CHELSEA, MICHIGAN, THURSDAY, JUNE 7, 1906.

WHOLE NUMBER 902.

CHELSEA SAVINGS BANK,

CHELSEA, MICHIGAN.

Oldest and Strongest Bank in Western Washtenaw County.

Capital and Surplus, - \$175,000.00

Guarantee Fund, - - - \$275,000.00

Total Resources, - \$900,000.00

Money to Loan on Good Approved Security.

This Bank is under State Control and is a Legally Authorized State Depository.

PROMPT ATTENTION GIVEN TO ALL BUSINESS ENTRUSTED TO US.

Deposits in the Savings Department draw three per cent. interest which is paid or credited to account on January 1st or July 1st.

We Solicit Your Banking Business.

OFFICERS.

FRANK P. GLAZIER, President.
W. J. KNAPP, Vice President. JOHN W. SCHENK, Vice President.
THEO. E. WOOD, Cashier. P. G. SCHABLE, Assistant Cashier.
A. K. STIMSON, Auditor. GEORGE A. LEHMAN, Accountant.

PINEAPPLES

Now is the height of the Pineapple season. We have them all sizes and prices. Let us have your canning orders.

Vegetables

Fresh. Tender. Crisp.

Strawberries

Received Daily. "No Left-Overs"

"Steel Cut" Coffee

We've just installed a new Coffee Mill that cuts the berry into small uniform particles instead of grinding it in the usual way. Thus it is not crushed as by the old method, and the little oil cells remain unbroken. The essential oil (food product) cannot evaporate and is preserved indefinitely. Coffee prepared in this manner will make from ten to twenty cups more of full strength coffee than it will if ground in the old way.

The Teas "That Please"

At the Busy Store of

FREEMAN BROS.

THE OLD PEOPLE'S HOME

WILL BE LOCATED IN CHELSEA, MICHIGAN.

Hon. Frank P. Glazier Gives Eighteen Acres of Land, \$5,000, and \$1,000 a Year for 10 Years, for a Home for Aged Methodists—The Old Fair Grounds Is The Property.

At a meeting of the board of trustees of the Old People's Home, appointed by the Detroit Conference of the Methodist Episcopal Church, held in the city of Detroit last Monday, the decision was almost unanimous in favor of accepting the offer made by Hon. Frank P. Glazier to have the home located in Chelsea.

The board, which is composed largely of laymen of the church, with a few ministers, recently visited the various sites offered for the home, which is to be open to the old people of the Methodist denomination and, under certain conditions, to others.

The offer made by Mr. Glazier was a most generous one, comprising a spacious

site of eighteen acres in Chelsea, with an additional gift of \$5,000, and \$1,000 a year for ten years. The grounds will have sewerage connections, the paving is to be free and, in addition, a handsome entrance and gateway will be built as part of the gift. The home will be located on the old Fair grounds and is a fine location.

The Methodist society of Chelsea has voted to supply a temporary home for one year, if necessary, while the buildings are being erected.

The erection of the handsome buildings which will be put up will add to the building boom now on in Chelsea and prove a great benefit to the aged inmates.

GRADUATING EXERCISES

THURSDAY EVENING, JUNE 21.

Prof. Jones, of Ypsilanti, Will Deliver the Address at the Opera House—A Class of Twelve This Year.

The graduating exercises of the Senior Class of the Chelsea High School will take place at the opera house, Thursday evening, June 21. The exercises will commence at 8 o'clock, and the class has decided not to charge any admission.

The address will be delivered by Prof. Jones, of Ypsilanti, president of the State Normal College. A very fine musical program of five numbers will be another feature of the exercises. The presentation of the diplomas will be made by Superintendent L. B. Alger.

The class consists of twelve members, seven young ladies and five gentlemen. Three have completed the Latin, three the Scientific, and six the English course. The following is a list of the graduates and the courses they have taken:

Latin—Ruth E. Bartch, Helen R. Miller, Mabel G. Raftery.
Scientific—Paul O. Bacon, Harry B. Taylor, T. Kent Walworth.
English—Minnie E. Bagge, Mildred R. Daniels, Mabel A. Dealy, Katherine W. Riemschneider, Homer Lighthall, Theodore W. Weber.

The Baccalaureate sermon will be delivered by Rev. M. L. Grant, at the Congregational church, Sunday, June 17.

A SKY-SCRAPER.

Hon. Frank P. Glazier Will Build a Seven-Story Office Structure in Ann Arbor This Summer.

The following was taken from the Ann Arbor News of Monday, June 4: F. P. Glazier, who recently acquired the property at the corner of Huron and Main streets, was in the city today with Clare Allen, of Jackson, whom he had commissioned to prepare the plans for the new building which will be erected at this prominent corner.

"At first we contemplated making it a six-story building," said Mr. Glazier, "but I find that seven stories is more advisable, as applications for office room are coming in such numbers that I feel certain that the building will be well tenanted. The first floor will be occupied by merchants and the remainder will be devoted to offices for professional men."

The complete plans will be ready in about a month, and on August 1st the work of tearing down and erecting a modern and up-to-date sky-scraper will be commenced.

CEMENT PLANT SOLD.

A Representative of a Detroit Firm of Lawyers Bid It In—Sale Includes Land Mrs. May Millen Claims.

Circuit Court Commissioner Sample last Friday sold the improved property belonging to the White Portland Cement Company at Four Mile Lake on a mechanic's lien of a wholesale supply company. Walter Hogan, an employee in the law office of Douglas, Bowen & Whiting, of Detroit, bid it in for \$7,044.27. The land sold includes the buildings and also the property that Mrs. May Millen claims in her bill of complaint.

What's the good of keeping from him Any good things you may see, That will lift his load of labor Like Rocky Mountain Tea. The Bank Drug Store.

ACCIDENT CAUSES DEATH

TEAM RAN AWAY.

Harry J. O'Neil, Former Lima Resident, Met With Fatal Accident Last Friday Afternoon—Funeral Monday.

Word was received in Chelsea last Saturday morning that Harry J. O'Neil, who for a number of years conducted the Linval Ward farm in Lima, had met death by accident last Friday afternoon. Just how the accident happened is unknown. Mr. O'Neil, who moved to the Vosburg farm south of Grass Lake last spring, had his team on a manure-spreader and was on the way to the house from a lot on the far end of the farm, about 5 o'clock in the afternoon. It is supposed that his team became frightened, and the driver was either thrown from the seat of the machine, or else he attempted to stop them and was thrown to the ground. When he was found by a member of the household, he was unconscious and remained in that condition until his death, which occurred some two hours after he was discovered.

The deceased was a son of Henry O'Neil, of Sharon, and a son-in-law of Michael Icheldinger, of Lima. He was well known to many of the residents of Chelsea, and the many friends regret his untimely demise.

The deceased was born in Sharon, 29 years ago last March. Six years ago last fall he was united in marriage with Miss Clara Icheldinger. He is survived by his wife, one child, his father and mother, three brothers, two sisters and a number of other relatives. Wm. Corwin, of Chelsea, is a cousin of the deceased.

The funeral was held from his late home, Monday afternoon at 1 o'clock. The clergyman, who officiated, was a resident of Grass Lake, and the interment took place at the Sharon Center cemetery.

Hummel—Uphaus.

A very pretty church wedding took place at the Church of Our Lady of the Sacred Heart, Tuesday morning, June 5, 1906, when Miss Matilda, the eldest daughter of Jacob Hummel, was united in marriage to Mr. Edward A. Uphaus, of Manchester. Miss Genevieve Hummel acting as bridesmaid and Mr. Edward Brighton, of Manchester, as groomsmen. The nuptial mass was celebrated by the pastor of the church, Rev. Fr. Considine, and was attended by a large number of friends of the contracting parties.

After the ceremony the happy couple returned to the home of Mr. and Mrs. Jacob Hummel, where a fine wedding breakfast was served to a number of invited friends. The young couple took the M. C. 10:40 a. m. train for an eastern trip. A liberal shower of rice was given to the young couple as they boarded the train, and all wished them a prosperous and happy life. They will make their future home in Manchester.

A Pioneer Resident.

H. Delancey Reed was born in Utica, N. Y. May 18, 1837, and died at his home in Sylvan June 2, 1906. The deceased moved with his parents, Anson and Sarah A. Reed, to the farm where he died in 1848 which has been his place of residence for over half a century.

The deceased was one of nine children three of whom are living. The surviving members of the family being W. R. Reed and Mrs. Sarah Cole, of Chelsea, and D. L. Reed, of Laflin, Mo.

The funeral services were held from his late home Monday afternoon and was attended by a large following of friends and neighbors. Rev. Joseph Ryerson, pastor of the Chelsea M. E. church officiating. Interment, Vermont cemetery, Sylvan.

Don't Forget.

Don't forget, June 12, democrats and republicans must nominate their candidates for Governor and Lieut. Governor on that date. The polls will be open at every precinct at the usual election hours and the primary will be conducted the same as any ordinary election, with ward and township inspectors and booths in evidence. The election of delegates to the county convention should not be overlooked, as any precinct neglecting to elect delegates on the 12th of June will have no representatives at the county convention. Let every enrolled person, whether democrat or republican, be on deck and ready for action. Tickets in different colors will be furnished by the county clerk at the polls.

Death From Lockjaw.

Never follows an injury dressed with Bucklen's Arnica Salve. Its antiseptic and healing properties prevent blood poisoning. Chas. Oswald, merchant of Kennesaw, Ga., writes: "I cured Seth Burch, of this place, of the ugliest sore on his neck I ever saw." Cures cuts, wounds, burns and sores. 25c at the Bank Drug Store.

To feel strong, have good appetite and digestion, sleep soundly and enjoy life, use Burdock Blood Bitters, the great system tonic and builder.

Special Crockery Sale.

Beginning Saturday, June 9, and continuing until Saturday, June 23, we will sell all goods in our

SANDFORD PUBLISHING COMPANY

CHAPTER IX.—Continued.

But it was not the frowning walls or the threatening boulders that fixed my attention. The floor, which was of solid stone had been leveled and graded until it was as smooth as the floor of a drawing room. In the center, an object of most forbidding aspect caused me to pause, and I stood gazing dumfounded upon the thing. It resembled in outline a monstrous fish, with the form of a narwhal, and was about forty feet in length and twenty in breadth.

I approached the monstrous looking thing, and struck it with my cane. It was made of steel, and was hollow. At one end a long snout of spike extended some six feet, and at the sides, and near the base of that snout, two great windows of colored glass were attached, resembling the eyes of some huge sea-monster. There were also two windows on each side and near the center, while the other extreme was terminated in a sharp point. This great iron monster was a frightful thing to look upon. It resembled some living thing, destructive and terrible in aspect.

Valdemere also examined it with great interest, walking around it, studying its sides and its great head, with the iron bill, and its sloping tail. He stood off, casting an admiring glance upon it; then stooping he placed his torch underneath its belly, and climbed among the heavy timbers upon which it rested.

"Look!" he cried, and I sprang back, startled, for a bright flash of light shot from its eyes, and from the windows at its sides, and I heard the whir of some dreadful machinery which had been set in motion in the interior.

Valdemere sprang to my side, his eyes shining with the light of a madman, his hair thrown back, and his long hand pointing to the entrance a hundred feet away.

I looked, and the light was so intense that I could plainly see the smallest pebble.

"It is wonderful," I cried, "but what is it—seems alive?"

"Ah, can you not see?" he said, "it is a ship. See the great searchlight!" and I noted the light that came from the windows—was of great power and penetration.

"A ship—a strange design for a ship," I cried.

"It is a submarine vessel, and has just been completed. With that vessel we can destroy the impregnable harbor of Kronstadt."

"Great God, man! what are you telling me?" I cried, as I again approached this strange vessel.

"Yes," cried he, exultant and excited, "when that thing crawls upon the bed of the sea, the days of the Russian navy will be numbered."

I shuddered. "But how are you to anchor it? You are now many miles from the sea."

"Ah, that will be done. Look at those great drills," and he pointed to a huge set of four, near by, and to an engine which supplied the power; "with these we will dig a passage to the river, and once our craft is under the waters of the Tennessee, we will soon find our way to the open sea."

I walked over and examined the drills, and discovered that a great hole

"Look!" He Cried.

had been dug, but was now plugged and closed with great care.

"Why was the work stopped?" I enquired.

