

Michigan's public enemy No. 1 today is inflation, the by-product of war.

It is responsible for most of the problems now before state and local governments.

This fact came to us with new force the other day when we heard State Senator Otto Bishop of Alpena, chairman of the Senate Finance committee, give an excellent luncheon talk on state government's financial dilemma. We then visited the gallery of the House of Representatives at the Capitol. What we heard there was an echo.

Here's the over-all picture, as we see it.

The worth of a dollar bill is measured by how much you can buy with it. Compared with 1939 prices, the dollar today is worth only 60 cents.

This is dollar inflation. It has followed every major war: War of 1812, Civil War, World War I, and now, World War II. It happens whenever there are more dollars in circulation than there are goods on the market.

World War I was followed first by inflation, then by depression. By 1932 the banks were closed, thousands of people were losing their homes. The state legislature voted a mortgage moratorium, abolished the state realty tax, and adopted a 3 cent sales tax. Eleven cities took refuge behind a 16-mill limit of local real estate taxes, as offered by constitutional amendment.

Then World War II came to us via Pearl Harbor. Prices started upward again. State government collected more taxes than it could spend. Then came an amendment which took \$50 millions of surplus and created a veterans' trust fund. Money was earmarked also for hospital beds, college buildings and other needs, all long neglected.

Inflation grew worse. Cities badly needed more funds. So did public school teachers. Cities and teachers then put over an amendment to divert 76 per cent of the state sales tax (first adopted as a substitute for the state real estate tax) back to local governments.

Where 59 per cent of this money was returned to local governments last year (ending July 1, 1947), the total will run 76 per cent by July 1, 1948.

Now as long as prices keep going up and up, the 3 per cent sales tax has yielded more and more money. By 1947, for example, the state expects to have a surplus of \$43 millions. By using this sum and what is left of state collected revenues, state government will have a deficit of \$28 millions by July 1, 1948.

Last year the state collected \$32 millions in taxes. The state then paid \$226 millions to local governments. The total revenue collected by state and local governments was \$693 millions. Local governments got 77.5 per cent of this; state government had 22.5 per cent.

The inflated dollar is putting everyone in the hole—citizen, local government and state government.

Deficit financing looms for several county governments. Disbursements of all county governments in Michigan rose from \$64 millions in 1946 to \$86 millions in 1947. Such was inflation. The dollar in 1946 was worth 71 cents. Today it is worth 60 cents.

Deficit financing looms for the State of Michigan. Except for the July surplus, the deficit next year would be \$61 millions.

The state legislature is wrestling with the effects of inflation. On the state cut its own expenditure to make up the gap caused by diversion of more revenue to local governments? Should the state cut out other state aids such as money to public libraries, welfare money to the poor, and so on? Should hospital beds be provided for the mentally ill? Should college buildings be finished?

We can't lick dollar inflation by levying more taxes.

We can check inflation by spending fewer dollars—deferring social expenditures, and putting this money aside for use later on when dollars will be worth more than 60 cents.

The Security Bonds campaign, opening this week, offers each citizen an opportunity to act.

Inflation is our Public Enemy No. 1.

Altar Society Hears Talk on Family Life

Reports Given on Detroit Conference of Catholic Women

The April meeting of St. Mary's Altar Society was held Wednesday, April 7, at 8 o'clock at St. Mary's hall. Forty-eight members and fifteen guests were present, including two guests from Adrian, Mrs. John Marvin, president of the Southwestern Deanery and Mrs. J. W. Kirkwood.

During the business meeting the Cancer Fund committee asked for volunteers to assist with the Cancer Fund Tag Day to be held April 30.

Very interesting and timely reports were given by Mrs. Armin Schneider and Mrs. Norbert Merkel, delegates to the Day Convention of the National Council of Catholic Women held recently at the Statler hotel in Detroit. Excerpts from the reports are as follows:

"One thousand women listened to talks by outstanding speakers on 'Family Life,' the general theme of the convention. One of the morning speakers, Dr. H. J. Healy of the Juvenile Court in Detroit, told his audience that movies are just one of the things that affect our youth. Good movies can be a good influence and vice versa, but people have become apathetic and have let some movies break down their standards. Magazines also influence youth. There is hardly a national magazine that doesn't need cleaning up before it reaches the youth of the country," is the opinion of the speaker.

Another on the agenda, a priest, stated that ninety-four million people attend the movies every week in the United States and of this number, thirteen million are children under thirteen years of age. For this reason the Catholic church takes a great interest in the movies and because of this interest the League of Decency was formed to call attention to the problem and rate movies according to their acceptability to child audiences.

The featured speaker at the luncheon was Rev. Fred Mann of Wichita, a Kansas priest, who presided at the conference movement in this country, who reported that 60 dioceses have now held these days which are devoted to a spiritual reeducation to marriage.

