by. It exploded with a terrific crash right under the body of the carriage, the splinters flying across the street, but doing no injury beyond tearing away the back part of the carriage. The czar, on hearing the crash, opened the door and jumped out, and while drawing his fur cloak around him a second bomb, thrown from a knot of lookers on, exploded at his feet. There was a howl of pain ploded at his feet. There was a howl of pain and of anguish from the Cossacks, some of whom were killed and more wounded by the of police, who were just going on duty at the imperial stables. As the smoke lifted the czar was lying on his back beside the wreck of the carriage, his legs torn and shattered, and the carriage, his legs torn and shattered, and the blood pouring from ghastly wounds in his thighs. His cloak and wearing apparel were literally torn from his back, he was deathly pale, and his cries to the officers of the household for help were scarcely audible. Col, Djorjebeski, of his suite, who was badly injured by the second explosion, raised the emperer from the ground, and with the aid of the Cossack officers lifted him into a sleigh and conveyed him to the winter palace, where a mounted messenger had previously arrived with the news.

When I arrived at Kilmurrey, one hose storms which come from the Atlantic, and in an instant envelop the islands in a cloud of wind-driven mist, made me seek refuge in a cabin. It was a crowded, busy peasant's home, and as I sat by the fire—the warmest seat being given me with the invariable hospitality of these people—I found ahundant material for observation and reflection. Whatever cleanliness was possible in a family of eight occupying one huge room along with two pigs was carefully maintained; at least, the mother and children were neatly and swept, and the pigs were confined to the limits assigned them. An eld woman was carding wool, a child rocking a cradle, and the mother spinning at a large wheel. The chickens, also driven in by the rain, one by one hopped up a ladder to the roosts among the rafters, from which they watched over their grown asparagus bed. ruffled feathers the busy family and the blazing hearth with so much approval and satisfaction that I am sure, if too thick. To get mammoth "grass chickens be susceptible to emotion, these were very tender ones indeed. A dog sneaked in, and seeing a stranger, went out into the rain again. The dogs, which are not numerous on the island, are of the most miserable and condemned aspect, and seem to feel their ignoble ancestry, as they invariably jumped over a wall or ran into some obscurity on the approach of a stranger. While drying my dripping garments, I saw for the first time, seated in a corner, as if to screen himself from observation, the figure of a young man clad in white flannel, the costume of the island. His face was thin and sad, and of the same color as the garments he wore, and he gazed at the fire with such a dejected and hopeless expression that led me to infer that he was the fated victim of some terrible disease -- consumption, perhaps-and was feebly waiting through the long hours of the day and night for the death he knew to be sure and near. Well, if you the unfortunate sincerity of men, and I could not refrain from deploring the wish to have that pleasure, this is the way to obtain it: While the fruit yet hangs green upon the tree, make up your mind which is the very biggest, and most promising specimen of all, Next, cut from thin tough paper the initials of the name of your little brother or sister or chief crony, with round specks for the dots after the letters, and the letters themselves plain and thick. Then paste these letters and dots on that side of the apple which is most turned toward the sun, taking care not to loosen the fruit's hold upon its stem. As soon as the apple is ripe, take off the paper cuttings, which, having shut out the reddening rays of the sun, have kept the fruit green just beneath them. so that the name or initials now show suit to be married in, and which thereplainly. After that, bring the owner of the name to play, near the tree, and say presently, "Why, what are those queer marks on that apple up there!" We know a Seckel from a Bartlett pear when we see it, or a Knight's Marrowfat pea from a Prussian Blue; but when we ask for the characteristics of the won derful varieties of asparagus, we are simply told that they are larger than the old ones everywhere.

It is not for us to settle these weigh ty questions of differences. They ma be good and valuable kinds for all we know. We hope they are. Yet it i quite certain that we have seen just as large asparagus from any ordinary bed all that the improvers can claim, it is: small one. Any one can get as large and as good asparagus as he can desig from seed gathered from any well

The fault of many who desire goo asparagus is that they set the plant the roots should be set not closer that two feet apart. A very rich soil is essential to good asparagus, but this ma be near the surface and above the roots The common practice of digging down deep into the clay soil is an injury, and many plantations fail from just this extra labor in doing things "well." The asparagus is a seaside plant naturally, and grows in sand or sandy soil in which the water passes rapidly away The necessity of having the roots hig and dry, instead of deep down in a well, is well understood by the English who generally plant the asparagus i raised beds four feet wide, and often as much as eighteen inches above the sur rounding surface.

We feel sure that if the hints we have given are attended to, any of the old-fashioned asparagus beds will give seed which will make plants that will give any one satisfaction.-German town Telegraph.