"We struck gas, and were afraid the cavern would be filled with the gas and cause an explosion, which would inevitably destroy our plans, as well as the vast treasure which is stored here, and which constitutes the capital stock of 'The Invisible Hand.' Our engineers will soon gather here, and determine the extent of the danger, as well as provide a passage for the sinking of 'The Avenger'—I mean the submarine boat. You perhaps recall my words concerning our inventors, our scholars, and our philosophers, as well as our chemists, and our electricians. We have stored in this chamber, enough power to destroy a Nation. We have the sole possession of an explosive so concentrated that the crew of 'The Avenger,' which will be only four

men, can take enough aboard to blow Kronstadt Harbor into oblivion at one stroke. The time draws near when the decisive blow will be delivered, and the effect of this blow is almost incalculable—it will change the map of the world. Our Order is divided into committees. Each committee has its peculiar functions to perform, and each is abundantly provided with facilities for insuring their success. Twenty years have been spent in perfecting these organizations, and providing them with the proper force. The preparations are too exhaustive to describe, but you will better understand the work when you become a member of one of these committees."

"Ah," I said, in great admiration, "I see that perfect system is observed in the work of 'The Invisible Hand.'"

"The system is as rigid as the training of a soldier, and we seldom fail in selecting our recruits."

"May I ask how many enrolled members there are at the present time?"

"We now have two thousand sworn members, who are stationed at different points of the earth. They are to be found in every guise, and filling all vocations from the most exalted positions at court, from the uniformed officers of the Imperial Autocrat, to the shivering convict of Siberia. These committees honeycomb and encompass every branch of the government, and the Czar himself has no secrets from our bureau of information."

"But, do not the faithful followers of the Emperor suspect the existence of this powerful conspiracy?"

"Without a doubt," he replied, "and he is in constant fear of his life—he thinks only of himself, of course—and the destruction of his palaces; but he little dreams of the magnitude of our power. He confounds us with the nihilists—the Terrorist parties—and increases the number of his murderous police spies, who make life a perfect hell for his subjects, who pillage and exile thousands of innocent men and women, and transport about the world the shambles of some Siberian mine. Among these sufferers are members of 'The Invisible Hand,' and our committees are ever watchful. Their sleepless vigilance can penetrate even the mines of Siberia or the frozen wilderness—the home of the liberated exiles. Our committees meet in Rome, in Moscow, in St. Petersburg, in London, and even in China and India. Our members walk in the shadows of the Imperial palaces; move in the chosen circle of the nobles; houses; and feast at the Czar's banquet, waiting—only waiting, for the voice of 'The Invisible Hand' to call them to their duty. Only one man ever failed in this. You have seen him, poor devil, in his cell, where he will remain until the blow is struck, until the hour has arrived—then, if alive, he will be liberated."

"But, will there be only one blow?" I cried, excited by his flaming words.

"Listen, Castleman," and he drew near me, his blazing eyes burning into my brain, and his words seething with passion. "On a certain day, at a certain hour, and at a certain minute, making allowances for longitude and time, a hundred committees, consisting of from four to ten men each, will receive a signal, upon which a catastrophe will occur and startle the whole world, for our plans encompass the destruction of every palace and public building in Moscow and St. Petersburg. The great Kronstadt Harbor will be mined, and at the signal will be swallowed up by the sea; and her navy and her frowning fortress will disappear forever. At the same time, the mines of Siberia, including that living tomb of Bara, where so many have suffered unspeakable tortures, will be blown into eternity. Ah, I see what you would say—our own brothers will be killed. That is true, but we have a nation of living men and women, we avenge the countless martyrs who have died under the lash of the inhuman monster—the Czar—who feeds the Jews to the rabble, and those who for us will die a death more glorious than all the martyrs who have preceded them. The Czar can well afford to offer a kingdom for our apprehension. But we cannot be destroyed. We are hydra-headed."

I was so impressed with the perfect system of these great conspirators that I could find no words, but had seated myself upon a stone to think it out, forgetful of the hunger that had torn so long at my vitals.

"Castleman," said Valdemere, after a slight pause, "to-night you will meet Gershon, and when you leave here, you will no longer be known by the name of your father, but under the name which will be given you by our beloved Chief."

"Ah, then—are we to remain in this chamber throughout the night?"

"Gershon will meet us here at midnight, accompanied by Gideon, the courier, and ten other members, who will give you the hand of fellowship."

As our lunch was spread out before us, my hunger returned, and, it is needless to say, I did justice to it, despite my mental excitement.

I now began to look around me, and peer into the numerous archways, which surrounded us on all sides, forming entrances to chambers, which seemed to have been constructed by the hand of man.

These chambers contained many and various articles, such as benches, tools, drills, chests, chains, ropes, ladders, and in one of these I could see a great furnace and bellows, near which lay sheets of steel and copper; and there was every evidence

that many men had been at work in the place, and had not long departed from thence.

"Why did you bring your money so far South?" I enquired.

"Because the eye of the law is upon the anarchists of the North."

"But you are not anarchists."

"We are conspirators, and conspirators against the crowned head of any country would be suspected of anarchistic tendencies. This would cause investigation, and investigation might cause a great deal of annoyance, even if it did not destroy our plans and confiscate our funds. Nothing of the kind is suspected in the South, and if Nature does not interfere, our treasury is safe for the time being."

"How long will it remain in the caverns?"

"We will have a meeting of the Order in a few months, and decide upon a date for the removal of our money to Russia. It will be a slow process, so we must soon begin."

"Will all the members of the Order be present at this meeting?"

"No, only the great council of one hundred, and they will meet in the Chamber of Silence."

"Where is this Chamber of Silence?"

"The great silent chamber adjoining this and connecting with the vault."

"Of what does the hoard consist?"

Peered Into Numerous Archways.

"Chiefly of notes, bills, and jewels of almost fabulous value."

"In what manner are the treasures of the Order stored?"

"They are enclosed in small bags, of hard material, waterproof, and hermetically sealed, numbered and classified, according to their respective values."

"In a vault?" I asked.

"Yes, in a vault that is closed by a secret lock—a contrivance that sets in motion a stone of twenty tons weight."

"You spoke of a laboratory?"

"Yes," he said, "and it is there that we manufacture our powerful explosives and bombs."

"Have you established a laboratory merely to make these?"

"No," laughed Valdemere, "the laboratory has produced one article which is worth upwards of a million dollars."

"A million of dollars! how!"

"A diamond."

"A diamond," I cried, in great surprise.

"Yes, a diamond, and one that weighs one hundred and forty-five carats at that."

"Where is this wonderful jewel?"

"In the vault with the other treasures."

"Has it ever been valued outside of your Order?"

"Yes, the most expert diamond cutters in Europe have examined it, and have pronounced it of the first water."

"Who was trusted with such a valuable diamond?"

"Gideon, the courier, was instructed to sell it, but after it was examined, there was such a clamor for its purchase among the nobility of the different countries where he displayed it, that our cunning courier wisely concluded to keep it, for he also discovered that the price of diamonds was advancing, there having been formed a 'corner' about this time."

"Have you only made one diamond?" I asked, "and is the secret preserved?"

"Unfortunately the secret died with Coreal, who outlived his discovery only a few hours, and though his successor has labored for many years, he has hitherto met with failure."

"How will your valuables be removed from the vault?"

"The bags, which are about two inches deep, three inches wide, and five inches long, will be buckled to the waists of the different members of our Order at our final meeting, and they will leave the caverns in squads of five, each committee having its special work to perform. Some will go to London, others to Paris, Rome, and the great cities of the continents, including all the markets of Europe, Asia, the two Americas, and Mexico. They will meet in Russia with the proceeds of their sales at a given time, and then the work will begin."

(To Be Continued.)

"Look It Up."

A professor, who when asked a question was in the habit of saying: "That's a very good point, indeed; look it up for yourself!"—was once much disgusted with a student who had failed to answer a very simple question.

"Mr. Jones," said he, "I'm surprised that you, who are going to teach, cannot answer such an elementary question. Why, what would you do if your pupils were to ask it?"

"Well, professor," replied the other, "if such a thing had happened before I came here I'm afraid I would have said plainly that I didn't know; but now I think I'd do just as you do, and say: 'Look it up my boy, look it up!'"

A LESSON IN TACT

DON'T BECOME PERSON ALWAYS SAYING THE WRONG THING.

Schoolgirls Should Study to Be Tactful Without Being Insincere—Brutal Sincerity Sometimes Unpardonable—How One Girl Offended Three Friends—The Truth-Telling Tale-Bearer a Disagreeable Person.

BY MARGARET E. SANGSTER.

(Copyright, 1906, by Joseph B. Bowles.)

Louise, who is a girl new or, came into my living-room the other day looking very forlorn. She slung herself into a chair, the corners of her mouth drooped and I saw that tears were not very far from her honest brown eyes. Louise has those big brown eyes that show a soul so true and loyal that it has in it not the faintest possibility for deceit. I have seen dogs with eyes that have exactly that expression.

"What is the matter?" I said. "Have you found out that your doll is stuffed with sawdust, or has your dearest friend picked up any prying things and gone home? You appear to have met with some provoking disappointment. Did you not get on the promotion list after all your work? Come, dear, pour out your trouble. Tell me what has happened. Perhaps I can help you. I've been in hard places myself."

Louise managed to smile a little as she answered: "The trouble isn't one that you can cure. It is just that I am such an idiot of a girl, always saying the wrong thing and making mistakes and setting people against me. I have done it three times to-day; I have three times said the wrong thing, and I am completely discouraged."

"In the first place I met Mena Carson on her way to school this morning. She was in very good spirits and told me that she was sure she would have a perfect recitation in geometry as she had worked out every proposition correctly last evening. I had nothing better to answer than: 'That will be a change for you. I know that your Cousin Tom is visiting your house, and I suppose he helped you.'"

"Now, that was the worst and most insulting remark I could have made, for Mena is very dull in mathematics, and, as everybody knows, her people at home are not particularly well-educated. I called attention in a breath to her own stupidity and to the fact that she couldn't have made her preparation unless Tom Winthrop had been there to help her. She left me abruptly, and she hasn't spoken to me since. Anyway, I was sincere."

"Yes, Louise," I assured her, "you were sincere, but you were not tactful. I fear that you did hurt your friend's feelings quite needlessly. Go on, dear. Let me hear the rest."

"At recess," said Louise, "Marjorie Dean asked me if I liked the fashion of her new frock. Without stopping to think, I told her frankly that the fashion was pretty enough for some people. It would suit a tall, slender girl like Nancy Kent, but it made Marjorie look too dumpy and short. It was the truth, but Marjorie flushed up and said: 'You do say such horrid things, Louise. One never knows what you will tell her when she asks you a civil question.' Then she walked off, and I know she does not like her frock so well as she did before."

"As if this were not sufficient," Louise proceeded, "I blundered again. Miss Tilson, our teacher, asked me whether I would have to go out of my way to post a letter for her, when I went home to luncheon. The post office is three blocks from our house in an opposite direction from the school, so I could not oblige my teacher without taking some extra steps. I hesitated a moment before I answered: 'I shall have to go a little out of my way, but I shall not mind that; I can hurry, and I will be happy to post your letter.' 'Never mind,' said Miss Tilson, 'here comes Rose Elliot, I think she can oblige me without any inconvenience.'"

"You should have seen Rose. She just beamed. She seized upon that letter and bore it off in triumph, and Miss Tilson looked after her as much as to say: 'There goes a young girl who takes delight in doing favors for people.'"

Louise sighed and was silent.

"The error you make, Louise," I said, after a pause, "is a common one with young people. They lack a sense of proportion. You are naturally candid and open, and you have formed an excellent habit of always telling the truth. I like your sincerity. I even like your bluntness, and yet I must tell you very plainly that sincerity, without tact is often cruel and brutal, and sometimes unpardonable. Tact means touch."

"The tactful girl is very quick to understand a situation. She knows how people feel without having their sentiments explained. She never goes out of her way to show a schoolmate as you did Mena, that you have noticed how frequently she is deficient. In the circumstances does she venture to inform an acquaintance that her hat or her dress is unbecoming, when she does and that have been bought and paid for. And she understands how to undertake a commission without actually saying that it will put her to some inconvenience. This morning you had only to say to Mena, when she told you about the geometry: 'Dear Mena, how glad I am, and you might have stopped your comment on Marjorie's frock at the point of ad-

miration for the fashion. As for Miss Tilson you had merely to say: 'Why, of course; it will be a pleasure to post your letter.'"

"One of our greatest perils is in this direction. We exalt one virtue at the expense of another. I had a schoolmate who not only never made friends, but really made enemies through her determination never to say the least thing that was not altogether true. She carried her truth-telling so far that she constantly involved other people in trouble by doing what has been regarded by school people as shocking from the days of the Romans until now. She was a sort of tale-bearer, not because she wanted to be so, but because her conscience obliged her to reveal everything she knew, whether it was her own affair or that of another."

At this Louise sat up very straight. "That girl," she said, "was a goose. Everybody knows that telling tales is perfectly abominable."

"I agree with you in that, but Caroline unfortunately never learned that simple thing; in consequence she was shunned as a girl and disliked when she grew older."