Modern marriages are failures because people are trained to be selfish, he said.

"Our whole civilization within the last thirty years has become almost completely pagan. We have shifted from a spiritual acceptance of life to pagan standards of money, power, popularity, personal pleasure, and entertainment as the only worthwhile values," he added.

Father Mann cited many statistics to show the results of personal selfishness.

"Marriages are successful and happy only because of the ability of the partners to sacrifice. It is a habit patterned largely on the fact that they recognize a higher ideal or law than their own personal interests," he stated.

"Failure in marriage," Father Mann pointed out, "is causing a disintegration in personality that is reflected in our present national pattern of unrest."

Following the reports, Mrs. H. J. Thomsen, a Chelsea resident and member of the Ann Arbor Story Tellers League, delightfully entertained the group by telling two stories, "The Conqueror" and "The Facts" by Ring Lardner.

Decision of the group was to be served by the committee of the month at the close of the meeting.

Returning Veterans Brighten Outlook for Successful Year

By DWIGHT GADD
With a veteran-studded team ready to take the field in tomorrow's opener with Ann Arbor High it appears that Chelsea has good reason to expect a fairly successful season.

An old baseball adage says, "a team is as strong as it is down the middle," and in these middle positions, namely, catcher, pitcher, second, shortstop and centerfield, the Bulldogs seem well set.

Five letterwinners, Capt. Jim Miller, Dave Slane, Oscar Hansen, Bob Stoffer and Jim Ewald, are the nucleus around which Coach Newkirk has built this year's outfit, and along with some younger talent it looks quite capable.

Dave Slane will be behind the plate again this year, getting the nod over Dan Maroney because of his all-around experience and ability. He has a strong arm and is a good hitter also.

Quantity, with mostly unknown quality describes the mound crew. Oscar Hansen is the only letter-winner pitcher, but Jim Ewald, regular third baseman last year, Marty Tobin, and Lloyd Albright, have all looked good in practice this spring. Jim Miller can also step in and help if the need arises.

At first, Bobby Vogel and Ralph Erke are out for the position, with Vogel having quite an edge in being over Erke.

George Heydlauff, Dave Longworth and Fritz Weber are putting up quite a struggle for the key stone sack, with the biggest scrap between Heydlauff and Longworth. Longworth is a better hitter than George but not as good a fielder. To keep that middle strong, Heydlauff will undoubtedly start at second.

Capt. Jim Miller is at short and has it all to himself. A line filler and hitter, he's leading his third straight team as captain. He also captained the football and basketball teams this year.

The best fight for a position is taking place at third base. Jim Ewald, Teddy McClear and Bob Stoffer are in it for sure. Just a guess would put Ewald

VETERAN NEWS

From the OFFICE OF VETERANS' AFFAIRS LANSING

On-The-Job Training

Ceilings Are Announced

New ceilings have been announced by conferees between the House and Senate on Senate Bill S-1393, for veterans in on-the-job training.

Ceiling on income and allowance of a single veteran will be \$210.00 per month, instead of \$175.00; for a veteran with one dependent, \$270.00 per month, instead of \$200.00; and for a veteran with two or more dependents, \$290.00 per month. The present two-year limit on on-the-job training was retained by the conferees, but all

overtime is excluded in determining the ceilings.

Report was adopted by the House and Senate; action is expected soon, as it is proposed that this will become law to be effective April 1, 1948.

Increase in Subsistence Allowance

Public Law No. 411, 80th Congress, provides that a veteran while enrolled in and pursuing a course of full-time institutional training upon application to the Administrator shall be paid a subsistence allowance of \$75.00 per month if without a dependent or dependents or \$105.00 if he has one dependent or \$120.00 per month if he has more than one dependent, including regular holidays and leave not exceeding thirty days in a calendar year. Effective date is April 1, 1948.

Part-Time Institutional Training

The Conference Committee of House and Senate conferees has agreed on "a proportionate increase of the difference between the subsistence allowance for part-time trainees and the increased allowances for full-time training."

This was adopted for those attending school on a part-time basis and trainees in institutional on-the-farm training. The Conference Report was adopted by the House and the Senate is expected to approve. The measure will become effective April 1, 1948.

Demand for Office of Veterans' Affairs Services Increases

The demand for the services rendered by the State Office of Veterans' Affairs continues to increase. In 1947, 423,850 veterans requested and received assistance through its programs, as compared to 422,721 in 1946. The 1947 figure represents 59.8 per cent of all World War II veterans in the state.

One of the programs operated by the Office of Veterans' Affairs which is supplying a much-needed service is the Mental Adjustment program. The main objective of this program is to provide early preventive service for veterans who are mentally disturbed.

The Office of Veterans' Affairs has established throughout the state 20 Psychiatric Clinics and Psychiatric Screening Centers. Veterans are channeled from the Community Counseling Centers to the Clinics where psychiatric examinations and treatments are given without cost to the veteran.

