Mr. and Mrs. L. J. Albrecht, Mrs. Elsa Hackbarth and Mrs. Leah Flowers and daughter, Judy, called Sunday at the home of Mr.

Products, 31/2 to 11/4.

HI-SPEED GAS You'll Like It's Performance!

Your car has more "zip" because OUR GAS has more zip. Our fuel cuts carbon formation in the engine, too — and this means fewer repair bills. So remember ... when your gas gauge says "time to fill 'er up" be sure to make it to Hankerd's.

HI-SPEED BATTERIES . LEE DELUXE TIRES

Corner South Main and Van Buren

Mr. and Mrs. Philip Skentelbury of Detroit visited Rev. W. H. Skentelbury and daughter Sunday.

Let A Standard Want Ad Help You Find I

In the low-price field, Chevrolet built the first automatic transmission and Chevrolet builds the finest ... to give you smooth, dependable no-shift driving at lowest cost!

Take Your "DISCOVERY DRIVE"

# SPAULDING CHEVROLET SALES & SERVICE

405 North Main Street

brings you finest no-shift driving at lowest

cost. No clutch pedal, no gearshifting.

A smooth, unbroken flow of power at all

speeds. Time-proved dependability. Come

in and try it! . . . Remember, more people

buy Chevrolets than any other car! Optional on De Luxe models at extra cost.

# "SPEEDY" Balmer's Brake Service THERE'S GERTIE

There Are Many Ways To Start A Car . . . But There Is Only One Sure, Safe Way

Of Stopping . . . GOOD BRAKES!

You are just a foot from trouble—try your brakes. Do they go within two inches of the floorboard? If they do, they should be adjusted now, or checked for new linings.

SAFE driving is caution, plus GOOD brakes. We have the most modern equipment in our shop to take care of your brake troubles for you, so see or call us at your earliest convenience.

## LeRoy F. Heimerdinger

130 Adrian St. Manchester Phone 3611

Pearl Harbor - 1941. Kores - 1951. Only ten years. But in that time the Bell System's capacity to serve the nation has literally doubled!

And the Long Distance telephone network which ties America together has grown even more. In 1941, there was very little coaxial cable in use. Radio relay was still in an experimental stage. Yet today there are 8,000 miles of coaxial

cable in service - plus thousands of miles of radio relay. And Long Distance telephone circuits have increased in ten years from about 4.800,000 miles to 20,800,000.

In times like these, telephone lines are defense lines. For they are helping America rush its big production program. It's fortunate this nationwide network has grown so big, so fast.

MICHIGAN BELL TELEPHONE COMPANY

To help speed your Long Distance cell, please give the operator the out-of-towntelephone number. Telephone lines are busy with national defense.

## Remember-only BUICK has a FIREBALL ENGINE

TE get a chuckle, sometimes, over all the fuss that's being made about "new engines."

You'll note that the key feature of their design in every case is the valve-in-head principle - whether these engines are already in production or still in the dream stage.

Fact is, it takes this design to get the most from "high compression"—and how high you can go depends upon the available fuel. Using this design, wartime aircraft engines operated on 100 octane gasoline.

It also takes this design to get the more-miles-per-gallon which folks like in an automobile.

So what gives us a chuckle is this:

No other type of engine has ever been used in a Buick - which means that Buick owners, all along, have been getting a lot of things that others have just "discovered."

208 Railroad Street

there's a sweet freedom from roughness to this engine's operation-tracing to the fact that the whole mechanism itself is engineered smooth, and the further fact that every Fireball Engine gets a Micropoise balancing after assembly,

But that's not all. They get something more - vastly more - because today's Fireball Engine has one standout feature found in no other automobile.

That name "Fireball" isn't just a trick word. It describes what happens inside this engine. Inrushing fuel rolls into a

swirling ball of gasoline vapor compacted around the spark plug. And when the fat spark sets it off, a cyclone of power lets go.

Of course, a Fireball Engine, being a valve-in-head, leeps pace with high-test fuel, when it comes to "high compression."

But what's more important in the present state of the world is this: A Fireball Engine is designed to handle the not-so-high-test fuel we may be getting in the not-too-distant future.

So, if you want to sample all that's fine in motorcar engines, your Buick dealer is the man to see. Come in soon, and find out what the rest of the world has been missing.