"A very important study for girls, as important, I think, as Latin, algebra or German, is to learn how to be both tactful and sincere. We must never knowingly violate the truth, but there are times when we may be silent and commit no sin. A lie may be told by one who is a hypocrite, without her opening her lips. There are times when deception is carried on by looks. One must speak truth if she speaks at all, and one must not be a coward. A sincere nature reveals itself in tones and glances, as well as in speech, but one who is tactful will learn delicacy. She will be careful not to wound anyone's feelings. She will refrain from putting herself forward and will be quick to do and say agreeable things."

"For instance, your friend Marjorie has a beautiful complexion. You might have said 'that color suits your hair and eyes,' without calling attention to her figure. Although Mena is not quick at mathematics, she writes good compositions, and I don't believe you have ever complimented her on that talent. As for Miss Tilson whom you adore, you can make it all right with her by being on the watch to accommodate her next time. Does she not let the girls sometimes make her a cup of tea at the noon hour? And do you not sometimes carry your luncheon with you to school? The tactful person looks out for opportunities to be helpful, without ever being intrusive."

"Cheer up, Louise, you have done nothing very dreadful after all. Nineteen-tenths of the difficulty is in finding out where our weak points lie. Once they are discovered, it is very easy to guard against them. I expect to see you as tactful as your sister Genevieve by the time you are 20."

Louise went away consoled. Genevieve is her ideal, as elder sisters should always be.

VOILE GOWNS IN STYLE.

Return to Favo: Again and the Trimming Most Approved Is Different Widths of Ribbon.

Silk volles and grenadines are not of necessity associated with large quantities of taffeta or broadcloth, although those combinations are very desirable. The sheer silky stuffs, which wear surprisingly well, in spite of their sheerness, are made up into the most charming of little frocks, mounted over silk of the same tone or of harmonizing color and trimmed in satin or velvet ribbon, and lace about the throat and shoulders and on the sleeves.

Ribbon trimming is particularly effective upon stuffs of this class, and often a skirt will be adorned with rows of rather narrow ribbon for fully half its depth, the ribbon being laid on flat and stitched on the upper edge.

Observations carried on in deep mines, tunnels and wells, have shown that there is everywhere in the earth's crust a rise of temperature as we go downwards, and this rise of temperature is sufficiently rapid to lead to the inference that, if it is maintained, the rocks at a few miles from the surface must be so hot as to be either in a fluid condition, or only retained in a solid state by the enormous pressure under which they lie. When we come to analyze these temperature observations, however, we find in different areas the most diverse results have been attained. In some cases the increase of temperature is so rapid that it amounts to one degree F. for every 20 feet of descent, while in others we have to pass through ten or 12 times the distance to find the same rise of one degree. Until the discovery of the development of heat by radium it was very difficult to account for this local and seemingly capricious distribution of heat in different parts of the earth's crust. Now, it is possible to find at least a probable explanation of these effects in the slow but certain changes which have been proved to be going on in certain of the chemical elements which build up rocks.

But every change of temperature is accompanied by changes of bulk—expansion or contraction—in the great rock-masses building up the earth's crust. A rise or fall of temperature of a very few degrees must result in enormous displacement of masses of rock, having a bulk of hundreds or thousands of cubic miles. We must not be surprised, therefore, when in studying the rock-masses of the earth's crust we find everywhere signs of great internal movements—bending, folding, crumpling, fracturing and crushing.

THE WORLD'S QUAKES

A BRIEF STUDY OF RECENT ALARMING DISTURBANCES.

Celebrated English Professor Discusses Relations Between Earthquakes and Volcanic Eruptions—The Earthquake Area.

Curiously, not unmingled with alarm, has not unnaturally been awakened by the volcanic outbursts and earthquake shocks which have followed one another so rapidly since the commencement of the present year. In a period of little more than two months we have received news of volcanic eruptions in the West Indies, Las Palmas, and Vesuvius, while, in addition to innumerable minor shocks in every quarter of the globe, great and destructive earthquakes have been reported from Columbia, the West Indies, the Caucasus, Northern India, and the Sandwich Islands, culminating in the awful tragedy of San Francisco.

That a connection exists between seismic (earthquake) and volcanic

phenomena has been recognized from the earliest times. Volcanic eruptions, indeed, are invariably heralded or accompanied by earthquake shocks. The eruptions of Vesuvius and other volcanoes are nearly always preceded either by a considerable earthquake, or by a succession of small ones. While the volcano of Kilauea, in the Sandwich Islands, was in eruption in 1887, 618 earthquake shocks were felt in the preceding year, 41 earthquakes were recorded in a single night, while during the eruption in 1886 more than 2,000 shocks are said to have been counted in five days. At one time, indeed, the connection between earthquakes and volcanoes was believed to be so intimate that earthquakes were defined as resulting from "uncompleted efforts to form a volcano." More extended study, however, has convinced geologists that, while volcanic outbursts are always accompanied by earthquakes, the converse of this statement is by no means true. Many earthquakes—and perhaps the greatest and most destructive of them—may and do occur in districts where no signs of volcanic activity exist. The great displacements accompanied by fractures ("faults"), which we now know to be continually occurring in the earth's solid crust, account for many of the vibrations or waves transmitted through the solid rock-masses which constitute earthquakes. In some cases—does molten material find a way of escape through these fractures.

Observations carried on in deep mines, tunnels and wells, have shown that there is everywhere in the earth's crust a rise of temperature as we go downwards, and this rise of temperature is sufficiently rapid to lead to the inference that, if it is maintained, the rocks at a few miles from the surface must be so hot as to be either in a fluid condition, or only retained in a solid state by the enormous pressure under which they lie. When we come to analyze these temperature observations, however, we find in different areas the most diverse results have been attained. In some cases the increase of temperature is so rapid that it amounts to one degree F. for every 20 feet of descent, while in others we have to pass through ten or 12 times the distance to find the same rise of one degree. Until the discovery of the development of heat by radium it was very difficult to account for this local and seemingly capricious distribution of heat in different parts of the earth's crust. Now, it is possible to find at least a probable explanation of these effects in the slow but certain changes which have been proved to be going on in certain of the chemical elements which build up rocks.

But every change of temperature is accompanied by changes of bulk—expansion or contraction—in the great rock-masses building up the earth's crust. A rise or fall of temperature of a very few degrees must result in enormous displacement of masses of rock, having a bulk of hundreds or thousands of cubic miles. We must not be surprised, therefore, when in studying the rock-masses of the earth's crust we find everywhere signs of great internal movements—bending, folding, crumpling, fracturing and crushing.

PROF. J. W. JUDD, C. D.

THE PRINCIPAL REGIONS OF VOLCANIC AND SEISMIC DISTURBANCE IN 1906.

Volcanic eruptions and earthquakes are not confined to any particular region of the world, but are distributed over the entire globe. The principal regions of volcanic and seismic disturbance in 1906 are shown in the accompanying map.

The map shows the distribution of volcanic and seismic activity in 1906. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1905. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1904. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1903. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1902. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1901. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1900. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1899. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1898. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1897. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1896. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1895. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1894. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1893. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1892. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1891. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1890. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1889. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1888. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1887. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1886. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1885. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1884. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1883. The principal regions of volcanic and seismic disturbance are indicated by shaded areas. The map includes the following regions: North America, South America, Europe, Africa, Asia, Australia, and the Pacific Ocean.

The map also shows the distribution of volcanic and seismic activity in 1882. The principal

HAIRDRESSING AND SHAMPOOING
LADIES—It is no longer necessary to go to Detroit and Ann Arbor for Shampooing or Hairdressing. Orders taken for Switches and Hair Goods. For information call telephone 173.

ORIGIN OF "TWENTY-THREE"

Hero of Dickens' Story Who Died on the Guillotine Was in Line on That Number.
Dickens lovers have no trouble these days in proving that all of our supposed up-to-date Americanisms are merely stolen expressions from their favorite author. They have indeed found that Dickens used many phrases and expressions that have been taken up to-day as universal by-words, and the latest acquisition of the enthusiasts of this sort is told in the statement that Dickens originated the expression "twenty-three," which in the vernacular of the present is used to express "all in," "chase yourself," "skidoo," "the end," and many other things.

It will be remarked by anybody, says the Kansas City Star, that in the last chapter of "The Tale of Two Cities" Dickens describes the procession of human-leaden tumblers to the guillotine. In one of them is Sidney Carton, the hero. In a garden overlooking the hideous machine is a group of old women knitting. As the heads fall in the basket one after another the women knit stealthily and count them out loud. The paragraph describing the last moments of Sidney Carton reads thus:

"The murmuring of many voices, the pressing on of many foot-prints in the outskirts of the crowd, so that it swells forward in a mass, like one great heave of water, all flashes away. Twenty-three!"

There you have it. You can take it for what it is worth.

Deadly Serpent Bites

Are as common in India as a stomach and liver disorders with us. For the latter however there is a sure remedy: Electric Bitters, the great restorative medicine, of which S. A. Brown of Bennettville, S. C., says: "They restored my wife to perfect health, after years of suffering with dyspepsia and a chronically torpid liver." Electric Bitters cure chills and fever, malaria, biliousness, lame back, kidney troubles and bladder disorders. Sold on guarantee at the Bank Drug Store. Price 50 cents.

Prohibition County Convention.

A mass convention of the Prohibition party voters of the County of Washtenaw, State of Michigan, is hereby called to meet at the court house, Ann Arbor, at 2 p. m., standard time, on Tuesday, June 19, 1906, for the purpose of electing nine delegates to the state convention of the Prohibition party to be held at Detroit on July 3, 1906, and for the transaction of such other business as may properly come before the convention.

By order of county committee.
H. T. PURFIELD, Chairman.

Following The Flag.

When our soldiers went to Cuba and the Philippines, health was the most important consideration. Willis T. Morgan, retired Commissary Sergeant U. S. A., of rural route 1, Concord, N. H., says: "I was two years in Cuba and two years in the Philippines, and being subject to colds, I took Dr. King's New Discovery for consumption, which kept me in perfect health. And now in New Hampshire, we find it the best medicine in the world for colds, coughs, bronchitis, troubles and all lung diseases. Guaranteed at the Bank Drug Store. Price 50 cents and \$1.00. Trial bottle free.

Sunlight for All the Leaves.
The telegraph plant of India has a method all its own for catching the sunshine. Each of its leaves is composed of three leaflets. The larger terminal one erects itself during the day and turns sharply down at night, while the other two smaller leaflets move constantly, day and night, describing complete circles with a peculiar jerking motion like the second hand of a watch. Occasionally they rest for a period and then go on again, thus bringing every part of every leaf to the full action of the sun.

Don't be fooled and made to believe that rheumatism can be cured with local applications. Hollister's Rocky Mountain Tea is the only positive cure for rheumatism. 35 cents, Tea or Tablets. The Bank Drug Store.

Card of Thanks.

We, the undersigned, wish to return our most hearty thanks for the kindness shown us by our friends and neighbors at the burial of our nephew and brother. Also to the Order of Odd Fellows of Dexter for their beautiful floral offering. Mr. and Mrs. F. E. Richards.
Mrs. Mary D. Hunter.

THE WATER WAY BETWEEN DETROIT AND BUFFALO.

Daily Express Service via D. & B. Lake Line.

Particular and experienced travelers habitually use the D. & B. Line en route between eastern and western states. Low rates and superior service attract this class of travel. You can save \$3 by purchasing your through tickets via the D. & B. Line. Send two-cent stamp for illustrated pamphlet. Address, Detroit & Buffalo Steamboat Co., 4 Wayne St., Detroit, Mich.

CONTINUE

Those who are gaining flesh and strength by regular treatment with

Scott's Emulsion

should continue the treatment in hot weather; smaller dose and a little cod-liver oil with it will do away with any objection which is attached to fatty products during the heated season.

Send for free sample. SCOTT & BOWNE, Chemists, 409-415 Pearl Street, New York. 50c. and \$1.00; all druggists.

COUNTY EVENTS.

It is reported that another newspaper is about to be started in Clinton.

Quite a number of the county schools have closed for the summer vacation.

A marriage license has been issued to Jacob Glatz and Marie Bross, both of Freedom.

Sunday, June 10th will be observed in the M. E. church of Unadilla as children's day.

Born, Wednesday, May 30, 1906, to Mr. and Mrs. Martin Bruestle, of Sharon, a daughter.

Milan will have a celebration July 4th. Horse races, ball games and sports are among the events promised.

The next meeting of the Webster Farmers' Club will be held at the home of Mrs. Frank Chamberlain on Saturday, June 9.

County Clerk Harkins last Thursday issued a marriage license to Henry Lemster, of Freedom, and Mrs. Kate Beckel, of Norvell.

Each member of the senior class of the Howell high school, regardless of standing, will participate in the commencement exercises this year.

Crystal Tent, K. O. T. M. M., and the Crystalline Hive, L. O. T. M. M., of Dexter, will unite in observing Macabee memorial day, Sunday, June 17.