If a veteran does not react favorably to the treatments given at the Clinics, he is then referred to the Veterans' Readjustment Center at Ann Arbor, a project of the Office of Veterans' Affairs, administered by the Neuropsychiatric Institute of the University hospital, and hospitalized. The urgent need for these services is reflected from the fact that 3,392 individual veterans have received 7,362 examinations and out-patient treatments at these local Veterans' Clinics. Of this number, 371 have been admitted to the Readjustment Center for further treatment. An evaluation of this program reveals that more than 90 per cent of the veterans treated showed complete recovery or significant and marked improvement. PONTIAC

A FINE CAR
MADE EVEN FINER

For all "one-car" families

For the family which has but one motor car—Pontiac is an extremely wise choice.

First, it is big and beautiful. You can drive it anywhere, any time, with the certain knowledge that it will be admired. It also gives you the comfort you want, and need. It is safe, too—because it has big, sturdy brakes—and remarkable balance on turns and curves. It provides the perform-

ance luxury of GM Hydra-Matic Drive*. It is quick and nimble, easy to steer and park—a feature especially appreciated by women. And it is very economical—just as economical, in fact, as any car you can buy.

It is a rare car, indeed, which can offer all these qualities. And because Pontiac does offer them, it is becoming the choice of more and more people every day.

*GM Hydra-Matic Drive, Bumper Guards and White Sidewall Tires optional on all models at additional cost.

Recommend Use of Commercial Fertilizer on Spring Grain Crops

The use of commercial fertilizer on spring grains is recommended by E. D. Longnecker, soils specialist at Michigan State college.

One of the best places to use the fertilizer, he points out, is with small grain crops with which seedings of legumes or legumes and grasses are being made. The benefits to the grass and legume seedling, often equal or surpass the benefits to the grain crop.

On the heavier types of soil, the silt, loams and clay loams, an application of 300 to 400 pounds per acre of 2-16-8, 2-12-6, 0-14-7, 0-20-10, or 0-20-0 is advised. Where a legume is being seeded

Chicks Need Feed, Water Early in Life

Good feed and clean water are the two important needs for baby chicks during the early days of their life, advises Howard Zindel, extension-poultryman at Michigan State college.

Hatcherymen are interested in the success of poultrymen and can recommend feed which will supply all of the essential nutrients necessary for the proper start.

The specialist reports that baby

chicks will start eating more readily if mash is placed on paper, cardboard or egg case flats. These temporary feeders together with the paper covering the litter should be taken up after the second or third day.

Chicks which have been shipped from a distance will start eating and drinking more readily if the beaks of a few chicks are individually dipped in water and then the chicks placed near the paper plates which contain feed.

Now It's Neckties Made of Milk!

Fellow in Andy Botkin's Tavern was boasting about a trick necktie he was wearing made out of a by-product of milk. "Took 33 pounds of milk to make this tie," he says.

Bill Webster was unimpressed. "Personally," he says, "I'd rather have the milk to drink. Just as I wouldn't change one glass of good American beer for a necktie made from thirty barrels of it!"

Yes, modern science being what it is—seems like you can make "anything out of anything" these days. But in the case of milk, well

I guess drinking it is still a whole lot better than just wearing it.

Of course there are lots of other ways of abusing goods and beverages—like a fellow who doesn't appreciate good beer enough to drink it slowly and in moderation.

But from where I sit, most people who enjoy a wholesome beverage like beer or ale are moderate—because beer itself is a beverage of moderation.

Grass Day Programs Will Emphasize Need for Crop Balance Plan

Michigan farmers are realizing the need for a better balance between acreage in cash and grain feed crops and hay and pasture. During the war, 11 million acres of land in the corn belt area went into intensive crops, much of it from grass and legume acreage.

E. D. Longnecker, member of the soil science department at Michigan State college, believes much of this land needs to go back to grass and legumes to protect the soil. Soil tests conducted by the college show the use of legumes in crop rotations not only builds up the soil, but pays bigger returns over a five year period.

Tests on the Lee Perden farm in Saginaw county show that rotations with alfalfa included in two years of a five-year rotation were most profitable. A one-year use of alfalfa grossed \$35 less per acre over the five-year period. When no legume or grass was used the income was \$70 per acre less than when two years of alfalfa were included in the five-year rotation.

Longnecker believes Michigan farmers will find many demonstrations at the various Grass Day programs to be held throughout the state in June that will be of interest to them. Demonstrations held in the different sections of the state will show proper methods of seeding, management, harvesting and using legume and hay crops.

Favorable Opening Weather for Trout Season Is Forecast

Lansing—Even fly fishermen may get a break at this year's trout season opening, conservation department fisheries men conclude from a review of the weather in the trout country since trout fishing stopped last fall.