Seen on Woodward avenue—Open work waits a quarter off—Detroit Free Press. Wh-what's that?—Milan Leader? Perhaps one-half off would suit the editor of the Leader better.

During the month of April there were 76 deaths in Washtenaw county and 71 births. Six deaths were of children under one year and 29 of people over 65. Five were from tuberculosis, 12 cancer and 4 violence.

The bachelor editor of the Postoria Times sarcastically refers to June as a month of hymenial stimulation and that therefore we have one month in which to be duly married and eleven months for repentance.

Dandelion growers can boast of a most bountiful crop this year, and strange it is that they have allowed the harvest to come to full maturity. Evidently next year will be as this only much more abundant.—Ypsilanti.

An inspector was in Bridgewater Monday last week and checked up the postoffice, something that had not been done in twenty years. He found everything in good shape. F. W. Schoen has been postmaster there for the past 8½ years and has given excellent satisfaction.

The Maccabees of Grass Lake will observe June 10th as memorial day. The members of the tent will attend the morning services in the Baptist church of that village on that day and will go from the church to the cemetery where the graves of the departed members of the order will be decorated.

The jury in the case of Mrs. Mary Conner's against saloonkeepers Elasseer and Loefler, of Dexter, for selling her son liquor, which resulted in his feet being so badly frozen that they had to be amputated returned a verdict Friday night of \$200 for the plaintiff. The jury was out twenty-nine hours.

Adam was an unfortunate man in some ways, but in other ways he was peculiarly blessed. He had no mother-in-law: there was no housecleaning, no sale of spring bonnets, no taxes, no collar buttons to lose, no servant problem, no autos, trolleys or slot machines. In fact what he missed seemed to outweigh the troubles he got into.—Homer Vidette.

The June meeting of the Grass Lake Farmers' Club will be held at the spacious home of Mr. and Mrs. M. L. Raymond in this village on Wednesday, June 13th. It being the last meeting before the summer vacation plans have been made for an all-day meeting and dinner will be served at noon. In the afternoon a good program will be rendered.—Grass Lake News.

Those interested in the Jackson Citizens Insurance Co. to the number of twenty-five held an interesting session at the Cleary College Monday night. They unitedly agreed that the assessment is unreasonable and that they will not pay if possible to get out of it and sent G. D. Lockwood to interview the Jackson members as to the plan of action to pursue.—Ypsilanti.

The corner stone of the new Presbyterian church is about to be laid and will contain the history of the church from its organization in 1859, the history of this society, the first pulpit bible used by the society here, a copy of each of the newspapers published here, letter heads of the several business places in town, and much else that will be of interest to future generations.—Stockbridge Sun.

An Alarming Situation.

Frequently results from neglect of clogged bowels and torpid liver, until constipation becomes chronic. This condition is unknown to those who use Dr. King's New Life Pills; the best and gentlest regulators of stomach and bowels. Guaranteed at the Bank Drug Store. Price 25c.

A lazy liver leads to chronic dyspepsia and constipation—weakens the whole system. Doan's Regulate (25 cents per box) correct the liver, tone the stomach, cure constipation.

The Big Show Coming.

The announcement that Ringling Brothers' World's Greatest Shows will exhibit in Jackson on Tuesday, June 26, will be received with more than usual interest by the people in this neighborhood. The Ringling Brothers have a name that stands for all that is new, novel and entertaining in the circus line, and the management announces that this season the show has been enlarged to such an extent that a whole extra train is used in addition to the four trains of last season. The show is now transported from place to place in eighty-five seventy-foot cars, constructed especially for the Ringling Brothers. In connection with the circus proper, in which the arena performance is unexcelled, the Ringling Brothers are this season presenting the beautiful and sublime spectacular production of "The Field of the Cloth of Gold." The pantomime play necessitates the use of 1,200 actors and actresses and of almost five hundred horses. It is presented on the largest stage ever used for exhibitional purposes. Special excursion rates have been arranged for on all lines of travel by Ringling Brothers, and those who desire to go to Jackson where this great circus exhibits on Tuesday, June 26, can do so at a comparatively small cost. This will be the only point in this vicinity where the circus will exhibit this season and no one should miss this opportunity to see it. Watch this paper for additional announcements.

Fresh Air Society.

The Michigan Fresh Air Society, for many years known as The Grange Fresh Air Committee, and which for the past eleven years has been sending out poor children into country homes for a two or three weeks' vacation is arranging to begin operations for this season. During its existence, upwards of 2,400 have been sent to such homes among respectable farmers as were offered them.

The society in Detroit provides the children, and furnishes transportation to and from the homes, the only expense to the farmer or those taking children, being the boarding or keeping of them, which many gladly offer to do. The children are usually under 12 years of age, and of a class that could otherwise have no vacation. An agent is employed during the term, who devotes all her time to the interests of the work, visiting the children at their homes before being sent out, and attending to all of the details. Further information may be secured by addressing, Dr. James A. Post, secretary, 114 Bates street, Detroit, Mich.

How's This?

We offer one hundred dollars reward for any case of catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & CO., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him. W. ALDING, KINMAN & MARVIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally acting directly upon the blood and mucous surfaces of the system. Testimonial of Dr. F. J. Cheney, Price 75c. per bottle. Sold by all druggists.

Take Hall's Family Pills for constipation.

Itch! Itch! Itch!—Scratch! Scratch! Scratch! The more you scratch the worse the itch. Try Doan's Ointment. It cures piles, eczema, any skin itching. All druggists sell it.

Primary Election Notice.

To the qualified enrolled electors of the township of Sylvan, county of Washtenaw, state of Michigan, notice is hereby given, that a primary election will be held at the Town Hall, Chelsea, within said township, on Tuesday, June 12th, 1906, pursuant to the provisions of Act No. 181 of the Public Acts of 1905, for the purpose of voting for the nomination of candidates for the offices of governor and lieutenant-governor of said state by the qualified enrolled electors of all political parties.

Also for the election by all political parties of delegates to a county convention to be held for the purpose of choosing delegates to a state convention for the nomination of candidates for state offices.

Each of the several parties will be entitled to the vote of delegates from said township as indicated below, viz:

The republican party is entitled to 15 delegates.

The democratic party is entitled to 14 delegates.

The prohibition party is entitled to 6 delegates.

Also for the purpose of voting upon the following propositions, viz:

To nominate by direct vote candidates for the offices of governor and lieutenant-governor of said state.

To nominate by direct vote candidates for the office of congressman from the township forms a part.

MILLION ACRES OPENED.

Portion of Shoshone Reservation, Wyo. to be Settled—Applicants Registered the Last Two Weeks in July.

The president has issued a proclamation opening to settlement and entry a portion of the Shoshone Indian reservation in Wyoming, the area of the lands so opened being approximately 1,150,000 acres.

To determine the order in which applications for entry of these lands must be presented, a registration of applicants will be held at Lander, Shoshone, Thermopolis, and at Worland, provided the Big Horn railroad is doing a passenger traffic to the latter place, commencing June 16, 1906, and ending July 31, 1906.

The drawing under this registration will be held at Lander, Wyo., commencing August 4, 1906, and continue for such period as may be necessary to complete the same.

EVER WATCHFUL.

A Little Care Will Save Many Readers Future Trouble.

Watch the kidney secretions. See that they have the amber hue of health; The discharges not excessive or infrequent; Contain no "brick-dust like" sediment. Doan's Kidney Pills will do this for you.

They watch the kidneys and cure them when they're sick.

Mr. Milton A. Hogue, residing at 157 Taylor street, Coldwater, Mich., proprietor of the barber shop on Monroe street, says: "For eighteen months I had pain through my loins and kidneys. It was such a heavy dull aching that I could not rest comfortably, and felt about as tired in the morning as at night. My back became so lame when at work that it was torture for me to stoop to lift anything heavy, the kidney secretions were irregular, highly colored, and I was feeling miserable all the time. I saw Doan's Kidney Pills recommended so emphatically by prominent people that I concluded to test them, so I procured a box. I could feel the good effect at once. I was amazed at the quickness with which all the aches and pains left me and how soon the kidney secretions became normal. I consider Doan's Kidney Pills worth their weight in gold."

For sale by all dealers. Price, fifty cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

Iron-Ox

TABLETS CURE Constipation

The best tonic for bowels, liver and stomach. Try them today, if your liver is wrong. You will feel better quickly.

10 Iron-Ox Tablets in a handy aluminum packet, 25 cents at all druggists, or by mail. Ask for Iron-Ox Tablets and you will receive them.

MILLIONAIRES WHO ARE MANAGED BY THEIR DAUGHTERS

In Affairs of the Heart, Wealthy Papas Seem to Have Very Little to Say.

GENERALLY SURRENDER WITH GOOD GRACE

Cases of Wilhelmina Busch, Helena Zimmerman and Mrs. Burke Roche Among the Many That Might Be Cited—How James Van Alen was Forced to Give In.

If millionaires are managed by no one else in the world, they are at least managed by their daughters. In a way which turns the heads of the extremely rich man, from his early beginnings, to his eating and drinking, his dress and appearance, his work and recreation, his words and probable thoughts, there is probably only one person of all those to whom he is a continual show and study, to whom he is not formidable.

This person is his daughter. When it was said that "a little child shall lead them," it should have been said that a bearded and befeathered grown-up daughter, with pink tinted fingers, shining and waving tresses, and all the complexities that go to make up the daughters of the rich, shall lead them.

The millionaire may guard himself with his millions, may intrench himself from the long arm of the law, may be silent, unapproachable, and impervious to questioning, investigation or attack, but all of a sudden some day he will be turned into a soft-hearted creature who does not want it would, but what he must, and does it with the best grace possible. All this is because his pretty daughter, at some particular crisis in her life, suddenly has taken it into her pretty head to do as she pleases, either with or without Papa Millionaire's consent, as the case may be.

The way he stands for her and what she does or plays the opposite part in a final test of his character in the hearts of many people, and one which throws a revealing light upon his true self, although it is one which seems to be lost sight of by G. R. Clarke, Owen, Sweet Marsden, and other millionaire students and experts.

Case of Wilhelmina Busch. Whatever may have been the eccentricities covered either in herself or her lover by the arrangements which Papa Millionaire Busch made in order to wed Miss Wilhelmina Busch properly and conventionally to Lieut. Scharer, nobody could doubt that in everything he showed first, last, and altogether, that the love he bore his daughter

"If you intend to be married, come back and be married at home. I have no objections to Mr. Scharer as a son-in-law," he says by telegraph. And he is as good and better than his word. He advises them to wait until things quiet down a little, and then gives his daughter a wedding at beautiful Pasadena. More than this, he starts them off on their wedding trip in his private car Adolphus, which they only left at New York to take the trip to Europe. This and much more was provided by Papa Busch's generosity.

Kept Papa Zimmerman Guessing. So with the few exceptions that prove the rule, it always has been in the history of American millionaires. Not long ago the world held its breath at the rashness of Helen Zimmerman. Was she married? Papa Zimmerman said "No." He also said that he would know something about it if anybody would, provided such a thing had happened, and yet cablegrams kept coming that she was.

"You cannot make my denial too explicit," he said, "for there is absolutely nothing in the report. If there had been I certainly would have heard of it, and not a word have I received. Why, my daughter is on the ocean this minute on the steamship Campanian, which is expected to arrive at New York on Wednesday. She will be accompanied by her aunt, Miss Evans, and by her one maid. Now that she has sailed to this country, will you tell me how she could have been married?"

It was suggested that the marriage took place on the Wednesday before, which the millionaire denied, but which it turned out, was just what had happened. The young people had decided to get married, but to keep the ceremony a secret until the bride could go to Cincinnati. But the suddenness of the ceremony and the secrecy had been decided upon because of the wild and unsettled affairs of the duke, and the ceremony was performed with the consent of the bride's aunt, Miss Effie Evans. She and the bride expected to sail on Wednesday, and had so called Papa Zimmerman. A necessary trip on the part of the bride to Paris, however, to get her wardrobe and close her apartment there made an unfore-

seen delay, and the sailing had to be postponed until Saturday. She was detained in Paris and missed the boat, and when she arrived in London the duke insisted on going to Tanagerage castle. This was not according to the agreement, but the girl was again persuaded along. Of course, the Tanagerage trip made the announcement of the wedding necessary, and it was that that the newspapers cabled back and forth, the newspaper asserting, and Papa Zimmerman denying, the next thing Papa Zimmerman was told was a cable saying that it was all true, and asking his blessing.

A pretty predicament this was, and a pretty position to put a millionaire in—and multimillionaire at that—especially one who has been accustomed to carrying things with a high hand.

Get Blessing and Welcome. Interviewers and many other men had found that, for all Eugene Zimmerman was considered bluff and hearty, he could give a man a bad ten seconds who asked him questions or took any attitude which he regarded as an impertinence. Before that last cablegram arrived, and while the millionaire still was denying, bets were exchanged freely that it would go hard with Helena and with the duke if the news turned out to be true.

But no. Without any possible way of knowing how the mistake had all come about, Papa Zimmerman refused to make any harsh judgment of his little girl who always had been all and all to him. He proceeded to do all, and more, to justify the sublime

and was sending for her to come home. It has been said, though, that he has put it in his will in the form of a request that his granddaughter, Cynthia Burke Roche, shall not marry a foreigner, as her mother did.

Miss Van Alen's Victory. In the late notoriety of young Robert Collier it was remembered when a strenuous opposition was put up against him as a son-in-law by James Van Alen. Mrs. Van Alen was the daughter of Mrs. William Astor, and it has been said that Mr. James Van Alen is one of the most snobbish men in America. He refused the offer of Grover Cleveland to send him as minister to Italy, and, like William Waldorf Astor, he has decided that England is the only place to live in and bring up his family. When his youngest daughter, Sara, fell in love with Robert Collier, his only objection to the young man was because he was Irish. The rumor of their engagement was at first scornfully denied by the

fact that she had put in him. He answered the cablegram by cabling his blessing. He was one of the first to go up the side of the St. Louis when the vessel arrived. He entered the stateroom, in the center of which stood his daughter with the duke by her side. He kissed her with certain apparent dimness and moisture in his eyes, and then shook hands with the duke.

"Congratulations, sincere congratulations," he said, "and welcome home." Everybody knows how he has taken hold of the task laid out for him since; how he has tried to make a business man out of his son-in-law; how he has turned over millions to redeem the duke's estate; how everything that is in his power is done for the happiness of his daughter; and how he is working night and day that her boy, little Lord Mandeville, shall one day inherit greater wealth.

Frank Work and His Daughters. It was years ago when the millionaire, Frank Work, began to play the same role for his daughter and English son-in-law. It was in 1881 that a tall, handsome young man visited New York and laid siege to his beautiful daughter. The father opposed the match with all his might, but they were married and went to London. It was only a little while after that Mr. Work was sending them \$7,000 a year to live on. A little later he increased it to \$12,000. Then he cut off all allowances. He said his daughter had married a man who never could or never would make a living, and that he was tired of furnishing allowances and paying bills at the same time.

With the "where-withal" cut off, Mrs. Burke Roche soon returned with her children. She went straight to the house on Twenty-sixth street. In 1891 she obtained a divorce from her husband in Delaware, and ever since has been living at her father's house as his beautiful mistress. As has lately come forth, she has had little spoiled ways of her own ever since which were not exactly in accord with the fussy notions of an old man. He has flown into a rage at her more than once, which is not anything remarkable when it is considered that he is 87 years old. But she is her father's daughter, and moreover, she is not the least afraid that he means it, and she knows exactly how to manage him. So, when he reprimanded her for having her luncheon served on a little tray in the parlor, she ordered her maid to pack up her trunks and remove to the Buckingham. A pretty bluff, wasn't it, when it is considered that all his daughter's means of living is the \$60,000 which he allows her a year.

But she knew exactly how to manage her father, who is given to imagining things—so say her sons—and it was only a short time until he was denying the rumors that were flying about that he had disinherited her, and was sending for her to come home.

Charles Oelrichs' Surrender. Charles Oelrichs was forced to give in in much the same way to his daughter Lily when she became Mrs. Peter D. Martin. He, contrary to the other papas, had marked her out for a titled Englishman. But she took a desperate fancy to the young Californian, who, although he had some wealth and position in the western states, had only recently acquired it.

Miss Lily, who is a beautiful blonde announced from the first that she intended to marry Mr. Martin, but her parents tried the same tactics of freezing out that had prevailed at Papa Van Alen's. Three times the engagement was announced, and twice the wedding day was set, and then it was postponed, and young Mr. Martin returned to California. But at last they had to give in to Miss Lily, and the ceremony, postponed once more for a week, finally came off. But through it all Charles Oelrichs never acted ugly.

Romances Without Opposition. Of course when Miss Frederica Webb married Ralph Pulitzer, and when Miss Caroline Phelps Stokes married Robert Hunter they did not at first receive much opposition, as they had different parental material to deal with. Dr. Steward Webb always has been noted for his progressiveness, and he and his daughter Frederica always have held the same ideas as to the uses of money in the world, so that marrying a fortune was not considered a great point with them.

Andrew Carnegie is another whose little girl, if she grows up to be a willful young lady, will not lack for the support of the man with millions, let her do what she will—or at least so all would believe who remember how loyally he came to the support of his favorite niece, Miss Nancy Carnegie, when everybody in her family was against her.

But she knew exactly how to manage her father, who is given to imagining things—so say her sons—and it was only a short time until he was denying the rumors that were flying about that he had disinherited her, and was sending for her to come home.

BUYING PAINT.

Springtime—after the weather has become well settled—is painting time. There is no dust flying, no insects are in the air at that time ready to commit suicide by suffocation in the coat of fresh paint. The atmospheric conditions are also favorable at that season for proper drying and increased life of the paint.

It should be a habit with every property owner every spring to look over his buildings, etc., and see if they need repainting; not merely to see if they "will go another year," but whether the time has not come for putting in the proverbial "stitch in time" which shall eventually "save nine." For one coat of paint applied just a little before it is actually needed will often save most of the paint on the building by preventing it from letting go and causing endless trouble and expense.

Paint lets go because linseed oil, which is the "cement" that holds all good paint together, gradually decays or oxidizes, just as iron exposed to air and dampness will slowly decay or oxidize. The water and oxygen in the air are the cause of the trouble in both cases, and the only reason, outside of its beautifying effect, that we apply paint to wood or iron, is because we want to keep water and air away from them. Live paint, that is paint in which the linseed oil is still oily, does this very effectually; but dead paint, that is paint in which the oil is no longer oily, is no more impervious to air and water than a single thickness of cheese-cloth would be. If then we apply a fresh coat of oily paint before the old paint is dead, the oil from the new coat will penetrate the old coat, and the whole coating will once more become alive; and this method of renovation may go on indefinitely.

This explains why it is better economy to repaint a little before it becomes absolutely necessary than a little after. When the paint is once dead the fresh coat will pull the whole coating off.

In the days when repainting meant a general turning of things upside down, a two-weeks "cluttering up" of the place with kegs, cans and pails, a lot of inflammable and ill-smelling materials standing around, etc., the dread of painting time was natural. So was the dread of soap-making time, of shirt-making time, of candle-moulding time and the like. But we live in an age when soap comes from the store better and cheaper than we can make it, when shirts are sold ready made for less than we can buy the materials, when we can burn coal oil or gas cheaper than we can make tallow candles, and when all we have to do when we want to repaint is to pick out our colors from the card at the store and pay the painter for putting on the paint.

When it comes to picking out the paint it is not necessary that one should be a paint chemist, any more than one should be an oil chemist when buying kerosene, or a department store buyer when selecting shirts, or a soap chemist when buying soap. All that is necessary to insure a fair show is some knowledge of the character of our paint dealer and the reputation and standing of the maker of the paint offered. Nor must one expect to buy a pure linseed oil paint for the price of a pure linseed oil alone. It can be taken for granted when anyone offers to sell dollar bills at a discount, he is baiting a hook for "suckers." So it can be taken for granted when anyone—whether mail order house, paint manufacturer or dealer—offers paint too cheap, he is bidding for the trade of "suckers," no matter what his promises.

But paints sold in responsible stores under the brands of reputable manufacturers are all good products, differing from one another in the less important matter of the solid pigments contained, but practically alike in having their liquid portions composed essentially of pure linseed oil. The competition of the better class of paints has driven inferior goods practically out of the market, and no manufacturer of standing now puts out a poor paint, under his own name at least.

As to guarantees on paint, they can be taken for what they are worth. Any reputable manufacturer will make good any defect actually traceable to the paint itself and not to improper use or treatment of it. The really important guarantee which the paint buyer should exact from his dealer is that the paint is made by a manufacturer that knows his business and that the paint itself has a record. If he secures this guarantee he can afford to chance the rest of it—the paint will undoubtedly give good service if properly applied according to directions.

Only Wanted a Square Deal. "Prisoner," said the judge, "stand up. Have you anything to say why judgment of the court should not be pronounced against you?"

"I'd like to say, your honor," answered the prisoner, "that I hope you will not allow your mind to be prejudiced against me by the poor defense my lawyer put up for me. I'll take it as a great favor if your honor will just give me the sentence I'd have got if I had pleaded guilty in the first place."—Chicago Tribune.

Real Merit. Mrs. Skimkins—How do you like your new boarding house? Mr. Jobkins—Oh! the rooms are fine, the table is only tolerable, but the gossip is excellent.—Hotel Life.

It's a queer fact that the higher a man rises the less chance he has of being above suspicion.—Puck.

UPTON SINCLAIR STRIKES BACK

Author of "The Jungle" Faces Prince of Packers With Awful Array of Facts Calculated to Destroy the Infamous Industry.

In a recent issue of the Saturday Evening Post Mr. J. Ogden Armour makes the assertion that the government inspection of the beef trust slaughter-houses is an impregnable wall protecting the public from impure meat, and that not an atom of diseased meat finds its way into the products of the Armour's. Mr. Upton Sinclair, author of "The Jungle" (a terrific statement of packing house conditions), studied the meat industry for two years, including much time spent in the Chicago stockyards as a workman; he is the best equipped outside authority on stockyard conditions. In Everybody's Magazine for May Mr. Sinclair makes a startling and convincing answer to Mr. Armour's assertion. Commencing with the statement that J. Ogden Armour is the absolute and not the nominal head of the great packing house industry which bears his name Mr. Sinclair says: "I know that in the statements quoted, Mr. Armour willfully and deliberately states what he absolutely and positively knows to be falsehoods."

That he might be properly equipped to describe conditions in "Packingtown" Mr. Sinclair worked for a period as a laborer in the plant of Armour & Co., and he tells of sights of filth and horror such as he hopes never to see again, but the strongest coincidence of the truth of the claim that meat unfit for human food is put on the market comes from a man far more superintending at Armour & Co.'s Chicago plant, Thomas F. Dolan, of Boston. Mr. Sinclair in his article says:

"At the time of the embalmed-beef scandal at the conclusion of the Spanish war, when the whole country was convulsed with fury over the revelations made by soldiers and officers (including Gen. Miles and President Roosevelt) concerning the quality of meat which Armour & Co. had furnished to the troops, and concerning the death-rate which it had caused, the enormity of the 'condemned-meat industry' became suddenly clear to one man who had formerly supervised it. Mr. Thomas F. Dolan, then residing in Boston, had, up to a short time previous, been a superintendent at Armour & Co.'s, and one of Mr. Philip D. Armour's most capable and trusted men. When he read of the death-rate in the army, he made an affidavit concerning the things which were done in the establishment of Armour & Co., and this affidavit he took to the New York Journal, which published it on March 4, 1899. Here are some extracts from it:

"There were many ways of getting around the inspectors—so many, in fact, that not more than two or three cattle out of 1,000 were condemned. I know exactly what I am writing of, in this connection, as my particular instructions from Mr. W. E. Pierce, superintendent of the beef houses for Armour & Co., were very explicit and definite.

"Whenever a beef got past the yard inspectors with a case of lumpy jaw and came into the slaughterhouse or the 'killing-bed,' I was authorized by Mr. Pierce to take his head off, thus removing the evidences of lumpy jaw, and after casting the smitten portion into the tank where refuse goes, to send the rest of the carcass on its way to market.

"I have seen as much as 40 pounds of flesh afflicted with gangrene cut from the carcass of a beef, in order that the rest of the animal might be utilized in trade.

"One of the most important regulations of the bureau of animal industry is that no cows in calf are to be placed on the market. Out of a slaughter of 2,000 cows, or a day's killing, perhaps one-half are with calves. My instructions from Mr. Pierce were to dispose of the calves by hiding them until night, or until the inspectors left off duty. The little carcasses were then brought from all over the packing-house and skinned by boys, who received two cents for removing each pelt. The pelts were sold for 50 cents each to the kid-glove manufacturers. This occurs every night at Mr. Armour's concern at Chicago, or after each killing of cows.

"I now propose to state here exactly what I myself have witnessed in Philip D. Armour's packing-house with cattle that have been condemned by the government inspectors.

"A workman, one Nicholas Newson during my time, informs the inspector that the tanks are prepared for the reception of the condemned cattle and that his presence is required to see the beef cast into the steam-tank. Mr. Inspector proceeds at once to the place indicated, and the condemned cattle, having been brought up to the tank-

room on trucks, are forthwith cast into the hissing steam-bollers and disappear.