The late spring last year left streams still swollen and muddy at season opening time, and even bait fishermen had to be hardy and well dressed to withstand the freezing rain of opening week-end. This year the snow has gone earlier and more quietly, and lower Michigan streams at least, are expected to be in good condition for the April 24 opening.

Both feeding and spawning in trout streams were favored last fall by the late extension of comparatively warm weather. That means the big trout had a chance to grow a bit heavier, and the wild crop that will become creel size in a couple of years had a nice start. During the winter there was an unusual amount of ice in trout

streams, both anchor ice that formed on stream bottoms and surface ice on all but the fastest moving water.

If current weather trends continue, fisheries men expect a much more favorable opening than for the 1947 season, but something less than the ideal conditions of April, 1946.

IS THIS THE

"Sweetest riding story ever told"?

SOMETIMES we get just a bit upset over our engineers.

A cautious bunch, their tendency toward understatement now and then lets us overlook some mighty good bets.

About all they wanted to say about their new Hi-Poised power was that it went much further than anything else they knew toward controlling engine vibration frequencies.

They let us say it would make engine sensation "practically imperceptible."

That it would do away with a lot of shudder that often passes for clutch chatter. That it would "have an effect" on riding softness and quiet.

Well! Folks have now had a chance to try out our '48 beauties with Hi-Poised power—and you should hear what they say!

"Sweetest ride of any car," they tell us.

"Such smoothness—it's unbelievable!" "What have you done?—It's wonderful!"

What we did was apply a wholly new system of engine mounting.

It's a system that suspends the engine, much as in a cradle. This leaves it free to rock, bob or "wag its tail" (as every engine must)—yet maintains firm control of such movement at all times and speeds.

Add this to other things—big, soft tires on extra wide Safety-Ride rims; gentle coil springs on all four wheels; ample size and weight to master jounce and jitter—and what do you get?

A definitely "sweeter" feel to the whole car. Soft, level going—with

firm, sure footing. Lightness—with positive and dependable control.

In a phrase—"the sweetest riding story ever told," as it has been put. Naturally, we'd like to have you size up our new Vibra-Shielded ride too.

After all, there's more to any car than meets the eye, even in this eye-winning beauty. And maybe this sweet and lovely ride is just what you've been waiting for.

Better see your Buick dealer, whether or not you have a car to trade—and get your order in.

SECRET OF THE VIBRA-SHIELDED RIDE

Two fat cushions of special composition, and placed with scientific accuracy, suspend the Buick engine at the points where vibration is most readily controlled. A third new mounting at the rear completes a precise system of controlling engine vibration frequencies. The result is to shield the entire car against vibration build-up and make a noticeably smoother ride.

Michigan's Moravian Missionaries Are Remembered by Mt. Clemens Monument

Moravian missionaries, who were almost continually harassed by bad luck, are remembered by a monument near Mt. Clemens.

The Moravians were natives of Moravia, now part of Czechoslovakia, who immigrated to the United States in 1714 to be Indian missionaries. Living first in Pennsylvania, then in Ohio, they came to Michigan as the result of one of the many quirks of circumstance that seemed to cause almost every success of the missionaries to be followed by a failure.

Their shift to Michigan from Ohio occurred during the Revolutionary War. In Oct. 1781, the British commandant at Detroit, Col. Robert S. DePeyster, ordered them to report to him for questioning in regards to charges of giving aid to Americans, information in the Michigan Historical Collections at the University of Michigan states.

The Moravians didn't want any part of the war. One of their beliefs is that of strict neutrality. Because of this neutrality they were suspected by both the British and the Americans of communication with the enemy. It was to remove them from this doubtful position that Col. DePeyster ordered them to Detroit.

His order forced the missionaries to abandon three flourishing towns they had established along the Muskingum River in Ohio. The communities were inhabited largely by about 400 Delaware Indians who had been converted to Christianity and taught farming by the Moravians.

However, once Col. DePeyster understood what the Moravians were trying to do, he gave them

permission to carry on. But they had to remain in or near Detroit. As a result, in 1782, they set up a tiny village on the south bank of the Clinton River in the southwestern part of what now is Mt. Clemens. That is where the marker now stands.

Through their honesty and industriousness, the Moravians soon made many friends. But in 1786, just when they were getting a foothold, they had to abandon that town. The Chippewa Indians from whom they had leased the land wanted it back.

So on April 20, 1786, the group left, once more homeless. However, they had one bright hope. The United States, following the Revolution, had set aside for them their old lands along the Muskingum. But that hope soon dimmed. For they found U.S.-Indian warfare in the region would prohibit them from occupying the spot for many years, Michigan Historical Collections books show.

Consequently the missionaries wandered from place to place. Some settled on the Thames River in Ontario, while others went to various spots in Ohio.