"But the condemned steer does not stay in the tank any longer than the time required for his remains to drop through the boiler down to the floor below, where he is caught on a truck and hauled back again to the cutting-room. The bottom of the tank was open, and the steer passed through the aperture.

"I have witnessed the fard many times. I have seen the beef dropped into the vat in which a steam-pipe was exhausting with a great noise so that the thud of the beef striking the truck below could not be heard, and in a short time I have witnessed Nicholas bringing it back to be prepared for the market.

"I have even marked beef with my knife so as to distinguish it, and watched it return to the point where it started. . . .

"Of all the evils of the stockyards, the canning department is perhaps the worst. It is there that the cattle from all parts of the United States are prepared for canning. No matter how scrawny or debilitated canners are, they must go the route of their brothers and arrive ultimately at the great boiling vats, where they are steamed until they are reasonably tender. Bundles of gristle and bone melt into pulpy masses and are stirred up for the canning department.

"I have seen cattle come into Armour's stockyards so weak and exhausted that they expired in the corals, where they lay for an hour or two, dead, until they were afterward hauled in, skinned, and put on the market for beef or into the canning department for cans.

"In other words, the Armour establishment was selling carrion.

"There are hundreds of other men in the employ of Mr. Armour who could verify every line I have written. They have known of these things ever since packing has been an industry. But I do not ask them to come to the front in this matter. I stand on my oath, word for word, sentence for sentence, and statement for statement.

"I write this story of my own free will and volition, and no one is responsible for it but myself. It is the product of ten years of experience. It is the truth, the whole truth, and nothing but the truth, so help me God.

"THOMAS F. DOLAN.
"Sworn to and subscribed before me this first day of March, 1899.

"ORVILLE F. PURDY,
"Notary Public, Kings County, N. Y.

"Certificate filed in New York county."

The significance of this statement, as Mr. Sinclair notes, is heightened by the fact that, published as it was in a newspaper of prominence, whose proprietor is a man of immense wealth and could be reached by the courts, Mr. Armour made no move to institute suit for libel; practically admitting that the statement was true.

Mr. Sinclair makes the assertion, and gives abundant proof, that the worry incidental to the "embalmed beef" scandal during the war with Spain caused the death of Philip D. Armour, and that millions of dollars were spent by the packing interests in the effort to keep concealed the truth about the matter. The awful mortality from disease among the soldiers during that few weeks' campaign was distinctly attributable to the meat rations supplied to the army. There seems small reason to doubt that meat as little fit for human food is still being placed on the market. How much disease and death has been the outcome may be imagined.

Summing up the entire facts of the situation, Mr. Sinclair concludes:

"Writing in a magazine of large circulation and influence, and having the floor all to himself, Mr. Armour spoke serenely and boastfully of the quality of his meat products, and challenged the world to impeach his integrity, but when he was brought into court charged with crime by the commonwealth of Pennsylvania, he spoke in a different tone, and to a different purport; he said 'guilty.' He pleaded this to a criminal indictment for selling 'preserved' minced ham in Greenburg, and paid the fine of \$50 and costs. He pleaded guilty again in Shenandoah, Pa., on June 16, 1905, to the criminal charge of selling adulterated 'blackwurst,' and again he paid the fine of \$50 and costs. Why should Mr. Armour be let off with fines which are of less consequence to him than the price of a postage stamp to you or me, instead of going to jail like other convicted criminals who do not happen to be millionaires?"

A Stone Barometer.

In northern Finland, so a native paper informs us, is a large stone which serves the inhabitants as an infallible barometer. At the approach of rain, this stone turns black or blackish gray, while in fine weather it is of a light color and covered with white spots. Probably it is a fossil salt, niter, or ammonia, which according to a greater or less degree of dampness in the atmosphere, attracts it or otherwise.—Sunday Magazine.

The Many Virtues of Salt.

Salt puts out a fire in the chimney. Salt in the oven under baking tins will prevent scorching on the bottom. Salt and vinegar will remove stains from discolored tea-cups. Salt and soda are excellent for bee stings and spider bites. Salt thrown on soot which has fallen on the carpet will prevent stains. Salt put on ink when freshly spilled on a carpet will remove the spot. Salt thrown on a coal fire which is low will revive it. Salt used in sweeping carpets keeps out moths.

ter was the kind which makes her misfortunes into triumphs—the only kind worth while to woman.

At first Papa Busch frowned on the Young German officer—as a suitor, that is. But in the role of an indulgent father he did not object to his coming to the house, and from there they went riding and driving every day. Then came the attempted elopement and its fiasco, after which the Busch mansion was called up by telephone. In the face of so flagrant disregard of his wishes and the failure of his little scheme of letting the matter wear itself out, what does Papa Busch do? He quickly capitulates.

seen delay, and the sailing had to be postponed until Saturday. She was detained in Paris and missed the boat, and when she arrived in London the duke insisted on going to Tanagerage castle. This was not according to the agreement, but the girl was again persuaded along. Of course, the Tanagerage trip made the announcement of the wedding necessary, and it was that that the newspapers cabled back and forth, the newspaper asserting, and Papa Zimmerman denying, the next thing Papa Zimmerman was told was a cable saying that it was all true, and asking his blessing.

The Chelsea Standard-Herald

An independent local newspaper published every Thursday afternoon from its office in the Standard building, Chelsea, Michigan.

BY G. O. STIMSON.

Terms:—\$1.00 per year; six months, fifty cents; three months, twenty-five cents. Advertising rates reasonable and made known on application.

Entered as second-class matter, January 11, 1906, at the postoffice at Chelsea, Michigan, under the Act of Congress of March 3, 1879.

Republican State Convention.

To the Republican Electors of the State of Michigan:

The State Convention of the Republicans of Michigan is hereby called to meet at the Light Guard Armory, in the city of Detroit, Wednesday, August 8, 1906, at 11 o'clock in the forenoon, for the purpose of nominating candidates for State offices, for the selection of a State Central Committee and a chairman thereof, and for the transaction of such other business as may properly come before the convention.

In accordance with the provisions of law and the action of the Republican State Central Committee, every county will be entitled to one delegate for each three hundred of the total vote cast therein for the Republican candidate for Governor at the last election and one additional delegate for a moiety of 151 votes or more.

Pursuant to law, Monday, the 18th day of June, 1906, is hereby designated as the day on which shall be held in each county, the County Convention of the Republican Party for the election of delegates to the Republican State Convention herein called.

Under the resolutions of 1858, no delegate will be entitled to a seat in the State Convention who does not reside in the county he purports to represent.

The delegates from the several counties in each Congressional District are requested to meet in district caucus at 9:30 o'clock a. m. on the day of the State Convention, and select officers as follows, to be presented to the State Convention for confirmation:

- 1—One Vice-President.
- 2—One Assistant Secretary.
- 3—One member of the committee on "Credentialed."
- 4—One member of the committee on "Permanent Organization and Order of Business."
- 5—One member of the committee on "Resolutions."
- 6—Two members of State Central Committee.

In compliance with the resolutions adopted in Detroit, June 23, 1890, the secretary of each county convention is urged to forward to the Secretary of the State Central Committee at Clare, by the earliest mail after the delegates to the State Convention are chosen, a certified list of delegates to the State Convention from his county, and the chairman of each county delegation is requested to deliver the credentials of his delegation to the member of the Committee on Credentials chosen at his district caucus.

By order of the Republican State Central Committee.

GERRIT J. DIEKEMA, Chairman.
DENNIS E. ALWARD, Secretary.
Lansing, May 1, 1906.

Republican County Convention.

The Republicans of Washtenaw county will meet in the court house in the city of Ann Arbor on Monday, June 18, 1906, at 2 o'clock p. m., for the purpose of electing 16 delegates to attend the Republican State Convention to be held in Detroit, Wednesday, August 8, 1906, and to transact such other business as may properly come before the convention.

Each township and ward is entitled to the following number of delegates:

GEO. L. VANDAWARKER,
Chairman.

FRANK W. CREECH, Secretary.

Notice.

The annual meeting of the Vermont Cemetery Association will be held at the cemetery at 2 o'clock, local time, Saturday afternoon, June 9, 1906. All who are interested are requested to be present.

R. B. WATROUS, Secretary.

PERSONAL MENTION.

Edgar Steinbach was a Detroit visitor Wednesday.

Mrs. J. G. Goodyear is visiting relatives at Howell.

Mrs. J. G. Webster is the guest of Chicago relatives.

W. H. Dancer, of Ann Arbor, was a Chelsea visitor Wednesday.

Jacob Alber, of Walkerville, Ont., is the guest of his parents here.

John Bagge, of Detroit, was the guest of Chelsea relatives Saturday.

Andrew LaRue, of Detroit, called on his uncle, Wm. Caspary, Monday.

V. C. Smith and wife are spending a few days with friends at Bryon, Ohio.

Mrs. C. Sawyer has gone to Albion to visit her daughter, Mrs. W. B. Gildart.

H. G. Prettyman, of Ann Arbor, was a caller at The Standard-Herald office Tuesday.

Wm. Arnold and wife attended the Swarthout-Surdam wedding at Pinckney Wednesday.

Adolph Woodbury and wife, of Ann Arbor, spent Sunday with J. G. Wackenhut and family.

Robert Ward and Miss Frances Geer, of Jackson, were guests at the home of A. E. Winans, Sunday.

Mrs. O'Donnell, of Jackson, and Mrs. Nora Notten visited with Mrs. Ada Steinbach one day last week.

T. A. Mears, live stock editor of the Detroit Free Press, was a caller at The Standard-Herald office Tuesday.

Mrs. A. H. Steinbach and children, of Dexter, are spending this week at the home of Chas. Steinbach and family.

Misses Minnie Steinbach and Maria Haarer, of Ann Arbor, spent one day of last week at the home of Geo. Wackenhut.

Mrs. Walter Hawley, of Union City, spent several days of the past week at the home of Mrs. W. E. Stucking, of Lima.

Wm. Caspary attended the confirmation of his niece, Miss Therese O'Connor, at the Holy Redeemer church in Detroit, Sunday.

Mrs. Jacob Lamb, of Detroit, spent the first of the week at the home of her mother, Mrs. R. C. Glenn, of east Summit street.

Miss Beatrice Bacon returned home Tuesday morning from Charlevoix, where she has been teaching school for the past year.

Mrs. Geo. P. Staffan and son, Frank, of Detroit, were guests at the home of her parents, H. L. Wood and wife, several days of the past week.

Mrs. E. E. Shaver, J. S. Cummings, Geo. W. Millebaugh and son spent several days of the past week at the home of their brother, Howard Cook, of Gregory.

ADDITIONAL LOCAL EVENTS.

The W. R. C. of Grass Lake on Memorial Sunday presented to the Baptist society of that village a fine American flag.

Christian Science services are held regularly in the G. A. R. hall. Subject of lesson sermon for June 10, "Is the universe including man evolved by atomic force." Golden text: Thy God hath commanded thy strength; strengthen O God, that which thou hast wrought for us." Psalm 68:28.

The Chelsea Cornet band of sixteen pieces will leave for Jackson next Monday evening. On Tuesday they accompany the members of Central City Tent, K. O. T. M. M. to Port Huron, where they will attend the dedication ceremonies of the new Macabee temple. The band boys will reach home next Wednesday.

Children's day will be observed next Sunday at 10 a. m., at the Congregational church. A program of songs and recitations by the members of the Sunday school will be presented and the New Cradle Roll will be inaugurated. A special invitation is extended to all the children to come and bring their parents. "Jonathan Edwa is, the thinker of New England," will be the evening subject.

Next Sunday will be Children's day at the Methodist church all day. In the morning a program will be given by the children. It will be instructive and entertaining. The Junior League will have a stereoscopic lecture in the basement of the church at 2:30 p. m. In the evening the pastor will preach a sermon to the children. The officers of the Epworth League will be installed before the evening sermon.

Attention! Modern Macabees. Sunday, June 10th, is Macabee Memorial day. You are requested to meet at the hall promptly at 2:30 p. m. standard time to attend to the important duty of decorating the graves of our departed Sir Knights. The hall will be open Sunday forenoon so that those who wish can bring flowers and leave them. Friends of departed Sir Knights are especially invited to do this. Geo. E. Jackson, Com.

Subscribe for The Standard-Herald.

CORRESPONDENCE.

JERUSALEM.

E. Loeffler spent Sunday with relatives in Freedom.

Martha Grieb, of Lodi, is spending some time at home.

Geo. Wagner and wife, of Chelsea, were visitors here Sunday.

Martha Schable, of Lodi, is a guest at the home of Fred Klein.

Fred Klein and wife entertained company from Chelsea Sunday.

Andrew Marshall and Fred Detting were in Ann Arbor Thursday.

LYNDON CENTER.

Dr. T. I. Clark, of Jackson, spent the first of the week with his parents here. James Howlett has the wall for his new house all ready for the carpenters.

The regular meeting of Eureka Grange will be held at the hall on Friday evening next.

Edward Shanahan had the misfortune to lose a valuable horse last week. He has purchased another to replace it.

Miss Margaret Young, teacher in district No. 11, and Miss Palmer, teacher in district No. 5, will hold a picnic for both schools at South Lake on Saturday, June 9. A cordial invitation is extended to all.

LIMA CENTER.

Will Coe was in Ann Arbor Saturday.

Mrs. J. Wade and children were Ann Arbor Saturday.

Mrs. George Whittington was in Ann Arbor Saturday.

Mrs. Mary Hammond was in Ann Arbor Saturday.

A. Webb and wife spent Sunday with D. Rockwell in Sylvan.

Theodore Weinman and wife called on Mrs. Harry O'Neill Sunday.

Ed. Forner and wife, of Sylvan, spent Sunday at the home of C. Forner.

Art Guerin is recovering from an attack of inflammation of the bowels.

Wm. Poor and wife and Henry Strieter and wife were guests at the home of Mrs. A. Strieter, Sunday.

FRANCISCO.

Floyd Schweinfurth and Elert Notten spent Sunday at Waterloo.

J. Goodrich and wife are visiting at the home of Henry Musbach.

Maud Kalmbach is spending a few days with her aunt, Mrs. Fred Notten.

Mrs. J. Alber and daughter and Mrs. A. H. Mensing called on friends here Sunday.

Ed. Riemenschneider and wife spent Friday with their father, W. Riemenschneider.

Miss Edie Hesselchwerdt, of Sharon, is visiting at the home of John Killmer this week.

Russell Day and family and Roy Taylor and wife, of Jackson, called on friends here Sunday.

Mrs. James Fred Mensing and John Killmer attended the funeral of Harry O'Neill at Sharon, Monday.

Miss Myrtle Schweinfurth, of Jackson, who has been spending a week at the home of P. Schweinfurth, returned to her home Monday.

The Ladies' Aid Society of the German M. E. church will hold an ice cream social on Thursday evening, June 14, at the home of Mrs. Caroline Notten.

NORTH LAKE.

Bees have begun swarming in good earnest.

Our minister has bought a fine looking black horse.

The lake and fine drive draws many here these days.

Ernest Cooke and wife were visiting in Jackson last week.

Wm. Burkhardt and company called on friends here Sunday.

Marion Griffith and wife are better and will soon return to Chelsea.

Louis Chamberlain and wife, of Webster, visited relatives and friends here, Sunday.

Our life-long friends, Andrew Jackson and wife, called here last week. They are looking fine.

Chelsea people get their big fish here. The bait has much to do with fishing. Worms are played out.

A. H. Glenn and family were guests of Mr. and Mrs. Whallan, Saturday and Sunday and attended church here.

A letter from Dakota tells of two weeks of rain and seeding hindered thereby. Mrs. Hyde is reported as quite low, with little hope of recovery. She has many friends about here.

A horse driven by Meryl Prudden, of Chelsea, last Sunday, became frightened at some object in bushes near North Lake Corners and shied, bringing the off-wheels onto a high bank, which threw one of the three young ladies at of the rig, without sustaining any serious injury. The other occupants managed to get the horse under control about one mile further down the gravel road.

It has been estimated that 6,000 pupils will graduate from the public schools of Michigan this year. Michigan always prided herself on her educational spirit.

SOUTHWEST MANCHESTER.

Hay batters are busy in these parts now days.

The children are busy preparing for flower Sunday.

Albert English and wife are the proud parents of a baby girl.

Mrs. P. Brower entertained the A. C. F. society Friday afternoon.

Will Pease and wife, of Manchester, were in this neighborhood Sunday.

Rev. and Mrs. Parsons are nicely settled in the new parsonage at Iron Creek.

Geo. Green and wife, of Norvell, were guests at the home of Julius Matterson, Sunday.

Dwight Walters and wife, of Clinton, were guests at the home of Will Johnson Sunday.

R. Green and wife attended the funeral of John Moran, of Jackson, Monday.

Miss Amelia Uphaus has been unable to work for three weeks on account of a felon on her hand.

Miss Gladys Matterson and Hannah VanWinkle attended a social at the home of George Rawson, in Bridgewater, Friday night.

A. A. Green and wife and Ben Matterson and family attended the funeral of their cousin, Harry O'Neill in Sharon Monday, who was accidentally killed while at work near Wolf Lake. He leaves a wife and child and a host of other relatives.

As Vernon Pierce and a young friend were coming from town Saturday a huge automobile loomed up before them, the horse began rearing and Vernon sprang for its bit, when the horse struck him with its fore-feet. The fact that he was not shod probably saved the boys life.

June 14 will be "Flag Day" throughout the United States, and the national colors will be paid due honor on that day. The American Flag association has sent out circulars to city officials and newspapers throughout the country calling attention to the occasion and suggesting celebrations along certain lines.

The Washtenaw County Sunday School Association held their meeting in the Chelsea Congregational church Monday afternoon and evening of this week. Interesting and instructive addresses were delivered by D. B. Allen, of Covert, treasurer and corresponding secretary of the Michigan Sunday school association, Rev. E. H. Vail, of Milan, and Mrs. M. L. Thompson, of Ypsilanti.

Twenty thousand dollars will be saved to the state treasury through Governor Warner's approval of the recommendation of the state military board, to have the next encampment of the Michigan troops held with the troops of the regular army near Indianapolis. And the value of the encampment to our state's soldier boys will be far greater when held where they can observe the methods and movements of the regular army troops.

Memorable Incident.

One of the greatest pleasures in the life of a snail boy is to receive an invitation from an older companion to accompany him to the nearest drug store and stand by while the elder lad orders ice cream soda for himself and calmly eats it alone, after which both file out of the store. It is an incident which will go down to the grave with every boy who witnesses it.—Los Angeles Express.

Snails for Mary.

This quaint prescription was printed in "An Old Lady Pharmacopoeia," published by Mrs. Delany in 1758: "Doct Mary cough at night? Two or three snails boiled in her barley water or tea water or whatever she drinks might be of great service to her. Taken in time, they have done wonderful cures. But Mary must know nothing of it!"

Not That Kind of Suits.

A dilapidated person rang a West Philadelphia door bell and asked the lady of the house, a lawyer's wife, whether she had any old suits. "Go to see my husband at his office," she answered. "His are mostly old. He's had one of them I know for more than 20 years." The tramp looked discouraged.—Philadelphia Record.

My Hair Ran Away

Don't have a falling out with your hair. It might leave you! Then what? That would mean thin, scraggly, uneven, rough hair. Keep your hair at home! Fasten it tightly to your scalp! You can easily do it with Ayer's Hair Vigor. It is something more than a simple hair dressing. It is a hair medicine, a hair tonic, a hair food.

The best kind of a testimonial—"Sold for over sixty years."

Made by J. C. Ayer Co., Lowell, Mass. Also manufacturers of SASSAPARILLA, PILLS, and CHERRY PECTORAL.

CLEARANCE SALE

Ready-to-Wear Goods.

Instead of waiting until the season's end to cut the price on Suits, Odd Skirts and Jackets, bought for spring and summer wear, we mark them down right now and give our customers the advantage while they can still use the goods. For the next ten days we shall make very low prices in this department.

Ladies' Suits.

All New Goods this season. During this Sale at just 1-2 Price.

\$25.00 Suits \$12.50. \$20.00 Suits \$10.00. \$15.00 Suits \$7.50.

Ladies' Silk Coats.

We have about ten of our best selling styles left, and while they last will make these prices:

\$20.00 Coats \$14.50. \$17.50 Coats \$11.50. \$11.50 Coats \$7.50.
\$9.00 Coats \$6.00. \$5.00 Coats \$3.75.

Ladies' Cloth Coats.

The wind-up of a number of this spring's best styles. Only a few of each kind, so come early. They will be priced during this sale.

\$12.50 Coats \$8.50. \$10.00 Coats \$6.50. \$9.00 Coats \$6.00.
\$7.50 Coats \$5.00. \$5.00 Coats \$3.50.

Girls' Coats.

All new styles in all colors, all sizes from 4 to 14 years, and all marked at prices that will sell them quick.

\$5.50 Coats \$3.75. \$5.00 Coats \$3.50. \$4.50 Coats \$3.00.
\$4.00 Coats \$2.75. \$3.50 Coats \$2.50.

Ladies' Odd Skirts.

Four special wind-up opportunities in Ladies' Dress Skirts. We shall make just four lots of skirts, and in each lot those that come first will find nearly all sizes and colors, both plain and fancy and at prices that you did not dream of. These are the prices they will go for:

Lot No. 1 \$1.98. Lot No. 2 \$2.98. Lot No. 3 \$3.98. Lot No. 4 \$4.98

Don't fail to see these skirts, as they are certainly the best skirt values ever presented to the ladies of Chelsea and vicinity.

Saturday Specials.

Special No. 1.

We shall give our customers the benefit of a purchase of Ribbons that we bought at much less than the regular price.

1,000 yards all silk Taffeta Ribbon, black and white, three widths, 40, 60, 80, regular price 25c and 29c. Saturday Only 14c.

Special No. 2.

500 yards regular 10c Bleached Sheetting, 36 inches wide, a snap at the present high price of cotton. Saturday Only 6 1/2-4c.

CHELSEA, MICHIGAN, THURSDAY, JUNE 21, 1934

MAJOR OZONE'S FRESH AIR CRUSADE

HE GETS A CLOSE SHAVE ALRIGHT, ALRIGHT

AT LAST HE MEETS HIS MATCH

HE MAKES A HIT, BUT PA MAKES A HOME RUN

PRETTY FROCKS AND SWELL HOSIERY

THE LITTLE GIRL'S LINGERIE FROCK.
There are few prettier frocks for children than those made of sheer white materials, such as lawn and batiste. The dainty little frock illustrated is made of French batiste that will stand tubbing successfully. The gored front panel, daintily embroidered, is a new idea, while the bit of embroidery encircling the yoke together with the lavish use of Valenciennes insertions, make the little frock quite as charming as any fond mother might wish.

Embroidered Hosiery "The Thing"

NEVER before have the dealers offered such dainty and all-around satisfactory stockings. The plain silk and lisle hose embroidered in dainty flower designs are in the first style this season and they are especially attractive when worn with low shoes. The designs are usually worked in colors on plain black stockings, delicate pink, blue and yellow flowers being most in demand.

It is predicted that all white hose will be more popular than ever the coming season. The white shoes must, of course, be worn with white stockings and there will be no trouble at all to find pretty ones, so many charming patterns have been turned out. The most popular are the white lace lises, which may be had in a great variety of designs.

Then there are exquisite white hose of both silk and lisle, embroidered in pretty floral designs. The lises may be had in colors, the blue ones being irresistible. These are intended for wear with gowns to match.

There are novelties, of course, as in all other seasons, but the well-dressed woman does not seek these distinctive styles. She prefers the more modest designs and if she does not choose colors to match her gowns, she sticks to black for general wear and white with her white gowns.

Before purchasing a pair of hosiery, the toes, at least, should be carefully inspected, and if they are exceedingly narrow, as many of the styles are now, they should not be selected, for nothing is more injurious to the feet than stockings with small toes. They are, to my certain knowledge, accountable for all sorts of troubles that the majority of persons attribute to leather boots, etc.

Worse even than narrow toes is the habit that many women have of buying hose too small for their feet, and wearing them constantly. It is needless to say that binding flesh in tight stockings is one of the most harmful forms of lacing, because it restricts circulation. And when it is impaired the individual becomes a prey to all sorts of ailments, which, by the way, not only manifest themselves in corns and callouses, but by affecting the general health.

Stockings too large, the other extreme, are also bad, but the ill-effects they cause are not to be compared with the wearing of tight hose.

MONOGRAMS NOW THE RAGE.

Everything that can show an embroidered name does so, and there are the daintiest designs for underwear, those in which flowers appear being most liked, and for collars, chemisettes, gloves, the long chiffon scarfs, the draped veil, the fan and even the undersleeves, when these are put into a band, are inconspicuously lettered.

The craze extends naturally to the table. Not that its use there is new, but it has become a rage, and all the dainty china, the silver and glass, no matter what the decoration is, the design must show somewhere upon it some gold letters.

As for the table linen, it has always been worked in plain, unassuming white. Now the monogram or the initial letter of the family name is done in a color, and no longer on one side of the corner, but just anywhere in a careless and not particularly-to-be-commended fashion.

The latest belt buckle is an octagonal shaped piece of gold with a border of delicate tracery including a raised monogram.

For the purse, cardcase and key-ring, there are initials and monograms, as also larger ones for the articles which come in gold, silver, gun-metal and enamel.

Sunshades will show a monogram. The favorite design is one of plain old English letters done in solid, padded embroidery.

To the ultra fastidious this proclaiming of one's identity to the neighborhood crowd may appear in poor taste, but it's the fashion, and like every other of its follies, may be modified or exaggerated at one's own discretion.

THE PLAIN TAILORED LINEN SUITS HOLD HIGH FAVOR

Linens stand unrivalled in favor for the making of dressy summer suits for both street and formal wear. In addition to various qualities in plain linens, from the finest handkerchief variety to the heavy Russian crash, there are now developed all sorts of colored plaided and striped designs, some of them copies of the latest madras patterns with each wide square formed of heavy lines of white upon a dull blue background. One of the handsomest of these is this blue and white checked linen, with black velvet collar, cuffs and pocket flaps upon the coat.

For the strictly tailored girl, who wears season after season to the white linen coat suit, there are endless simple coats and skirts, relieved with just a touch of blue, green or black moire or velvet on the collar and cuffs to dispute the all-white effect. But the average woman, keenly alive to the possibilities of line, will find joy in wandering far from such severe lines.

Embroideries and laces, singly and together, are inserted or applied as trimmings, the quantity and quality determined only by the size of the bank account or the dresser's allowance. The girl who economizes knows that nothing will stand the successive tubbings necessary for all cotton or linen frocks quite as well as the little linen suit, the material for which she has carefully shrunk in the piece before making up, to avoid any unpleasant results from its first extension to the laundry. She also buys linen lace or linen braid for trimmings, and if clever with her needle may fashion a "dream of a gown" by adding fine embroideries in delicate flower patterns. Color sometimes, though not frequently, enters into these embroideries, and it were better avoided, unless the gown be rather and very elaborate, and likelier to meet the dry cleaner than the laundress. A recent importation of an embroidered linen gown shows the color note appearing in the dark brown centers of the daisy pattern, the flowers in white with the leaves and stems done in shades of palest yellow fading to dead white and gray. Two sprays upon each side of the front of the short coat extend their

LACE COATS FASHIONABLE.

The newest cutaway model is of Irish lace, woven in one piece, with medallions of embroidered linen inserted upon sleeves and body. The back, fitting snugly to the figure, eases in at the waistline, and then falls away at the sides with a coat-tail effect. The bell-shaped sleeves, as well as the coat edges, are finished with a narrow Richieu plaiting of white malinette, with a narrow cord of featherbone inserted in the headings to properly support and retain the fine lines of the coat.

WITH A LITTLE CARE YOU CAN SAVE MONEY

The proper selection of clothes is not more important than the proper care to be taken of them afterward, and garments that are well cared for will last as long again as those that are not.

It is a matter of economy to invest in the various articles that are sold for the purpose of preserving the shape of clothes and shoes, and when invested in to use them constantly.

Coat hangers cost only a trifle, and every wardrobe should contain a large supply of them, as they are useful not only for heavy coats and wraps, but for blouses of all kinds.

There is a noticeable difference in the shape of a coat that has invariably been placed on a hanger and one that has invariably swung by the loop in the back of the neck; it would be more to the point to say that the one is a shape, while the other is not.

Most women, unfortunately, make the mistake of considering shoe-trees a luxury instead of a necessity, and their shoes are an unmistakable evidence of the fact. The woman whose feet always look trim and tidy is the one who has shoe-trees, and uses them.

The care of the small accessories of dress is quite as important as that of outer garments and shoes. Much can be done towards preserving the crisp, fresh appearance of a hat if it is always kept in a box.

A hatbrush that is kept busy and a handbox for every hat are necessary if one's headgear is to be kept up to the standard set by coat hangers and shoe-trees.

The occasional use of a hot iron and a little care in folding when putting away will keep veils fresh and new looking for a long time, and for chiffon veils a thorough rubbing in soap and warm water is very beneficial. The worst thing in the world for a veil is to leave it tied around a hat, particularly if it is at all damp.

TO CLEAN SPONGES.

Place a pennyworth of salts of lemon in a quart of boiling water and soak the sponge in it. After an hour rinse thoroughly in warm water, or drop the sponge into water in which a large lump of soda has been dissolved, afterward boiling slowly. Rinse in cold water, then throw it into your basket which should be hung just outside the bathroom window.

Orange-flower cream will feed the tissues of the skin and round out the face. Massage every night is beneficial. When the desire is to increase the flesh, movements should be given gently. Cocoa butter and lanolin should not be used when there is a tendency to growth of superfluous hair.

CARE FOR YOUR PETTICOATS.

A silk petticoat may be made to serve almost twice its usual period of usefulness if it is lined as far down as the bottom ruffle with nun's veiling or some other lightweight fabric. The weight of the skirt is not noticeably increased, nor does it spoil the fit about the hips if carefully done. By doing this the skirt is kept in shape, and there will be much less tendency to split at the seams; a fault that is so commonly developed in silk petticoats, especially those of taffeta.

THE OUT-DOOR LIVING ROOM A FAD.

The first step toward creating this habitable veranda is to screen it well from the view of passersby. Vines, with their suggestion of rusticity and coolness, are the most satisfactory for this purpose, and among the many varieties of climbers the stately old English ivy must have first mention, although of them all the simple wild cucumber, whose seeds must be planted every year, is the most thrifty.

The vines may be trained so that three or four window-like openings are left, and a border of red geraniums or bright yellow nasturtiums at the roots of the vines is always artistic, and overhead the red-striped awning contributes to the picturesque effect.

Second to vines Japanese shades make the most desirable screens.

On the floor spread a long, narrow rug of Japanese matting or a couple of small ones. If space permits a couch and hammock both will add to the attractiveness, or either will answer.

Pillows, of course, pillows galore, made of serviceable material, with an extra half dozen bright red-covered ones filled with excelsior scattered about the floor along with the floor mats to give a cheerful bit of color.

A table with an underself furnished with pretty, but not too delicate, tea things, and a tiny tabouret with an assortment of smoking articles, gives the stay-at-home young woman an opportunity to dispense hospitality to her friends, and the latter goes a long way toward explaining the reason why her men acquaintances find her out-of-doors den preferable to the downtown club.

 of Chelsea, sold six head of horses last
 Friday and five of them were taken to
 Detroit and one was sold to parties
 here.

Arthur Foster, who has been clerking
 for Penn & Vogel, has accepted a position
 in the circulation department of the
 Detroit Journal. He left for Detroit,
 Monday.

Wm. Atkinson and family, who have
 been residents of Detroit for the past
 year, have moved their household goods
 to Chelsea and will again make this
 place their home.

The net proceeds of the drama, "Jerry,
 the Tramp," produced by local talent at
 the opera house for the benefit of the
 new parochial school, Monday and Tues-
 day night, was \$140.

Mr. and Mrs. A. O. White, who have
 been in Chelsea for the past two months
 and who have directed several dramas
 by local talent returned to their home
 at Adrian Wednesday.

D. C. McLaren has shipped twenty-five
 carloads of hay from the Chelsea station
 of the M. C. the past week, and has
 bought all of the hay in this vicinity
 this year, except one lot.

County Drain Commissioner Runciman
 spent several days of the past week at
 Saline getting ready for letting the con-
 tract for the Hammond-Welnett
 ditch which will take place June 15.

E. K. White was in Port Huron, Tues-
 day, looking after the new machinery he
 is about to place in the Chelsea Roller
 Mills. He expects to receive a portion
 of the machines the last of this week.

Children's day will be observed at
 the Baptist church next Sunday morn-
 ing. A fine literary and musical pro-
 gram has been prepared, which will be
 given in place of the usual morning
 sermon.

All Lady Macabees are earnestly in-
 vited to meet at Macabee hall, Sunday,
 June 10, at 2:30 o'clock, standard time,
 to observe memorial day. All those that
 can furnish flowers, please take them to
 the hall Saturday evening.

Beginning Sunday, June 10, and con-
 tinuing during the summer months, the
 services at the Church of Our Lady of
 the Sacred Heart will be as follows, viz:
 On Sundays, low mass, 7:30 a. m.; high
 mass, 10 a. m.; vespers and benediction,
 7:30 p. m.; on week-days, low mass, at
 7:30 a. m., sun-time.

 determine the admission fee. Ice cream
 and cake will be served. All who come
 will have a jolly good time.

Marshall Young informs The Standard-
 Herald that the owners of several pieces
 of property in Chelsea have a large
 crop of burdocks, plantain, yellowdock,
 etc., growing on their premises that
 should be cut and taken care of at once.

Miss Flora Kempf, who has been
 teaching school in Albion for the past
 three years, will return to her Chelsea
 home the last of this week. Miss Kempf
 will attend the U. of M. next year, where
 she will take up a course of special
 studies.

Mrs. C. H. Kempf left for Hillsdale,
 Monday, and Mr. Kempf left for the
 same place yesterday. Miss Bessie
 Kempf, their granddaughter, is one of
 the graduating class of the Hillsdale
 high school. Mr. and Mrs. Kempf will
 attend the exercises this evening.

Mrs. Emory Fletcher, of Detroit, was
 run down by a bicycle rider in that city
 last Tuesday. She was taken to Emer-
 gency hospital, and the physicians re-
 port that she has a broken arm. Her
 brother, John Hathaway, of Chelsea, is
 in Detroit to assist in taking care of her.

The two ball teams, known as the Congre-
 gationalists and Methodists, played
 a game yesterday afternoon and the
 Congregationalists won by a score of 6
 to 4. The teams will play another game
 next Wednesday afternoon, and are
 under the management of Arthur Avery
 and Don Bacon.

Geo. Whitting will run an excursion
 to Detroit next Sunday, June 10, over
 the D. Y. A. A. & J. from Chelsea and
 Lima Center. The fare will be \$1.00
 for the round trip and a private car will
 be run if fifty tickets are sold. For
 further particulars apply to the Chelsea
 agent at the waiting room.

Frank McMillen has adopted a novel
 plan of draining a piece of low land on
 his farm in Lima. Some time ago he had
 Geo. H. Foster & Son put down a three
 inch pipe in the center of the water
 hole, which was driven 80 feet, where a
 bed of gravel was struck and the low
 place is now successfully drained.

Thos. C. Gorman, son of Mr. and Mrs.
 Ed. Gorman, of Lyndon, who has been
 attending the law school of the Valparaiso
 University for the past four years
 is a member of the graduating class.
 The exercises take place today. The
 many friends of the young attorney in
 this vicinity wish him success in his
 chosen profession.

R. D. Walker, master-at-arms, of the
 Great Camp of Modern Macabees, will
 leave Chelsea next Monday for Port
 Huron, where he will take part in the
 dedication ceremonies of the new Maca-
 bee Temple next Tuesday. He will
 also attend the sessions of the Great
 Camp which will be held at Ludington
 beginning next Wednesday.

Geo. E. Jackson, commander of Chelsea
 tent, No. 281, K. O. T. M. M., has received
 notice of his appointment as a member
 of the per diem committee of the Great
 Camp of Modern Macabees. The Great
 Camp will meet at Ludington next Wed-
 nesday. Mr. Jackson will leave Chelsea
 next Monday for Port Huron, where he
 will attend the dedication of the new
 temple on Tuesday, leaving there that
 evening for Ludington.

IN OUR WINDOW

Note the Strikingly Handsome Styles of
Queen Quality Summer Oxfords

Displayed in our window this week. Note also the moderate prices
 asked for these really fashionable and pretty shoes.

It is not because of price alone that we ask you to try one pair of
 Queen Quality Oxfords. Other shoes there are in plenty at the same
 price—but none so favored by exacting, well-dressed women; none other
 so popular or so widely worn; none other so genuinely satisfying alike to
 the eye, the foot and the purse. \$2.50 and \$3.00 a pair.

The Doris Oxfords at \$2.00 and \$2.50 a pair. The Bernaldas at
 \$1.50 and \$1.75.

Don't Stop at the Window--Come In.

We Are More Pleased Than Ever to Show You.

W. P. SCHENK & COMPANY

Elastic Paint

Paint must be elastic or
 it will crack and peel off.
 A film of Pure White Lead
 and Linseed Oil paint,
 gives with the shrinking
 and expansion of the wood.
 Mixtures of other pig-
 ments are hard and in-
 evitably crack. To be sure
 of a pure, unmixed ma-
 terial, use

Eckstein White Lead

and our Pure Linseed Oil.

Such a paint wears well.

L. T. FREEMAN

Cuban Ointment

Is not a cure-all, but is a positive cure for all skin diseases, such as Cuban
 Itch, Barbers' Itch, Eczema, Salt Rheum and many other skin troubles,
 which are prevalent in this country. Over 300 cases have been cured in
 Jackson, Mich., without a single failure. Send \$1.00 and get a box on a
 positive guarantee to cure or money refunded.
